CHAPTER iv.

An Act to amend the Alloa Water Act 1891. A.D. 1894.

[1st June 1894.]

WHEREAS by the Alloa Water Act 1891 (herein-after called "the Act of 1891") the Commissioners of Police of the burgh of Alloa (herein-after called "the Commissioners") were authorised to provide an additional water supply to the burgh of Alloa and places adjacent and to make and maintain new and additional waterworks and the Commissioners have acquired the necessary land and are in course of executing the works thereby authorised: 54 & 55 Vict. c. clxix.

And whereas it is provided by section 10 of the Act of 1891 that the Commissioners should construct the waste weir of Gartmorn Dam so that the top water level thereof should not be higher than fifteen inches above the existing top water level of the said dam:

And whereas an error of calculation has been discovered in consequence of which the height of the existing top water level of Gartmorn Dam has been erroneously taken to be one hundred and sixty-six instead of one hundred and sixty-seven feet above ordnance datum:

And whereas in consequence of the aforesaid error doubts have arisen whether the Commissioners could raise the top water level of Gartmorn Dam fifteen inches as intended by the said Act it is expedient that such doubts should be removed and the Act of 1891 should be amended accordingly but the said purpose cannot be effected without the authority of Parliament:

May it therefore please Your Majesty that it may be enacted and be it enacted by the Queen's most Excellent Majesty by and with the advice and consent of the Lords Spiritual and Temporal and Commons in this present Parliament assembled and by the authority of the same as follows:—

1. This Act may be cited for all purposes as the Alloa Water (Amendment) Act 1894. Short title.

[*Price* 3*d*.]

A.D. 1894.

Amendment of Act of 1891.

2. Section 10 of the Act of 1891 shall be read and construed as though in lieu of the words—

"Provided further that the Commissioners shall construct the waste weir of Work No. 2 so that the top water level of Gartmorn Dam shall not be higher than fifteen inches above the present top water level as shown in the deposited plans and sections that is to say one hundred and sixty-seven feet three inches above ordnance datum beyond which last-mentioned height the Commissioners shall not be entitled to raise the top water level of the said dam and the said waste weir shall not be less than forty feet in length measuring between the side walls of the channel leading therefrom;"—

the following words had been substituted in the said section (that is to say):—

Provided further that the Commissioners shall construct the waste weir of Work No. 2 so that the top water level of Gartmorn Dam shall not be higher than fifteen inches above the present top water level that is to say one hundred and sixty-eight feet three inches above ordnance datum beyond which last-mentioned height the Commissioners shall not be entitled to raise the top water level of the said dam and the said waste weir shall not be less than forty feet in length measuring between the side walls of the channel leading therefrom;

and the Act of 1891 is hereby amended accordingly.

Costs of Act.

3. The costs charges and expenses incurred in preparing for and obtaining this Act and incidental thereto shall be paid by the Commissioners.
