COMMISSION

COMMISSION DECISION

of 11 June 1980

finding that the apparatus described as 'Ailtech-Emi field intensity meter, model NM-37/57-A' is not a scientific apparatus

(80/619/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 1798/75 of 10 July 1975 on the importation free of Common Customs Tariff duties of educational, scientific and cultural materials (1), as amended by Regulation (EEC) No 1027/79 (2),

Having regard to Commission Regulation (EEC) No 2784/79 of 12 December 1979 laying down provisions for the implementation of Regulation (EEC) No 1798/75 (3), and in particular Article 7 thereof,

Whereas, by letter dated 3 January 1980, the Government of the United Kingdom has requested the Commission to invoke the procedure provided for in Article 7 of Regulation (EEC) No 2784/79 in order to determine whether or not the apparatus described as 'Ailtech-Emi field intensity meter, model NM-37/57 A' to be used to investigate radio-wave propagation and to study radio interference, should be considered as a scientific apparatus and, where the reply is in the affirmative, whether apparatus of equivalent scientific value is currently being manufactured in the Community;

Whereas, in accordance with the provisions of Article 7 (5) of Regulation (EEC) No 2784/79, a group of experts composed of representatives of all the Member States met on 22 May 1980 within the framework of the Committee on Duty-Free Arrangements to examine the matter;

Whereas this examination showed that the apparatus in question is an interference detector;

Whereas it does not have the requisite objective characteristics making it specifically suited to scientific research; whereas, moreover, apparatus of the same kind are principally used for non-scientific activities; whereas its use in the case in question could not alone confer upon it the character of a scientific apparatus; whereas it therefore cannot be regarded as a scientific apparatus,

HAS ADOPTED THIS DECISION:

Article 1

The apparatus described as 'Ailtech-Emi field intensity meter, model NM-37/57 A' is not considered to be a scientific apparatus.

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 11 June 1980.

For the Commission

Etienne DAVIGNON

Member of the Commission
