COMMISSION

COMMISSION DECISION

of 13 July 1983

establishing that the apparatus described as 'Canberra — GE(Li) Detector, model 7229, with Cryostat, model 7500, Spectroscopy Preamplifier model 2001, Liquid Nitrogen Monitor, model 1786, Spectroscopy Amplifier, model 2010, High Voltage Bias Supply, model 3105, Analog-to-Digital Converter, model 8070 and ADC Expander, model 8825' may be imported free of Common Customs Tariff duties

(83/363/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 1798/75 of 10 July 1975 on the importation free of Common Customs Tariff duties of educational, scientific and cultural materials (1), as last amended by Regulation (EEC) No 608/82 (2),

Having regard to Commission Regulation (EEC) No 2784/79 of 12 December 1979 laying down provisions for the implementation of Regulation (EEC) No 1798/75 (3), and in particular Article 7 thereof,

Whereas, by letter dated 11 January 1983, Belgium has requested the Commission to invoke the procedure provided for in Article 7 of Regulation (EEC) No 2784/79 in order to determine whether or not the apparatus described as 'Canberra — Ge(Li) Detector, model 7229, with Cryostat, model 7500, Spectroscopy Preamplifier, model 2001, Liquid Nitrogen Monitor, model 1786, Spectroscopy Amplifier, model 2010, High Voltage Bias Supply, model 3105, Analog-to-Digital Converter, model 8070 and ADC Expander, model 8825', ordered in April 1978 and intended to be used for identification and quantification of gamma-emitting radioactive substances, should be considered to be a scientific apparatus and, where the reply is in the affirmative, whether apparatus of equivalent scientific value is currently being manufactured in the Community;

Whereas, in accordance with the provisions of Article 7 (5) of Regulation (EEC) No 2784/79, a group of experts composed of representatives of all the Member States met on 31 May 1983 within the framework of the Committee on Duty-Free Arrangements to examine the matter;

Whereas this examination showed that the apparatus in question is a gamma spectrometric system; whereas its objective technical characteristics such as the answer to the radiation, and the use to which it is put make it specially suited to scientific research; whereas, moreover, apparatus of the same kind are principally used for scientific activities; whereas it must therefore be considered to be a scientific apparatus;

Whereas, on the basis of information received from Member States, apparatus of equivalent scientific value capable of use for the same purpose is not currently manufactured in the Community; whereas, therefore, duty-free admission of this apparatus is justified,

HAS ADOPTED THIS DECISION:

Article 1

The apparatus described as 'Canberra — Ge(Li) Detector, model 7229, with Cryostat, model 7500, Spectroscopy Preamplifier, model 2001, Liquid Nitrogen Monitor, model 1786, Spectroscopy Amplifier, model 2010, High Voltage Bias Supply, model 3105, Analog-to-Digital Converter, model 8070 and ADC Expander, model 8825' which is the subject of an application by Belgium of 11 January 1983 may be imported free of Common Customs Tariff duties.

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 13 July 1983.

For the Commission

Karl-Heinz NARJES
