COMMISSION DECISION

of 18 February 1981

establishing that the apparatus described as 'Carl Zeiss-Interpretoskop B' may not be imported free of Common Customs Tariff duties

(81/133/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 1798/75 of 10 July 1975 on the importation free of Common Customs Tariff duties of educational, scientific and cultural materials [1], as amended by Regulation (EEC) No 1027/79 [2],

Having regard to Commission Regulation (EEC) No 2784/79 of 12 December 1979 laying down provisions for the implementation of Regulation (EEC) No 1798/75 [3], and in particular Article 7 thereof,

Whereas, by letter dated 21 August 1980, the United Kingdom Government has requested the Commission to invoke the procedure provided for in Article 7 of Regulation (EEC) No 2784/79 in order to determine whether or not the apparatus described as 'Carl Zeiss-Interpretoskop B', to be used for measuring the images of stars and galaxies on photographic plates, should be considered as a scientific apparatus and, where the reply is in the affirmative, whether apparatus of equivalent scientific value is currently being manufactured in the Community;

Whereas, in accordance with the provisions of Article 7 (5) of Regulation (EEC) No 2784/79, a group of experts composed of representatives of all the Member States met on 8 January 1981 within the framework of the Committee on Duty-Free Arrangements to examine the matter;

Whereas this examination showed that the apparatus in question is an interpretation instrument of stereograms;

Whereas it does not have the requisite objective characteristics making it specifically suited to scientific research; whereas, moreover, apparatus of the same kind are principally used for non-scientific activities; whereas its use in the case in question could not alone confer upon it the character of a scientific apparatus; whereas it therefore cannot be regarded as a scientific apparatus; whereas the duty-free admission of the apparatus in question is therefore not justified,

HAS ADOPTED THIS DECISION:

Article 1

The apparatus described as 'Carl Zeiss-Interpretoskop B', which is the subject of an application by the United Kingdom Government of 21 August 1980, may not be imported free of Common Customs Tariff duties.

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 18 February 1981.

For the Commission

Karl-Heinz NARJES

Member of the Commission
