COMMISSION DECISION

of 29 April 1992

on a transitional guidance programme for the fishing fleet (1992) of Ireland pursuant to Council Regulation (EEC) No 4028/86

(Only the English text is authentic)

(92/364/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 4028/86 of 18 December 1986 on Community measures to improve and adapt structures in the fisheries and aquaculture sector [1], as last amended by Regulation (EEC) No 3944/90 [2], and in particular Article 4 thereof,

Whereas, on 30 April 1991, the Government of Ireland forwarded to the Commission a multiannual guidance programme for the fishing fleet for the period 1992 to 1996, hereinafter referred to as 'the programme', as required by Article 3 (3) of Regulation (EEC) No 4028/86; whereas it forwarded at a later date additional information concerning the programme;

Whereas it is necessary to consider whether, having regard to the foreseeable trend in fishery resources, the market for fishery and aquaculture products, the measures adopted under the common fisheries policy and the guidelines for the latter, the programme fulfils the conditions laid down in Article 2 of Regulation (EEC) No 4028/86 and constitutes a suitable framework for Community and national financial aid for the sector concerned;

Whereas the objectives of the previous programme approved by Commission Decision 88/142/EEC [3], as amended by Decision 91/543/EEC [4], constitute the reference basis for assessing the actual development recorded and the effort still needed to ensure that the Community objectives are achieved;

Whereas the objectives of the guidance programme for 1991 have not been uniformly achieved; whereas the current or likely situation as regards availability of fish in conjunction with the activities of the fleet concerned does not allow for any adjustment of the forecast on the basis of which these objectives were determined and approved; whereas the efforts made to adapt the fleet should therefore be sustained and strengthened over the period 1992 to 1996, in view of the fact that availability of fish continues to deteriorate;

Whereas the scope of the planned modernization efforts implies a substantial improvement in the overall performance of the fleet concerned which should be taken into account when assessing the relationship to be achieved by the end of the programme period between fleet capacity and fish availability;

Whereas the development recorded should be monitored on a regular basis so as to improve or adjust the fishery support measures that accompany the implementation of the programme;

Whereas any development that does not comply with the programme objectives would run counter to the objectives of the common fisheries policy; whereas, therefore, certain specific measures undertaken under this programme may not warrant public financial assistance; whereas, in this context, approval of the programme should only be effective where the limitations and conditions upon which such approval was made conditional are complied with;

Whereas it is important that the overall reduction in fishing effort judged to be necessary in order to adapt the Community fleet to available resources should reflect significant reductions in particular segments of that fleet where an imbalance is most apparent; whereas there is insufficient information available at present to achieve comprehensive segmentation of the fleet in accordance with stocks and zones fished; whereas a broader range of parameters should therefore be developed to evaluate fishing effort as well as fleet capacity;

Whereas the Commission cannot approve programmes for the full period until adequate information is available to Member States to permit this new approach and additional time will be required to execute the work programme necessary to complete this process;

Whereas it is not appropriate to interrupt the process of reduction of the fleet inherent in the guidance programmes; whereas transitional programmes, for the period 1 January to 31 December 1992, should therefore be approved;

Whereas further reduction in fleet capacity is needed in view of the present state of the fish stocks; whereas available information indicates that a minimum reduction of 2% expressed in tonnage and engine power, based on the objectives for the end of 1991, is necessary to compensate for technological progress; whereas in addition to that reduction, a certain percentage reduction is also necessary for catching-up, in the case of those Member States which have not reached the 1991 objectives;

(2) OJ No L 380, 31. 12. 1990, p. 1.
(3) OJ No L 67, 12. 3. 1988, p. 25.
(4) OJ No L 296, 26. 10. 1991, p. 39.

Whereas the Standing Committee for the Fishing Industry have not given an opinion on the measures provided for in the present decision on which it has been consulted,

HAS ADOPTED THIS DECISION:

Article 1

A transitional guidance programme for the fishing fleet covering the period up to the end of 1992 is hereby approved subject to the limitations and conditions set out in this Decision and provided that those limitations and conditions are complied with.

Article 2

At the latest by the end of July 1992 and the end of February 1993, Ireland shall forward the Commission, in respect of each category of vessel defined in the programme, information on the number of vessels commissioned and withdrawn and on the tonnage and engine power added and withdrawn during the six-month period ending on the preceding 30 June or 31 December.

Article 3

The approval referred to in Article 1 shall only be effective where the development of the fleet complies with the objectives of the programme as set out in the Annex hereto.

Article 4

This Decision shall be without prejudice to any Community financial aid that may be granted to individual investment projects.

Article 5

This Decision is addressed to Ireland.

Done at Brussels, 29 April 1992.

For the Commission
Manuel MARÍN
Vice-President

ANNEX

TRANSITIONAL GUIDANCE PROGRAMME FOR THE IRISH FISHING FLEET (1992)

I. GENERAL REMARKS

The programme concerns the whole of the Irish fleet and covers the entire territory of that Member State.

II. OBJECTIVES

1. The objectives of the programme should be:

   (a) to reduce the fishing fleet to 43 062 GRT and 174 024 kW, according to the provisions set out in point II.2;

   (b) to modernize existing vessels where there is no increase in global capacity of the category expressed in gross registered tonnage and engine power.

2. The evolution of the fishing fleet with the exception of:

   — aquaculture working vessels,

   — vessels engaged exclusively in bivalve fishing,

   during the period covered by the programme should be made within the following limits:

Tonnage

(in GRT)

Type	Objectives of 1986 programme at 31. 12. 1986	Situation at 1. 1. 1987 (1)	Situation at 1. 1. 1992	Objectives at			Objective at 31. 12. 1992
				31. 12. 1989	31. 12. 1990	31. 12. 1991	
Vessels less than 12	7 000					6 790	6 654 (2)
Vessels 12 m and more	38 300					37 151	36 408 (2)
Total A	45 300	58 845	50 693	57 355	49 903	43 941	43 062
Vessels used for aquaculture and bivale fishing							
Total B							

(1) Includes vessels under construction at 1 January 1987.
(2) Some flexibility can be allowed between these segments of the fleet.

Engine power

(in kW)

Type	Objectives of 1986 programme at 31. 12. 1986	Situation at 1. 1. 1987 (1)	Situation at 1. 1. 1992	Objectives at			Objective at 31. 12. 1992
				31. 12. 1989	31. 12. 1990	31. 12. 1991	
Vessels less than 12 m	28 000					27 440	26 891 (2)
Vessels of 12 m and more	153 200					150 136	147 133 (2)
Total A	181 200	234 892	191 604	229 160	200 502	177 576	174 024
Vessels used for aquaculture and bivalve fishing							
Total B							

(1) Includes vessels under construction at 1 January 1987.
(2) Some flexibility can be allowed between these segments of the fleet.

III. PLANNED MEASURES

1.1. While the objectives in point II.2, Total A fix a reduction in the fishing fleet capacity equal to the difference between the situation at 1 January 1992 and the objectives to be achieved by 31 December 1992, it is also necessary to take into account the balance of capacity, if any, resulting from:

— those projects for new construction having benefited from Community and national aids at the 1991 tranches,

— those projects for new vessel construction presently under examination by the Commission (1),

— the balance of exits and entries from the fleet carried out during 1992 and not taken into account in the preceding lines,

which additions give the total reduction in fishing fleet capacity required.

1.2. The reductions envisaged in point III.1.1, should be achieved by implementing the following actions in so far as the entry into service of surplus fishing capacity having been incorporated in the capacity limits of this programme and being intended that the reductions envisaged for each of the actions can be varied on condition that the total volume of reduction of fishing capacity set out in point III.1.1 is respected:

— a reduction in the total fleet, by renewal of those active vessels lost by accident at sea, sinking or otherwise by linking direct withdrawals to new construction in line with the achievement of the objectives for fleet capacity envisaged in point II.2,

— the adoption and implementation of direct measures intended to adapt fishing capacity,

— any other measures that will achieve the same results.

2. Adoption and implementation of comprehensive legislation and/or administrative measures in order to control effectively the active fishing capacity and fishing operations and consequently to achieve the objectives of the programme set out in point II.2.

IV. COMMENTS

1. The objectives for the fleet given in the above table can be revised only on the basis of scientific evaluations leading to the establishment of the existence of resources which are not fully exploited at present.

2. The objectives in tonnage and power of the programme for 1992 should be fully realized by 31 December 1992 at the latest. Reductions in fishing capacity greater than or equal to those fixed for the objectives at 31 December 1991 which were achieved by Member States (2) can be taken into account in 1992. In that case, the Member States may achieve a minimum of 75 % of the overall reduction for 1992 indicated in the present Annex through permanent withdrawal of vessels from fishing, while the remaining maximum of 25 % can be attained through fishing control measures as long as they are based on permanent legal or administrative measures.

3. The Commission recalls that structural financial interventions by national, regional or local authorities in favour of the sector concerned should henceforth be inserted within the framework of the present programme.

---

(1) The withdrawal of requests for financing of projects currently being exmaninned by the Commission will allow for adjustment of the total reduction required.

(2) On the basis of data provided by 15 February 1992 at the latest, in accordance with Article 2 of the Decision of the Commission on the multiannual guidance programme for the period 1987 – 1991.
