COMMISSION DECISION

of 1 December 1995

authorizing the Member States to permit temporarily the marketing of seed of field bean *(Vicia faba* L. partim) not satisfying the requirements of Council Directive 66/401/EEC

(95/509/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 66/401/EEC of 14 June 1966 on the marketing of fodder plant seed [1], as last amended by the Act of Accession of Austria, Finland and Sweden, and in particular Article 17 thereof,

Having regard to the request submitted by the United Kingdom,

Whereas in the United Kingdom the production of seed of winter varieties of field bean (*Vicia faba* L. partim) satisfying the requirements of Directive 66/401/EEC in relation to minimum germination capacity has been insufficient in 1995 and is therefore not adequate to meet that country's needs;

Whereas it is not possible to cover this demand satisfactorily with seed from other Member States, or from third countries, satisfying all the requirements laid down in the said Directive;

Whereas the United Kingdom should therefore be authorized to permit for a period expiring on 31 December 1995 the marketing of seed of the abovementioned species subject to less stringent requirements;

Whereas, moreover, other Member States which are able to supply the United Kingdom with such seed not satisfying the requirements of the Directive should be authorized to permit the marketing of such seed;

Whereas the measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Seeds and Propagating Material for Agriculture, Horticulture and Forestry,

HAS ADOPTED THIS DECISION:

Article 1

The United Kingdom is authorized to permit, for a period expiring on 31 December 1995 the marketing in its territory of a maximum of 4 000 tonnes of seed of winter varieties of field bean (*Vicia faba* L. partim) which does not satisfy the requirements laid down in Annex II to Directive 66/401/EEC with regard to the minimum germination capacity, provided that the following requirements are satisfied:

(a) the germination capacity is at least 75 % of pure seed;

(b) the official label shall bear the endorsement 'minimum germination capacity 75 %.'

Article 2

Member States other than the applicant Member State are also authorized to permit, on the terms set out in Article 1 and for the purposes intended by the applicant Member State, the marketing in their territory of the seed authorized to be marketed under this Decision.

Article 3

Member States shall immediately notify the Commission and the other Member States of the various quantities of seed labelled and permitted to be marketed in their territory pursuant to this Decision.

Article 4

This Decision is addressed to the Member States.

Done at Brussels, 1 December 1995.

For the Commission

Franz FISCHLER

Member of the Commission
