COMMISSION

COMMISSION DIRECTIVE

of 26 July 1984

fixing standard rates of yield for certain inward processing operations and laying down certain rules for the calculation of import duties

(84/442/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 69/73/EEC of 4 March 1969 on the harmonization of provisions laid down by law, regulation or administrative action in respect of inward processing (1), as last amended by Directive 83/89/EEC (2), and in particular Articles 12, 17 and 28 thereof,

Whereas Commission Directive 79/608/EEC (3), as last amended by Directive 83/579/EEC (4), fixes standard rates of yield for certain inward processing operations;

Whereas it is necessary to supplement the standard rates of yield previously fixed by specifying those of other compensating products obtained from different inward processing operations; whereas it is also appropriate to amend certain of those rates, to fix standard rates of yield for other operations and to delete certain of those rates referring to operations which are no longer carried out;

Whereas the fixing of standard rates of yield implies also that losses possibly resulting from the processing or working of the goods should also be taken into account, that is that part of the goods to be processed which is destroyed and disappears during the process of manufacture; whereas account must be taken of these losses at the time of calculating import duties in the case of entry for free circulation of compensating or intermediate products;

Whereas for reasons of clarity it is desirable to publish the provisions of Directive 79/608/EEC and all its amendments in a single text;

Whereas since there are, with the exception of cocoa, no longer provisions in force in the Member States corresponding to those contained in this Directive, Article 35 of Directive 69/73/EEC therefore becomes devoid of object as regards its reference to Article 12 of that Directive;

Whereas the measures provided for in this Directive are in accordance with the opinion of the Committee for Customs Processing Arrangements,

HAS ADOPTED THIS DIRECTIVE:

Article 1

1. This Directive fixes, in column 5 of the Annex, the standard rates of yield which the competent authorities of each Member State must apply when inward processing operations concern goods listed in column 1 and result in the production of compensating products referred to in columns 3 and 4, on condition that the imported goods are of sound, genuine and merchantable quality and correspond to the standard quality where such quality has been fixed by Community rules.

(1) OJ No L 58, 8. 3. 1969, p. 1.
(2) OJ No L 59, 5. 3. 1983, p. 1.
(3) OJ No L 170, 9. 7. 1979, p. 5.
(4) OJ No L 334, 29. 11. 1983, p. 23.

2. For the purposes of this Directive:

— 'import duties' means not only customs duties and charges having equivalent effect but also agricultural levies and other import charges provided for under the common agricultural policy or under specific arrangements applicable to certain goods resulting from the processing of agricultural products,

— 'losses' means that part of the imported goods which was destroyed and has disappeared in the process of manufacture, notably by evaporation, desiccation, escape in the form of gas or dispersal in rinsing water.

3. The quantity of losses shall be the difference between the figure 100 and the sum of the quantities indicated in column 5 of the Annex.

Article 2

1. Where, at the time of application of the standard rates of yield provided for in Article 1, a Member State considers that, in specific cases, the conditions provided for in Article 12 of Directive 69/73/EEC, hereinafter referred to as the 'basic Directive', are not satisfied, the Member State shall inform the Commission, which shall notify the Committee for Customs Processing Arrangements without delay.

2. Each Member State shall communicate to the Commission the cases where the standard rates of yield provided for in this Directive could not be applied because, although the processing operations concerned goods listed in column 1 of the Annex, they resulted in the production of compensating products other than those referred to in columns 3 and 4 resulting from the same stage of manufacture.

These cases shall be examined by the Committee provided for in paragraph 1.

Article 3

Where entry for free circulation of part of the compensating products or intermediate products is authorized and the import duties are calculated in accordance with Article 17 (a) or the first indent of Article 17 (b) of the basic Directive, such duties shall be collected also on the basis of losses calculated for the products entered for free circulation. However, when the entry for free circulation concerns intermediate or compensating products which benefit from the taxation provided for in Article 18 of the basic Directive, that part of the losses corresponding to those products shall not be taken into account for the collection of import duties.

Article 4

Directive 79/608/EEC is hereby repealed.

Article 5

The Member States shall take the measures necessary to comply with this Directive by 1 October 1984.

They shall immediately inform the Commission, which shall communicate this information to the other Member States.

Article 6

This Directive is addressed to the Member States.

Done at Brussels, 26 July 1984.

For the Commission
Karl-Heinz NARJES
Member of the Commission

ANNEX

(1) The subheadings in this column correspond to those in the Common Customs Tariff. When further subdivision has been necessary this is shown in parentheses (). These subdivisions correspond to those used in the Regulations fixing export refunds.

(2) Hulled grains are grains corresponding to the definition given in the Annex to Regulation (EEC) No 821/68 (OJ No L 149, 29. 6. 1968, p. 46).

(3) Cereal meal with an ash content, referred to dry matter, of less than 0,95 % by weight and a rate of passage through a sieve with an aperture of 0,25 mm of less than 10 % by weight.

(4) Pearled grains are grains corresponding to the definition given in the Annex to Regulation (EEC) No 821/68 (OJ No L 149, 29. 6. 1968, p. 46).

(5) This concerns maize groats and meal:
— of which a percentage not exceeding 30 % by weight passes through a sieve with an aperture of 315 micrometers, or
— of which a percentage not exceeding 5 % by weight passes through a sieve with an aperture of 150 micrometers.

(6) For glucose in the form of white crystalline powder, a concentration other than 92 %, the quantity to be shown is 43,81 kilograms of D-glucitol anhydrate per 100 kilograms of maize.

(7) For glucose other than in the form of white crystalline powder, a concentration other than 82 % the quantity to be shown is 50,93 kilograms of D-glucitol anhydrate per 100 kilograms of maize.

(8) For D-glucitol of a concentration other than 70 % the quantity to be shown is 40,7 kilograms of D-glucitol per 100 kilograms of maize.

(9) For D-glucitol of a concentration other than 70 % the quantity to be shown is 46,1 kilograms of D-glucitol anhydrate per 100 kilograms of maize.

(10) For the application of the alternatives (a) to (f), the real results from the operations have to be taken into account.

(11) For the purposes of completing the arrangements, the quantity of broken rice obtained shall correspond to the quantity of broken rice as determined at the time of importation for processing of rice under subheading 10.06 B II b). In the case of polishing, this quantity shall be increased by 2 % of the imported rice excluding the broken rice as determined at importation.

(12) Pre-cooked rice is constituted by bleached rice in grains undergoing a pre-cooking and partial dehydration intended to facilitate final cooking.

(13) The double quantity of oleic acid contained in the untreated olive oil has to be deducted from the quantity of refined olive oil shown in column 5 and constitutes the quantity of acid oils from refining.

(14) Yield fixed for bakers' yeast with a content in the dry matter of 95 % obtained from beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar. For bakers' yeasts with a different content in the dry matter, the quantity to be shown is 22,4 kilograms of yeast anhydrate per 100 kilograms of beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar.

(15) Yield fixed for bakers' yeast content in the dry matter of 28 % obtained from beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar. For bakers' yeasts with a different content in the dry matter, the quantity to be shown is 22,4 kilograms of yeast anhydrate per 100 kilograms of beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar.
