Corrigendum to Commission Decision 2004/450/EC of 29 April 2004 laying down standard requirements for the content of applications for Community financing for programmes for the eradication, monitoring and control of animal diseases

(Official Journal of the European Union L 155 of 30 April 2004)

Decision 2004/450/EC should read as follows:

COMMISSION DECISION

of 29 April 2004

laying down standard requirements for the content of applications for Community financing for programmes for the eradication, monitoring and control of animal diseases

(notified under document number C(2004) 1688)

(Text with EEA relevance)

(2004/450/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Decision 90/424/EEC of 26 June 1990 on expenditure in the veterinary field [1], and in particular Article 24(11) thereof,

Whereas:

(1) Decision 90/424/EEC provides for the possibility of a financial contribution by the Community towards the eradication and monitoring of the animal diseases listed in that Decision and for the monitoring and control of certain zoonoses. Each year, Member States are to submit to the Commission the programmes for which they wish to receive a financial contribution.

(2) Criteria for the eradication and monitoring programmes provided for in Decision 90/424/EEC have been established by Council Decision 90/638/EEC of 27 November 1990 laying down Community criteria for the eradication and monitoring of certain animal diseases [2].

(3) Commission Decision 2002/677/EC [3] lays down standard reporting requirements for programmes of eradication and control of animal diseases co-financed by the Community.

(4) Similarly standard requirements for the content of applications for Community financing for eradication, monitoring and control programmes should improve the process of submission, approval and assessment of progress during implementation of the programmes. Standard requirements should also create greater clarity and transparency for the Member States and the Commission and clarify the criteria laid down in Decision 90/638/EEC for the Member States.

(5) The standard requirements should cover all the criteria laid down in Decision 90/638/EEC. For the sake of consistency they should be in line with the standard reporting requirements for eradication and control programmes laid down in Decision 2002/677/EEC.

(6) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS DECISION:

Article 1

Member States seeking a financial contribution from the Community for programmes for the eradication, monitoring and control of the animal diseases referred to in Annex I shall submit applications containing:

(a) in respect of the animal diseases referred to in Annex I, Part A, at least the information set out in Annex II;

(b) in respect of the animal diseases referred to in Annex I, Part B, at least the information set out in Annex III.

[1] OJ L 224, 18.9.1990, p. 19. Decision as last amended by Directive 2003/99/EC (OJ L 325, 12.12.2003, p. 31).
[2] OJ L 347, 12.12.1990, p. 27. Decision as amended by Directive 92/65/EEC (OJ L 268, 14.9.1992, p. 54).
[3] OJ L 229, 27.8.2002, p. 24. Decision as amended by Decision 2003/394/EC (OJ L 136, 4.6.2003, p. 8).

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 29 April 2004.

For the Commission
David BYRNE
Member of the Commission

ANNEX I

PART A

Diseases referred to in Article 1(a)

(1) Bovine tuberculosis;
(2) Bovine brucellosis;
(3) IBR/IPV (AI + embryo units);
(4) Ovine and caprine brucellosis (*B. melitensis*);
(5) Enzootic bovine leukosis (EBL);
(6) Aujeszky's disease;
(7) *Salmonella pullorum;*
(8) *Salmonella gallinarum;*
(9) Anthrax;
(10) Maedi/Visna and CAEV;
(11) IBR/IPV (other types of enterprise);
(12) Johnes disease (paratuberculosis);
(13)
Mycoplasma gallisepticum; (14) Contagious bovine pleuropneumoniae;
(15) African swine fever;
(16) swine vesicular disease;
(17) endemic classical swine fever;
(18) Infectious haematopoietic necrosis (IHN);
(19) heartwater transmitted by vector insects in the French overseas departments;
(20) babesiosis transmitted by vector insects in the French overseas departments;
(21) anaplasmosis transmitted by vector insects in the French overseas departments;
(22) Infectious salmon anaemia (ISA);
(23) Bluetongue in endemic or high risk areas,
(24) Rabies;
(25) Echinococcosis;
(26) Campylobacteriosis and agents thereof;
(27) Listeriosis and agents thereof;
(28) Salmonellosis (zoonotic salmonella) and agents thereof;
(29) Trichinellosis and agents thereof; and
(30) Verotoxigenic *Escherichia coli*.

PART B

Diseases referred to in Article 1(b)

Bovine spongiform encephalopathy (BSE) or any other slow developing disease.

ANNEX II

Standard requirements for the submission of programmes of monitoring, eradication and control of animal diseases co-financed by the Community

1. Identificação do programa

Estado-Membro:

Doença(s)([4]):

Year of implementation:

Reference of this document:

Contact (name, phone, fax, e-mail):

Date sent to the Commission:

2. Historical data on the epidemiological evolution of the disease(s) ([5]):

3. Description of the submitted programme ([6]):

([4]) Utiliza-se um documento por doença, excepto quando todas as medidas do programa sobre a população-alvo forem utilizadas para a vigilância, o controlo e a erradicação de doenças diferentes.

([5]) A concise description is given with data on the target population (species, number of herds and animals present and under the programme), the main measures (testing, testing and slaughter, testing and killing, qualification of herds and animals, vaccination …) and the main results (incidence, prevalence, qualification of herds and animals). The information is given according distinct periods if the measures were substantially modified. The information is documented by relevant summary epidemiological tables, graphs or maps.

([6]) A concise description of the programme is given with the main objective(s) (monitoring, control, eradication, qualification of herds and/or regions, reducing prevalence and incidence …), the main measures (testing, testing and slaughter, testing and killing, qualification of herds and animals, vaccination …), the target animal population and the area(s) of implementation and the definaition of a positive case.

4. Measures of the submitted programme

4.1. Summary of measures under the programme

Duration of the programme:

First year:

☐ Control

- ☐ Testing
- ☐ Slaughter of positive animals
- ☐ Killing of positive animals
- ☐ Vaccination
- ☐ Treatment
- ☐ Disposal of products

☐ Monitoring or surveillance

☐ Other measures *(specify)*:

Last year:

☐ Eradication

- ☐ Testing
- ☐ Slaughter of positive animals
- ☐ Killing of positive animals
- ☐ Extended slaughter or killing
- ☐ Disposal of products

4.2. Designation of the central authority charged with supervising and coordinating the departments responsible for implementing the programme([7]):

4.3. Description and delimitation of the geographical and administrative areas in which the programme is to be implemented ([8]):

([7]) Describe the authorities charged with supervising and coordinating the departments responsible for implementing the programme and the different operators involved. Describe the responsibilities of all involved.

([8]) Describe the name and denomination, the administrative boundaries, and the surface of the administrative and geographical areas in which the programme is to be applied. Illustrate with maps.

4.4. *Measures implemented under the programme ([9])*

4.4.1. Measures and terms of legislation as regards the registration of holdings:

4.4.2. Measures and terms of legislation as regards the identification of animals ([10]):

4.4.3. Measures and terms of legislation as regards the notification of the disease:

4.4.4. Measures and terms of legislation as regards the measures in case of a positive result ([11]):

4.4.5. Measures and terms of legislation as regards the different qualifications of animals and herds:

4.4.6. Control procedures and in particular rules on the movement of animals liable to be affected or contaminated by a given disease and the regular inspection of the holdings or areas concerned ([12]):

4.4.7. Measures and terms of legislation as regards the control (testing, vaccination, …) of the disease:

4.4.8. Measures and terms of legislation as regards the compensation for owners of slaughtered and killed animals:

5. General description of the costs and benefits ([13]):

([9]) Where appropriate Community legislation is mentioned. Otherwise the national legislation is mentioned.
([10]) Not applicable for poultry.
([11]) A short description is provided of the measures as regards positive animals (slaughter, destination of carcasses, use or treatment of animal products, the destruction of all products which could transmit the disease or the treatment of such products to avoid any possible contamination, a procedure for the disinfection of infected holdings, the therapeutic or preventive treatment chosen, a procedure for the restocking with healthy animals of holdings which have been depopulated by slaughter and the creation of a surveillance zone around the infected holding,…).
([12]) A short description of the control procedures and in particular rules on the movement of animals liable to be affected or contaminated by a given disease and the regular inspection of the holdings or areas is provided.
([13]) A description is provided of all costs for the authorities and society and the benefits for farmers and society in general.

6.1.1.2. Data on animals (one table per year and per disease/species)

Year: **Situation on date:**

Disease([a]): **Animal species:**

Region([b])	Total number of animals([c])	Number of animals([d]) to be tested under the programme	Number of animals([d]) tested	Number of animals tested indbividually([e])	Number of positive animals	Slaughtering		Indicators	
						Number of animals with positive result slaughtered or culled	Total number of animals slaughtered([f])	% coverage at animal level	% positive animals Animal prevalence
1	2	3	4	5	6	7	8	9=(4/3)x100	10=(6/4)x100
Total									

([a]) Disease and animal species if necessary.

([b]) Region as defined in the approved eradication programme of the Member State.

([c]) Total number of animals existing in the region including eligible herds and non-eligible herds for the programme.

([d]) Includes animals tested individually or under bulk level scheme.

([e]) Include only animals tested individually, do not include animals tested by bulk level samples (e.g.: milk bulk tank tests).

([f]) Include all positive animal slaughtered and also the negative animals slaughtered under the programme.

6.1.2. Data on evolution of the disease ([16])

Year: **Situation on date:**

Animal species: **Disease/infection([a]):**

Region	Type of flock([b])	Total number of flocks([c])	Total number of animals	Total number of flocks under the programme	Total number of animals under the programme	Number of flocks checked([d])	Number of positive([e]) flocks([a])			Number of flocks depopulated([a])		Total number of animals slaughtered or destroyed ([a])		Quantity of eggs destroyed (number or kg) ([a])		Quantity of eggs channelled to egg products (number or kg) ([a])	
							(a1)	(a2)	(a3)	(a3)	(a4)	(a4)	(a3)	(a4)	(a3)	(a4)	(a3)
Total																	

([a]) For zoonotic Salmonella indicate the serotypes covered by the control programmes: (a1) for *Salmonella* Enteritidis, (a2) for *Salmonella* Typhimurium, (a3) for other serotypes-specify as appropriate, (a4) for *Salmonella* Enteritidis or *Salmonella* Typhimurium.

([b]) For example, breeding flocks (rearing, adult flocks), production flocks, laying hen flocks, etc. Flocks equals herds or as appropriate.

([c]) Total number of flocks existing in the region including eligible flocks and non-eligible flocks for the programme.

([d]) Check means to perform a flock level test under the programme for the presence of salmonella. In this column a flock should not be counted twice even if it has been checked more than once.

([e]) If a flock has been checked, in accordance with footnote (d), more than once, a positive sample should be taken into account only once.

([16]) Data to provide for *salmonellosis* (zoonotic salmonella), *Salmonella pullorum*, *Salmonella gallinarum*, *Mycoplasma gallisepticum*, *Campylobacteriosis* and agents thereof.

6.2. Stratified data on surveillance and laboratory tests

6.2.1. Stratified data on surveillance and laboratory tests (one table per year and per disease/species)

Year: **Disease([a]):** **Animal species/category([b]):**

Description of the used serological tests:

Description of the used microbiological or virological tests:

Description of the other used tests:

Region([c])	Serological tests		Microbiological or virological tests		Other tests	
	Number of samples tested([d])	Number of positive samples([e])	Number of samples tested([d])	Number of positive samples([e])	Number of samples tested([d])	Number of positive samples([e])
Total						

([a]) Disease and animal species if necessary.
([b]) Breeders, laying hens, etc, when appropriate.
([c]) Region as defined in the approved eradication programme of the Member State.
([d]) Number of samples tested, all confounded.
([e]) Number of positive samples, all confounded.

6.3. Data on infection (one table per year and per disease/species)

Year: **Disease([a]):** **Animal species:**

Region([b])	Number of herds infected([c])	Number of animals infected
Total		

([a]) Disease and animal species if necessary.
([b]) Region as defined in the eradication programme of the Member State.
([c]) Herds equal flocks, or holdings as appropriate.

6.4. Data on the status of herds at the end of each year ([17])

Year: **Disease([a]):** **Animal species:**

Region([b])	Status of herds and animals under the programme([c])													
	Total number of herds and animals under the programme		Unknown([d])		Not free or not officially free				Free or officially free suspended([g])		Free([h])		Officially free ([i])	
					Last check positive([e])		Last check negative([f])							
	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])
Total														

([a]) Disease and species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.
([c]) At the end of the year.
([d]) Unknown: No previous checking results available.
([e]) Not free and last check positive: Herd checked with at least one positive result in the latest check.
([f]) Not free and last check negative: Herd checked with negative results in the latest check but not being 'free' or 'officially free'.
([g]) Suspended as defined in Community or national legislation for the respective disease at the end of the reporting period.
([h]) Free herd as defined in Community or national legislation for the respective disease.
([i]) Officially free herd as defined in Community or National legislation for the respective disease.
([j]) Include animals under the programme in the herds with the referred status (left column).

([17]) Data to provide for Bovine tuberculosis, Bovine brucellosis, IBR/IPV (AI + embryo units), Ovine and caprine brucellosis (B. melitensis), Enzootic bovine leukosis (EBL), Aujeszky's disease, Maedi/Visna and CAEV, IBR/IPV (other types of enterprise), Johnes disease (paratuberculosis).

6.5. Data on vaccination or treatment programmes ([18])

Year: **Disease([a]):** **Animal species:**

Description of the used vaccination, therapeutic or other scheme:

Region([b])	Total number of herds([c])	Total number of animals	Information on vaccination or treatment programme					
			Number of herds([c]) in vaccination or treatment programme	Number of herds([c]) vaccinated or treated	Number of animals vaccinated or treated	Number of doses of vaccine or treatment administered	Number of adults([d]) vaccinated	Number of young([d]) animals vaccinated
Total								

([a]) Disease and species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.
([c]) Herds equal flocks, or holdings as appropriate.
([d]) Only for Bovine brucellosis, Ovine and caprine brucellosis (B. melitensis) and zoonotic salmonella, and as defined in the programme.

([18]) Data to provide, where appropriate for Bovine brucellosis, IBR/IPV (AI + embryo units), Ovine and caprine brucellosis (B. melitensis), Aujeszky's disease, Salmonella pullorum, Salmonella gallinarum, Anthrax, IBR/IPV (other types of enterprise), Johnes disease (paratuberculosis), Mycoplasma gallisepticum, heartwater transmitted by vector insects in the French overseas departments, babesiosis transmitted by vector insects in the French overseas departments, anaplasmosis transmitted by vector insects in the French overseas departments, Bluetongue in endemic or high risk areas, Rabies, Echinococcosisand salmonellosis (zoonotic salmonella) and agents thereof.

6.6. Data on wildlife ([19])

6.6.1. Estimation of wildlife population

Year: **Method of estimation([a]):**

Regions([b])	Estimation of the population of the concerned wild species			
	Species:	Species:	Species:	Species:
Total				

([a]) The hunting bag is considered to be the standard method of estimation. If other method is used, explain.
([b]) Region as defined in the approved eradication programme of the Member State.

([19]) Data to provide for Bovine brucellosis, Ovine and caprine brucellosis (*B. melitensis*), Aujeszky's disease, African swine fever, swine vesicular disease, endemic classical swine fever, rabies, echinococcosis and trichinellosis and agents thereof.

6.6.2. Monitoring of wildlife (one table per year and per disease/species)

Year: **Disease([a]):** **Animal species:**

Description of the used serological tests:

Description of the used microbiological or virological tests:

Description of the other used tests:

Region([b])	Microbiological or virological tests		Serological tests		Other tests	
	Number of samples tested	Number of positive samples	Number of samples tested	Number of positive samples	Number of samples tested	Number of positive samples
Total						

([a]) Disease and species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.

6.6.3. *Data on vaccination or treatment of wildlife*

Year: **Disease([a]):** **Animal species:**

Description of the used vaccination, therapeutic or other scheme:

Region([b])	Square km	Vaccination or treatment programme		
		Number of doses of vaccine or treatment to be administered	Number of campaigns	Total number of doses of vaccine or treatment administered
Total				

([a]) Disease and species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.

7. Targets

7.1. Targets related to testing

7.1.1. Targets on diagnostic tests

7.1.1.1. Number and specification of tests

Disease([a]): **Animal species:**

Region([b])	*Type of the test*([c])	*Target population* ([d])	*Type of sample*([e])	*Objective* ([f])	*Number of planned tests*
Total					

([a]) Disease and species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.
([c]) Description of the test (e.g. SN-test, AB-Elisa, RBT, …).
([d]) Specification of the targeted species and the categories of targeted animals (e.g. sex, age, breeding animal, slaughter animal, …).
([e]) Description of the sample (e.g. blood, serum, milk, …).
([f]) Description of the objective (e.g. qualification, surveillance, confirmation of suspected cases, monitoring of campaigns, seroconversion, control on deleted vaccines, testing of vaccine, control of vaccination, …).

7.2.1.2. Testing scheme(s) ([20]):

([20]) Describe the testing scheme according the different categories if appropriate (which herds and animals, the number of animals per herd, the frequency and the interval of sampling) with reference to the national and Community legislation where appropriate.

7.1.2. Targets on testing herds and animals ([21])

7.1.2.1 Targets on the testing of herds([a])

Disease([b]): **Animal species:**

Region([c])	Total number of herds([d])	Total number of herds under the programme	Number of herds expected to be checked([e])	Number of expected positive herds([f])	Number of expected new positive herds([g])	Number of herds expected to be depopulated	% positive herds expected to be depopulated	Target indicators		
								Expected % herd coverage	% positive herds Expected period herd prevalence	% new positive herds Expected herd incidence
1	2	3	4	5	6	7	8 = (7/5)x100	9 = (4/3)x100	10 = (5/4)x100	11 = (6/4)x100
Total										

([a]) Herds equal flocks, or holdings as appropriate.
([b]) Disease and animal species if necessary.
([c]) Region as defined in the approved eradication programme of the Member State.
([d]) Total number of herds existing in the region including eligible herds and non-eligible herds for the programme.
([e]) Check means to perform a herd level test under the programme for the respective disease with the purpose of maintaining, upgrading, etc., the health status of the herd. In this column a herd should not be counted twice even if has been checked more than once.
([f]) Herds with at least one positive animal during the period independent of the number of times the herd has been checked.
([g]) Herds which status in the previous period was Unknown, Not free-negative, Free, Officially Free or suspended and have at least one positive animal in this period.

([21]) Data to provide for Bovine tuberculosis, Bovine brucellosis, IBR/IPV (AI + embryo units), Ovine and caprine brucellosis (*B. melitensis*), Enzootic bovine leukosis (EBL), Aujeszky's disease, Anthrax, Maedi/Visna and CAEV, IBR/IPV (other types of enterprise Johnes disease (paratuberculosis), CBPP, African Swine fever, swine vesicular disease, endemic classical swine fever, heartwater transmitted by vector insects in the French overseas departments, babesiosis transmitted by vector insects in the Frenc overseas departments, anaplasmosis transmitted by vector insects in the French overseas departments, Bluetongue in endemic or high risk areas.

7.1.2.2. Targets on the testing of animals

Disease([a]): **Animal species:**

Region([b])	Total number of animals([c])	Number of animals([d]) under the programme	Number of animals([d]) expected to be tested	Number of animals to be tested individually([e])	Number of expected positive animals	Slaughtering		Target indicators	
						Number of animals with positive result expected to be slaughtered or culled	Total number of animals expected to be slaughtered([f])	Expected % coverage at animal level	% positive animals (Expected animal prevalence)
1	2	3	4	5	6	7	8	9=(4/3)x100	10=(6/4)x100
Total									

([a]) Disease and animal species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.
([c]) Total number of animals existing in the region including eligible herds and non-eligible herds for the programme.
([d]) Includes animals tested individually or under bulk level scheme.
([e]) Include only animals tested individually, do not include animals tested by bulk level samples (e.g.: milk bulk tank tests).
([f]) Include all positive animal slaughtered and also the negative animals slaughtered under the programme.

7.1.3. Targets on testing of flocks ([22])

Year: **Situation on date:**

Animal species: **Disease/infection([a]):**

Region	Type of flock([b])	Total number of flocks([c])	Total number of animals	Total number of flocks under the programme	Total number of animals under the programme	Expected number of flocks to be checked([d])	Number of flocks([c]) expected to be positive ([a])			Number of flocks expected to be depopulated([a])		Total number of animals expected to be slaughtered or destroyed ([a])		Expected quantity of eggs to be destroyed (number or kg) ([a])		Expected quantity of eggs channelled to egg products (number or kg) ([a])	
							(a1)	(a2)	(a3)	(a4)	(a3)	(a4)	(a3)	(a4)	(a3)	(a4)	(a3)
Total																	

([a]) For zoonotic salmonella indicate the serotypes covered by the control programmes: (a1) for *Salmonella Enteritidis*, (a2) for *Salmonella Typhimurium*, (a3) for other serotypes-specify as appropriate, (a4) for *Salmonella Enteritidis* or *Salmonella Typhimurium*.

([b]) For example, breeding flocks (rearing, adult flocks), production flocks, laying hen flocks, etc. Flocks equals herds or as appropriate.

([c]) Total number of flocks existing in the region including eligible flocks and non-eligible flocks for the programme.

([d]) Check means to perform a flock level test under the programme for the presence of salmonella. In this column a flock should not be counted twice even if it has been checked more than once.

([e]) If a flock has been checked, in accordance with footnote (d), more than once, a positive sample should be taken into account only once.

([22]) Data to provide for *salmonellosis* (zoonotic salmonella), *Salmonella pullorum*, *Salmonella gallinarum*, *Mycoplasma gallisepticum*, *Campylobacteriosis* and agents thereof.

7.2. Targets on qualification of herds and animals ([23])

Disease([a]): **Animal species:**

Region([b])	Total number of herds and animals under the programme		Targets on the status of herds and animals under the programme([c])											
			Expected unknown([d])		Expected not free or not officially free				Expected free or officially free suspended([g])		Expected free([h])		Expected officially free ([i])	
					Last check positive([e])		Last check negative([f])							
	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])	Herds	Animals([j])
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Total														

([a]) Disease and species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.
([c]) At the end of the year.
([d]) Unknown: No previous checking results available.
([e]) Not free and last check positive: Herd checked with at least one positive result in the latest check.
([f]) Not free and last check negative: Herd checked with negative results in the latest check but not being 'free' or 'officially free'.
([g]) Suspended as defined for the respective disease in Community or national legislation where appropriate or according national legislation.
([h]) Free herd as defined for the respective disease where appropriate in Community or national legislation where appropriate or according national legislation.
([i]) Officially free herd as defined for the respective disease where appropriate in Community or national legislation where appropriate or according national legislation.
([j]) Include animals under the programme in the herds with the referred status (left column).

([23]) Data to provide for Bovine tuberculosis, Bovine brucellosis, IBR/IPV (AI + embryo units), Ovine and caprine brucellosis (*B. melitensis*), Enzootic bovine leukosis (EBL), Aujeszky's disease, Maedi/Visna and CAEV, IBR/IPV (other types of enterprise), Johnes disease (paratuberculosis).

7.3. Targets on vaccination or treatment

7.3.1. Targets on vaccination or treatment ([24])

Vaccine(s) and vaccination scheme or treatment and treatment scheme ([25])

Disease([a]): **Animal species:**

Region([b])	Total number of herds([c]) in vaccination or treatment programme	Total number of animals in vaccination or treatment programme	Targets on vaccination or treatment programme					
			Number of herds([c]) in vaccination or treatment programme	Number of herds([c]) expected to be vaccinated or treated	Number of animals expected to be vaccinated or treated	Number of doses of vaccine or treatment expected to be administered	Number of adults([d]) expected to be vaccinated	Number of young([d]) animals expected to be vaccinated
Total								

([a]) Disease and species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.
([c]) Herds equal flocks, or holdings as appropriate.
([d]) Only for Bovine brucellosis and Ovine, caprine brucellosis (*B. melitensis*) and zoonotic salmonella and as defined in the programme.

([24]) Data to provide for Bovine brucellosis, IBR/IPV (AI + embryo units), Ovine and caprine brucellosis (*B. melitensis*), Aujeszky's disease, *Salmonella pullorum*, *Salmonella gallinarum*, Anthrax, IBR/IPV (other types of enterprise), Johnes disease (paratuberculosis), *Mycoplasma gallisepticum*, heartwater transmitted by vector insects in the French overseas departments, babesiosis transmitted by vector insects in the French overseas departments, anaplasmosis transmitted by vector insects in the French overseas departments, Bluetongue in endemic or high risk areas, Rabies, Echinococcosis, salmonellosis (zoonotic salmonella) and agents thereof.

([25]) Specify the vaccine and the vaccination scheme (which herds and animals, the frequency and the interval of vaccination) with reference to the national legislation.

7.3.2. Targets on vaccination or treatment ([26]) of wildlife

Disease([a]): **Animal species:**

Region([b])	Square km	Targets on the vaccination or treatment programme		
		Number of doses of vaccine or treatments expected to be administered in the campaign	Expected number of campaigns	Total number of doses of vaccine or treatment expected to be administered
Total				

([a]) Disease and species if necessary.
([b]) Region as defined in the approved eradication programme of the Member State.

([26]) Data to provide for Bovine brucellosis, Ovine and caprine brucellosis (*B. melitensis*), Aujeszky's disease, African swine fever, swine vesicular disease, endemic classical swine fever, Rabies, Echinococcosis and trichinellosis and agents thereof.

8. **Detailed analysis of the cost of the programme** ([27])

Costs related to	*Specification*	*Number of units*	*Unitary cost in euro*	*Total amount in euro*	*Community funding requested (yes/no)*
1. Testing					
1.1. Cost of the analysis	*Test:*				
	Test:				
	Test:				
1.2. Cost of sampling					
1.3. Other costs					
2. Vaccination or treatment					
2.1. Purchase of vaccine/treatment					
2.2. Distribution costs					
2.3. Administering costs					

([27]) Fixed costs should not be included. All amounts are VAT excluded.

2.4. Control costs					
3. Slaughter and destruction					
3.1. Compensation of animals					
3.2. Transport costs					
3.3. Destruction costs					
3.4. Loss in case of slaughtering					
3.5 Costs from treatment of products (milk, eggs, hatching eggs, etc)					
4. Cleaning and disinfection					

5. Salaries (staff contracted for the programme only)					
6. Consumables and specific equipment					
7. Other costs					
TOTAL					

Standard requirements for the submission of programmes of eradication and monitoring of TSEs ([28]) co-financed by the Community

1. Identification of the programme

Contact (name, phone, fax, e-mail):

Date sent to the Commission:

2. Description of the programme

3. Description of the epidemiological situation of the disease

4. Measures included in the programme

4.1. Designation of the central authority charged with supervising and coordinating the departments responsible for implementing the programme:

4.2. Description and delimitation of the geographical and administrative areas in which the programme is to be applied:

([28]) Bovine spongiform encephalopathy (BSE) and scrapie.
([29]) One document per disease is used unless all measures of the programme on the target population are used for the control and eradication of different diseases.

ANNEX III

Standard requirements for the submission of programmes of eradication and monitoring of TSEs co-financed by the Community

1. Identificação do programa

Estado-Membro:

Doença(s)([4]):

Year of implementation:

Reference of this document:

Contact (name, phone, fax, e-mail):

Date sent to the Commission:

2. Historical data on the epidemiological evolution of the disease(s) ([5]):

3. Description of the submitted programme ([6]):

([4]) Utiliza-se um documento por doença, excepto quando todas as medidas do programa sobre a população-alvo forem utilizadas para a vigilância, o controlo e a erradicação de doenças diferentes.

([5]) A concise description is given with data on the target population (species, number of herds and animals present and under the programme), the main measures (testing, testing and slaughter, testing and killing, qualification of herds and animals, vaccination …) and the main results (incidence, prevalence, qualification of herds and animals). The information is given according distinct periods if the measures were substantially modified. The information is documented by relevant summary epidemiological tables, graphs or maps.

([6]) A concise description of the programme is given with the main objective(s) (monitoring, control, eradication, qualification of herds and/or regions, reducing prevalence and incidence …), the main measures (testing, testing and slaughter, testing and killing, qualification of herds and animals, vaccination …), the target animal population and the area(s) of implementation and the definaition of a positive case.

4. Measures of the submitted programme

4.1. *Summary of measures under the programme*

Duration of the programme:

First year:

☐ Control

- ☐ Testing
- ☐ Slaughter of positive animals
- ☐ Killing of positive animals
- ☐ Vaccination
- ☐ Treatment
- ☐ Disposal of products

☐ Monitoring or surveillance

☐ Other measures *(specify)*:

Last year:

☐ Eradication

- ☐ Testing
- ☐ Slaughter of positive animals
- ☐ Killing of positive animals
- ☐ Extended slaughter or killing
- ☐ Disposal of products

4.2. *Designation of the central authority charged with supervising and coordinating the departments responsible for implementing the programme([7]):*

4.3. *Description and delimitation of the geographical and administrative areas in which the programme is to be implemented ([8]):*

([7]) Describe the authorities charged with supervising and coordinating the departments responsible for implementing the programme and the different operators involved. Describe the responsibilities of all involved.

([8]) Describe the name and denomination, the administrative boundaries, and the surface of the administrative and geographical areas in which the programme is to be applied. Illustrate with maps.

4.4. *Measures implemented under the programme ([9])*

4.4.1. Measures and terms of legislation as regards the registration of holdings:

4.4.2. Measures and terms of legislation as regards the identification of animals ([10]):

4.4.3. Measures and terms of legislation as regards the notification of the disease:

4.4.4. Measures and terms of legislation as regards the measures in case of a positive result ([11]):

4.4.5. Measures and terms of legislation as regards the different qualifications of animals and herds:

4.4.6. Control procedures and in particular rules on the movement of animals liable to be affected or contaminated by a given disease and the regular inspection of the holdings or areas concerned ([12]):

4.4.7. Measures and terms of legislation as regards the control (testing, vaccination, …) of the disease:

4.4.8. Measures and terms of legislation as regards the compensation for owners of slaughtered and killed animals:

5. General description of the costs and benefits ([13]):

([9]) Where appropriate Community legislation is mentioned. Otherwise the national legislation is mentioned.
([10]) Not applicable for poultry.
([11]) A short description is provided of the measures as regards positive animals (slaughter, destination of carcasses, use or treatment of animal products, the destruction of all products which could transmit the disease or the treatment of such products to avoid any possible contamination, a procedure for the disinfection of infected holdings, the therapeutic or preventive treatment chosen, a procedure for the restocking with healthy animals of holdings which have been depopulated by slaughter and the creation of a surveillance zone around the infected holding,…).
([12]) A short description of the control procedures and in particular rules on the movement of animals liable to be affected or contaminated by a given disease and the regular inspection of the holdings or areas is provided.
([13]) A description is provided of all costs for the authorities and society and the benefits for farmers and society in general.

6.1.1.2. Data on animals (one table per year and per disease/species)

Year: **Situation on date:**

Disease([a]): **Animal species:**

Region([b])	Total number of animals([c])	Number of animals([d]) to be tested under the programme	Number of animals([d]) tested	Number of animals tested indbividually([e])	Number of positive animals	Slaughtering		Indicators	
						Number of animals with positive result slaughtered or culled	Total number of animals slaughtered([f])	% coverage at animal level	% positive animals Animal prevalence
1	2	3	4	5	6	7	8	9=(4/3)x100	10=(6/4)x100
Total									

([a]) Disease and animal species if necessary.

([b]) Region as defined in the approved eradication programme of the Member State.

([c]) Total number of animals existing in the region including eligible herds and non-eligible herds for the programme.

([d]) Includes animals tested individually or under bulk level scheme.

([e]) Include only animals tested individually, do not include animals tested by bulk level samples (e.g.: milk bulk tank tests).

([f]) Include all positive animal slaughtered and also the negative animals slaughtered under the programme.

6.1.2. Data on evolution of the disease ([16])

Year: **Situation on date:**

Animal species: **Disease/infection([a]):**

Region	Type of flock([b])	Total number of flocks([c])	Total number of animals	Total number of flocks under the programme	Total number of animals under the programme	Number of flocks checked([d])	Number of positive([e]) flocks([a])			Number of flocks depopulated([a])		Total number of animals slaughtered or destroyed ([a])		Quantity of eggs destroyed (number or kg) ([a])		Quantity of eggs channelled to egg products (number or kg) ([a])	
							(a1)	(a2)	(a3)	(a3)	(a4)	(a4)	(a3)	(a4)	(a3)	(a4)	(a3)
Total																	

([a]) For zoonotic Salmonella indicate the serotypes covered by the control programmes: (a1) for *Salmonella* Enteritidis, (a2) for *Salmonella* Typhimurium, (a3) for other serotypes-specify as appropriate, (a4) for *Salmonella* Enteritidis or *Salmonella* Typhimurium.

([b]) For example, breeding flocks (rearing, adult flocks), production flocks, laying hen flocks, etc. Flocks equals herds or as appropriate.

([c]) Total number of flocks existing in the region including eligible flocks and non-eligible flocks for the programme.

([d]) Check means to perform a flock level test under the programme for the presence of salmonella. In this column a flock should not be counted twice even if it has been checked more than once.

([e]) If a flock has been checked, in accordance with footnote (d), more than once, a positive sample should be taken into account only once.

([16]) Data to provide for *salmonellosis* (zoonotic salmonella), *Salmonella pullorum*, *Salmonella gallinarum*, *Mycoplasma gallisepticum*, *Campylobacteriosis* and agents thereof.
