ANNEX II

FINAL CONCLUSIONS

1. The Commission considers that the programme submitted by the Netherlands Government as a framework for future Community and national financing schemes, constitutes an initial measure to guide investments in aquaculture in the Netherlands authorities' analysis of the development potential.

2. The Commission points out that the investment requirements contained in the programme does not imply any commitment as regards financial support from the Community.

3. The Commission considers that the programme targets and their attainment should form the subject of a more detailed analysis within the framework of the annual review referred to in Article 6 of the Regulation (EEC) No 2908/83 in the light of developments in the structural and economic situation of fish farms in the Netherlands.
