COMMISSION DECISION

of 12 December 1980

establishing that the apparatus described as 'Nuclear-multichannel analyzer system, model ND 600' may not be imported free of Common Customs Tariff duties

(80/1235/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 1798/75 of 10 July 1975 on the importation free of Common Customs Tariff duties of educational, scientific and cultural materials (1), as amended by Regulation (EEC) No 1027/79 (2),

Having regard to Commission Regulation (EEC) No 2784/79 of 12 December 1979 laying down provisions for the implementation of Regulation (EEC) No 1798/75 (3), and in particular Article 7 thereof,

Whereas, by letter dated 3 June 1980, the Government of the Federal Republic of Germany has requested the Commission to invoke the procedure provided for in Article 7 of Regulation (EEC) No 2784/79 in order to determine whether or not the apparatus described as 'Nuclear-multichannel analyzer system, model ND 600', to be used in the electron-energy analysis in respect of discontinuous metal-films, should be considered as a scientific apparatus and, where the reply is in the affirmative, whether apparatus of equivalent scientific value is currently being manufactured in the Community;

Whereas, in accordance with the provisions of Article 7 (5) of Regulation (EEC) No 2784/79, a group of experts composed of representatives of all the Member States met on 4 November 1980 within the framework of the Committee on Duty-Free Arrangements to examine the matter;

Whereas this examination showed that the apparatus in question is a firmware controlled, microcomputer-based analyzer system;

Whereas it does not have the requisite objective characteristics making it specifically suited to scientific research; whereas, moreover, apparatus of the same kind are principally used for non-scientific activities; whereas its use in the case in question could not alone confer upon it the character of a scientific apparatus; whereas it therefore cannot be regarded as a scientific apparatus,

HAS ADOPTED THIS DECISION:

Article 1

The apparatus described as 'Nuclear-multichannel analyzer system, model ND 600', which is the subject of an application by the Government of the Federal Republic of Germany of 3 June 1980, may not be imported free of Common Customs Tariff duties.

Article 2

This Decision is addressed to the Member States.
