COMMISSION DECISION

of 23 February 1999

adopting a register of flavouring substances used in or on foodstuffs drawn up in application of Regulation (EC) No 2232/96 of the European Parliament and of the Council of 28 October 1996

(notified under number C(1999) 399)

(text with EEA relevance)

(1999/217/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 2232/96 of the European Parliament and of the Council of 28 October 1996 laying down a Community procedure for flavouring substances used or intended for use in or on foodstuffs [1] and in particular Article 3(2) thereof;

Whereas, in application of Article 3(1) of Regulation (EC) No 2232/96, Member States, within one year of the entry into force of the above-mentioned Regulation, shall notify to the Commission the list of flavouring substances accepted for use in or on foodstuffs marketed on their territory;

Whereas, in application of Article 3(2) of the said Regulation, notified flavouring substances, the legal use of which in one Member State must be recognised by the other Member States, shall be entered in a register adopted in accordance with the procedure laid down in Article 7 of the Regulation;

Whereas ist is recognized that in certain Member States, some flavouring substances are presently subject to restrictive or prohibitive measures;

Whereas it is recognised that such restrictive or prohibitive measures in force at the date of adoption of the current Decision may continue to be applied, pending completion of the evaluation of the substance;

Whereas, in any case, where a Member State notes that a flavouring substance contained in the register may constitute a danger to public health, it may invoke the safeguard procedure provided for in Article 3 (3) of Regulation (EC) No 2232/96;

Whereas the register forms the basis of the programme for evaluation provided for in Article 4 of the said Regulation which is to be adopted within ten months of the adoption of the register;

Whereas the measures provided for in this Decision are in accordance with the opinion of the Standing Committee for Foodstuffs.

HAS ADOPTED THIS DECISION:

Article 1

The register of flavouring substances annexed to this Decision is hereby adopted.

Article 2

This Decision is addressed to the Member States.

[1] OJ L 299, 23.11.1996, p. 1.

▼M2

Register of flavouring substances notified by the Member States pursuant to Article 3(1) of Regulation (EC) No 2232/96 of the European Parliament and the Council of 28 October 1996 laying down a Community procedure for flavouring substances used or intended for use in or on foodstuffs

The register of chemically defined flavouring substances has been divided into two distinct parts. Part A lists the substances according to their FL numbers. Part B lists those substances for which confidentiality has been requested by a Member State in order to protect the intellectual property rights of the manufacturer.

In part A, CAS ([1]), Einecs ([2]), CoE ([3]) and FEMA ([4]) numbers are indicated, where available.

A number in the column 'comments' refers to one of the following remarks:

1. Substance which, apart from its flavouring properties, is used for other purposes on or in foodstuffs, and, therefore, may be subject to additional legal provisions.
2. Substance the use of which is subject to restrictive or prohibitive measures in certain Member States.
3. Substance to be given priority in the evaluation programme laid down in Regulation (EC) No 1565/2000.
4. Substance on which additional information is to be submitted.
5. Name, synonyms, systematic names, CAS, Einecs, CoE or FEMA number might contain inconsistencies.

▼M3

6. Substance which may not be used in and on food, unless lawfully placed on the market in the Member State(s) concerned.

▼M2

A specific question raised concerned the treatment of salts and other derived compounds from a 'generic' substance. Certain substances had been notified with a high degree of precision. Other substances are lacking this detailed identification. On a number of acids or bases, no specific guidance is given on the actual covering of their derived salts. It is provisionally presumed, but only for the purpose of this register, that ammonium, sodium, potassium and calcium salts, as well as chlorides, carbonates and sulphates, are covered by the 'generic' substance, providing they have flavouring properties. However, final acceptance will depend of the results of the evaluation, which in these cases should verify carefully the accuracy of such assimilation.
