The code consists of four digits: the three-digit code from the abovementioned nomenclature, followed by a zero (e.g. code 0010 for France), except for countries with more than one register.

Where more than one register exists, the countries are to be coded as follows:

ANNEX VIII

STRUCTURE FOR STATISTICAL DATA SETS

The data sets specified in this Annex define the periodicity for the maritime transport statistics required by the Community. Each data set defines a cross classification of a limited set of dimensions at different levels of the nomenclatures, aggregated across all other dimensions, for which statistics of good quality are required.

The conditions for collecting data set B1 will be decided by the Council on a proposal from the Commission in the light of the results of the pilot study during a three-year transitional period as defined in Article 10 of this Directive.
