COMMISSION DECISION

of 16 March 1987

amending Decision 77/144/EEC laying down the standard code and rules governing the transcription into a machine-readable form of the data of the surveys of plantations of certain species of fruit trees and laying down the boundaries of the production areas for these surveys

(87/228/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 76/625/EEC of 20 July 1976, concerning the statistical surveys to be carried out by the Member States in order to determine the production potential of plantations of certain species of fruit trees [1], as last amended by Directive 86/652/EEC [2], and in particular Article 4 (2) and (4) thereof,

Whereas, as a result of the introduction of new species to be covered by the survey defined in Directive 76/625/EEC, Commission Decision 77/144/EEC [3], as last amended by Decision 85/608/EEC [4], should be supplemented;

Whereas the measures provided for in this Decision are in accordance with the opinion of the Standing Committee for Agricultural Statistics,

HAS ADOPTED THIS DECISION:

Article 1

Annexes I to IV of Decision 77/144/EEC are replaced by Annexes I to III to this Decision.

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 16 March 1987.

For the Commission

Alois PFEIFFER

Member of the Commission

ANNEX I

Tape specification for the delivery to the SOEC of the results of the statistical surveys of plantations of certain species of fruit trees to be carried out in Member States

(Directive 76/625/EEC)

GENERAL PROVISIONS

I. The information recorded in accordance with the characteristics referred to in Article 2 of Directive 76/625/EEC is to be delivered to the SOEC in the following form by those Member States which process their survey information electronically:

1. On nine-track magnetic tape 1600 BPI (630 bytes/cm) IBM standard label or no label.

2. The information shall refer to summaries of holdings if the survey is exhaustive (or to raised summaries of holdings if the survey is based on random sampling), and not to individual holdings.

3. The information shall be of fixed record length and shall be recorded in the following FORTRAN format:

   I2, I2, I2, I3, I1, 6F7.0 (beginning in position 1).

4. The first five fields of each record shall contain information to permit identification (country, production area, variety and density class). The codes for these fields are specified in the detailed provisions and in Annex II. The following six fields, each of seven digits, shall contain the information about the area in ares within each of the six age classes of the record. The age classes are defined in the detailed provisions. The information shall be entered right justifiied in each field.

5. Member States shall have a choice as to blocking factor; the SOEC must be told which blocking factor has been used.

6. Member States shall specify on the documents accompanying the transmission the number of species and the number of varieites within each species.

7. The records shall be sorted according to species, variety, area or territory and density of plantation.

II. The following pages give for the various items of a record:

(a) the codes which are to be used;

(b) the number of digits required for the item of question;

(c) the consecutive numbering of the positions for the various items.
