COMMISSION DECISION

of 8 March 1979

allowing admission free of Common Customs Tariff duties of the scientific apparatus described as 'Durrum amino acid analyzer, model D-500' with power converter

(79/316/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 1798/75 of 10 July 1975 on the importation free of Common Customs Tariff duties of educational, scientific and cultural materials (1),

Having regard to Commission Regulation (EEC) No 3195/75 of 2 December 1975 laying down provisions for the implementation of Regulation (EEC) No 1798/75 (2), and in particular Articles 4 and 5 thereof,

Whereas, by letter dated 11 September 1978, the Danish Government requested the Commission to invoke the procedure laid down in Articles 4 and 5 of Regulation (EEC) No 3195/75 in order to determine whether or not the apparatus described as 'Durrum amino acid analyzer, model D-500' with power converter, to be used for research purposes in clinical chemistry, should be considered as a scientific apparatus and, where the reply is in the affirmative, whether apparatus of equivalent scientific value is currently being manufactured in the Community;

Whereas, in accordance with the provisions of Article 4 (5) of Regulation (EEC) No 3195/75, a group of experts composed of representatives of all the Member States met on 12 January 1979 within the Committee on Duty-Free Arrangements to examine this particular case;

Whereas this examination showed that the apparatus in question is an amino acid analyzer; whereas its objective technical characteristics such as precision and sensitivity and the use to which it is put make it specially suited to pure scientific research; whereas it must therefore be considered to be a scientific apparatus;

Whereas, on the basis of information received from Member States, apparatus of equivalent scientific value capable of use for the same purpose is not currently manufactured in the Community; whereas, therefore, duty-free admission of this apparatus is justified,

HAS ADOPTED THIS DECISION:

Article 1

1. The apparatus described as 'Durrum amino acid analyzer, model D-500' with power converter is considered to be a scientific apparatus.

2. The conditions referred to in Article 3 (1) (b) of Council Regulation (EEC) No 1798/75 of 10 July 1975 for admission free of Common Customs Tariff duties of the apparatus described in paragraph 1 are fulfilled.

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 8 March 1979.
