ANNEX C
CONTRACT NOTICE - UTILITIES
EXCEPTIONS MADE TO THE USE OF EUROPEAN SPECIFICATIONS

Article 18(6) of Directive 93/38/EEC

WORKS ☐
SUPPLIES ☐
SERVICES ☐

Derogation from the obligation to define technical specifications by reference to European specifications was made because:

(for the detailed text see the Directive)

it is technically impossible to establish satisfactorily that the product conforms to the European specifications; ☐

the application of the obligation would prejudice the application of Council Directive 86/361/EEC of 24 July 1986 on the initial stage of the mutual recognition of type approval for telecommunications terminal equipment, or of Council Decision 87/95/EEC of 22 December 1986 on standardisation in the field of information technology and telecommunications; ☐

use of specifications would oblige the contracting entity to acquire supplies incompatible with equipment already in use or would entail disproportionate cost or disproportionate technical difficulty; ☐

the relevant European specification is inappropriate for the particular application or does not take account of technical developments which have come about since its adoption; ☐

the project is of a genuinely innovative nature for which use of European specifications would not be appropriate. ☐

- artistic ☐
- connected with protection of exclusive rights ☐

(d) Extreme urgency brought about by events unforeseeable by the contracting entity ☐

ANNEX II

CONTRACT AWARD NOTICE - UTILITIES

Exceptions made to the use of European specifications

Article 18(6) of Directive 93/38/EEC

WORKS ☐

SUPPLIES ☐

SERVICES ☐

Derogation from the obligation to define technical specifications by reference to European specifications was made because:

(for detailed text see the relevant article)

it is technically impossible to establish satisfactorily that the product conforms to the European specifications; ☐

the application of the obligation would prejudice the application of Council Directive 86/361/EEC of 24 July 1986 on the initial stage of the mutual recognition of type approval for telecommunications terminal equipment, or of Council Decision 87/95/EEC of 22 December 1986 on standardisation in the field of information technology and telecommunications; ☐

use of specifications would oblige the contracting entity to acquire supplies incompatible with equipment already in use or would entail disproportionate cost or disproportionate technical difficulty; ☐

the relevant European specification is inappropriate for the particular application or does not take account of technical developments which have come about since its adoption; ☐

the project is of a genuinely innovative nature for which use of European specifications would not be appropriate. ☐
