COMMISSION DECISION

of 7 June 1995

amending Decision 92/593/EEC on the multiannual guidance programme for the fishing fleet of the United Kingdom for the period 1993 to 1996

(Only the English text is authentic)

(95/243/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 3699/93 of 21 December 1993 laying down the criteria and arrangements regarding Community structural assistance in the fisheries and aquaculture sector and the processing and marketing of its products [1], and in particular Article 6 (5) and (6) thereof,

Whereas in application of the provisions of point 7 of the Annex to Commission Decision 92/593/EEC [2], the Commission considered that a revision of the programme was necessary, in the light of the experience gained and the provisions of national and Community regulations in force, in order to take into account new elements which improve the conditions under which the programmes are executed and thus to ensure that the objectives fixed by the programme are better respected;

Whereas among the new elements mentioned in the first recital it is appropriate to take into account a certain number of new provisions, such as:

— the provisions for the harmonization of fishing vessel measurements in accordance with Council Regulation (EC) No 3259/94 of 22 December 1994 amending Regulation (EEC) No 2930/86 defining the characteristics of fishing vessels [3],

— the provisions to express the objectives of the programmes in terms of fishing effort, including the level of activity of the vessels, and the declaration procedures adopted in the framework of Commission Regulation (EC) No 109/94 of 19 January 1994 concerning the fishing vessel register of the Community [4],

— the new Community and national regulatory provisions or techniques apply to the management of fleet fishing capacity and activity falling within the scope of the present programme,

— the grouping of fleet segments where this respects the fishing effort reduction rates to be applied on the most sensitive fish stocks;

Whereas in the application of the provisions of Article 11 of Council Regulation (EEC) No 3760/92 [5] the Council adopted Decision 94/15/EC [6] relating to the objectives and detailed rules for restructuring the Community fisheries sector over the period 1 January 1994 to 31 December 1996 with a view to achieving a lasting balance between the resources and their exploitation; whereas the modifications adopted by the present Commission Decision may not change or reduce the scope of the guidelines adopted by the Council;

[2] OJ No L 401, 31. 12. 1992, p. 33.
[3] OJ No L 339, 29. 12. 1994, p. 11.
[4] OJ No L 19, 22. 1. 1994, p. 5.
[5] OJ No L 389, 31. 12. 1992, p. 1.
[6] OJ No L 10, 14. 1. 1994, p. 20.

Whereas certain Member States were not able to forward before the required deadline all of the data and information to allow the Commission to adopt before 31 December 1994 the draft Decisions concerning the mid-term review of the programmes;

Whereas the measures provided for in the present Decision are in accordance with the opinion of the Management Committee for Fisheries and Aquaculture,

HAS ADOPTED THIS DECISION

Article 1

Decision 92/593/EEC is amended as follows:

1. In Article 2 in the first paragraph 'capacity' is replaced by 'effort'.

2. In Article 4, the sentence 'At the latest by 15 February and 31 July of each year for the previous six-month period ending on 31 December and 30 June respectively . . .' is replaced by 'At the latest by 31 March of each year for the previous year ending on 31 December . . .'

3. In the Annex:

— In point 1 'Segmentation' the following paragraphs are added:

'Identification of segments

For each segment of the fleet a corresponding list of vessels and their characteristics are transmitted to the Commission by the Member State before 31 December 1994, in accordance with the procedures described in the framework of Commission Regulation (EC) No 109/94 of 19 January 1994 concerning the fishing vessel register of the Community (*), and in particular Annex I thereof and the categories of programmes defined therein.

Grouping of segments

Subject to the agreement of the Commission, the Member State can group several segments of the fleet. In this case, the rate of reduction applied is that corresponding to the most sensitive of the stocks targeted by the group which applies to the new segment thus formed.

Management of segments with polyvalent vessels

For clearly defined fisheries, the Member State can subsegment the fleet composed of polyvalent vessels targeting alternatively demersal, benthic or pelagic stocks. Each subsegment is distinguished by the sum of the fishing effort devoted to it, and registered as such in the table of objectives shown in the Annex to the present Decision. The management of the corresponding fishing effort must be in accordance with the procedures of Article 4 of Regulation (EC) No 109/94.

(*) OJ No L 19, 22. 1. 1994, p. 5.'

— In point 2 'Final objectives by segment':

— the text in brackets in the first paragraph, namely '(tonnage in GRT and engine power in kW)' is replaced by '(tonnage in gross tonnage (GT) and engine power in kilowatts (kW))',

— the following new paragraph is added at the end of this point:

'The application of the preceding formula to determine the final objectives in GT by segment takes into account, the estimation of GT as at 1 January 1992 for each of these segments on the basis of the provisions of Commission Decision 95/84/EC (**), and in particular the submission to the Commission by the Member States of the data on the GT of the fleet as at 15 March 1995.

The utilization of these data, segment by segment, to estimate the GT values at the start of the programme takes into account the history of the vessels as recorded in the fishing vessel register of the Community, including the vessels which disappeared or were constructed between 1 January 1992 and 15 December 1994.

The GT of the fleet at 1 January 1992 is the sum of the GT by segment thus obtained.

The value in GT of the global objectives for 31 December 1991 is determined by the application of the following formula:

$$\text{obj. 91 (GT)} = \text{obj. 91 (GRT)} \times \text{sit. 91 (GT)/sit. 91 (GRT)}$$

where:

obj. 91 (GT) = objective for 31 December 1991 in gross tonnage
obj. 91 (GRT) = objective for 31 December 1991 in gross registered tonnage
sit. 91 (GT) = situation at 1 January 1992 in gross tonnage
sit. 91 (GRT) = situation at 1 January 1992 in gross registered tonnage

The estimation of GT at 1 January 1992 of vessels which have since been permanently withdrawn from the national and Community fishing vessel registers and for which the remeasurement formulae defined by Decision 95/84/EC cannot be applied, will be made by applying the ratio GT/GRT of existing vessels in the same length class and belonging to the same segment.

(**) OJ No L 67, 25. 3. 1995, p. 33.'

— In point 5 'Implementation and monitoring' the third indent is replaced by the following:

'— data permitting the measures implemented under this programme to be monitored, in accordance with the provisions of Regulation (EC) No 109/94 concerning the fishing vessel register of the Community, and in particular Articles 4 and 5 thereof.'

— Point 6 'Planned measures' is deleted.

— Point 7 'Revision of the programme' becomes point 6. The second and third paragraphs are deleted

4. The table of objectives presented at the end of the Annex is deleted and replaced by the table annexed to the present Decision.

Article 2

This Decision is addressed to the United Kingdom of Great Britain and Northern Ireland.

Done at Brussels, 7 June 1995.

For the Commission
Emma BONINO
Member of the Commission

ANNEX

'Zone	Segment	Category of programme	Fleet register situation for 1. 1. 1992 at the time of adoption of the present Decision (1)			Objective for 31. 12. 1991		Reduction by segment (%)	Objective for 31. 12. 1996			
									In capacity		In fishing effort (*)	
			Number of vessels	GRT	kW	GRT	kW		GRT	kW	Σ (GT × t)	Σ (kW × t)
Coastal and Community third country and international waters	Pelagic trawl	F12	88	25 178	80 858			0	22 633	72 060		
	Beam trawl	F10	200	23 062	107 542			15	17 621	81 465		
	Demersal trawl and seiners	F11, F20	1 379	71 956	368 194			20	51 746	262 505		
	Nephrops trawl (2)	F16	648	18 140	100 142			0	16 306	89 246		
	Netters, liners and other static gears	F15	237 106	5 859 6 262	35 073 23 430			0	10 896	52 137		
	Shellfish mobile (2)	F14	169	6 007	34 725			0	5 400	30 947		
	Shellfish fixed	F13	137	2 636	18 397			0	2 370	16 395		
	Distant water	F17	17	10 987	23 829			0	9 876	21 236		
	Mixed (non-trawlers) < 10 m	F19	7 538	24 438	304 630			0	21 968	271 484		
	Others > 10 m	F18	892	20 208	132 102			0	18 165	117 728		
	Subtotal		11 411	214 733	1 228 922				176 981	1 015 204		
	Total		11 411	214 733	1 228 922	193 027	1 095 206		176 981	1 015 204		

(*) This refers to the total allowable fishing effort from 1 January 1992 to 31 December 1996, calculated as the sum of the annual intermediate effort objectives over this period. The annual objectives are calculated as the product of the annual intermediate objectives expressed in units of capacity and the baseline number of days at sea as defined in Annex II. For segments for which the objectives are to be met purely by reductions in capacity these columns are left blank, since the activity of vessels in these segments remains subject to the provisions of Article 5 of Regulation (EC) No 109/94.
The services of the Commission will express the objectives of the programmes in GT as Member States fulfil the obligations to remeasure their fleets as described in Commission Decision 95/84/EC.

(1) Figures for the situation at 1 January 1992 may be revised when the Channel Islands and Isle of Man vessels have been fully integrated into the declarations to the fishing vessel register of the Community.

(2) The reduction rates applied to these segments have been set at 0 % in the light of information on the by-catch rates of demersal fish species.'
