No L 124/6 Official Journal of the European Communities 8.6.70

REGULATION (EEC) No 1025/70 OF THE COUNCIL

of 25 May 1970

establishing common rules for imports from third countries

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 113 thereof;

Having regard to the instruments establishing common organisation of agricultural markets and to the instruments concerning processed agricultural products adopted in pursuance of Article 235 of the Treaty, in particular the provisions of those instruments which allow for derogation from the general principle that all quantitative restrictions or measures having equivalent effect may be replaced solely by the measures provided for in those same instruments;

Having regard to the proposal from the Commission;

Whereas, after the transitional period has ended, the common commercial policy must be based on uniform principles;

Whereas, to this end, the Council, by its Decision of 25 September 1962,[1] adopted a programme of action in matters of common commercial policy, one of the objectives of which is to standardise the import rules of the Member States in relation to third countries;

Whereas, to this end, the Council adopted on 10 December 1968 Regulation (EEC) No 2041/68[2] drawing up a common liberalisation list for products imported into the Community from third countries, and Regulation (EEC) No 2045/68[3] introducing a special procedure in respect of the importation of certain products from certain third countries; whereas those Regulations provide for such adaptation to be made to them as implementation of the common commercial policy requires;

Whereas the object of that adaptation must be the establishment of common rules for imports from third countries;

Whereas such common rules must have as a basis the common list of liberalised products drawn up under Regulation (EEC) No 2041/68 with a view to consolidating at Community level liberalisation measures taken by the Member States and extended by Regulations (EEC) Nos 1228/69[4] and 1827/69[5]; whereas this list may be extended by decision of the Council to include other products and other third countries;

Whereas the products contained in the common liberalisation list must not be subject to any quantitative restriction;

Whereas the Commission must, however, be informed by the Member States of any danger created by trends in imports which might call for protective measures;

Whereas it is essential that examination should take place at Community level, and within an advisory committee, of import terms and conditions, of import trends, of the various aspects of the economic and commercial situation, and of the measures, if any, to be taken;

Whereas it may become apparent from this examination that the Community should exercise surveillance over certain imports;

Whereas in such case the putting into free circulation of the products concerned should be made subject to production of an import document satisfying uniform criteria; whereas that document must, on declaration or on simple application by the importer, be issued or endorsed by the authorities of the Member States

[1] OJ No 90, 5.10.1962, p. 2353/62.
[2] OJ No L 303, 18.12.1968, p. 1.
[3] OJ No L 303, 18.12.1968, p. 43.

within a certain period, but without the importer thereby acquiring any right to import; whereas the document must therefore be valid only during such period as the import rules remain unchanged;

Whereas it is in the interest of the Community that the Member States and the Commission should make as full an exchange as possible of information resulting from surveillance;

Whereas it is for the Council to adopt the protective measures called for by the interests of the Community; whereas, to this end, the Commission should submit proposals to the Council which have regard for existing international obligations; whereas, therefore, protective measures against a country which is a contracting party to the GATT may be considered only if the product in question is imported into the Community in such greatly increased quantities and on such terms or conditions as to cause, or threaten to cause, substantial injury to Community producers of like or directly competing products, unless international obligations permit derogation from this rule;

Whereas experience has shown that trade practices may in certain cases call for a more expeditious protective procedure; whereas the Community must therefore be able to provide appropriate protection until such time as a decision taken by the Council enters into force;

Whereas a speedier procedure than normal should therefore be provided for as a safeguard against unforeseen practices; whereas the need for rapid and effective action makes it justifiable for the Commission to be empowered, without prejudice to the subsequent position of the Council, to adopt emergency measures;

Whereas Member States should be empowered, in certain circumstances and provided that their actions are on an interim basis only, to take protective measures individually;

HAS ADOPTED THIS REGULATION:

TITLE I

General principles

Article 1

Importation into the Community of the products listed in Annex I shall be free in relation to the third countries listed in Annex II, that is to say not subject to any quantitative restriction.

Article 2

The Council may, acting by a qualified majority on a proposal from the Commission, resolve that the list in Annex I be extended to include further products or that the list in Annex II be extended to include other third countries, if it considers that such action is not liable to create a situation where the application of protective measures would be justified.

TITLE II

Community information and consultation procedure

Article 3

1. Member States shall notify the Commission of any danger resulting from trends in imports which appear to call for protective measures.

2. The Commission shall inform the other Member States forthwith.

Article 4

Consultations may be held, either at the request of a Member State or on the initiative of the Commission. They shall take place within eight working days following receipt by the Commission of the notification provided for in Article 3 and, in any event, before the introduction of any measure of surveillance or protective measure taken under Articles 7 to 11.

Article 5

1. Consultation shall take place within an advisory committee (hereinafter called the 'Committee'), which shall consist of representatives of each Member State with a representative of the Commission as Chairman.

2. The Committee shall meet when convened by its Chairman. He shall provide the Member States, as promptly as possible, with all relevant information.

3. Consultation shall in particular cover:

(a) terms and conditions of importation, import trends, and the various aspects of the economic and commercial situation as regards the product in question;

(b) the measures, if any, to be adopted.

Article 6

1. In order to enable the Commission to assess the economic and commercial situation as regards a particular product, Member States shall, on request and in such form and manner as the Commission shall determine, supply the latter with information concerning developments on the market in that product.

2. The Commission shall inform the other Member States.

TITLE III

Surveillance

Article 7

1. Where developments on the market in respect of a product imported from a third country listed in Annex II threaten to cause injury to Community producers of like or directly competing products and the interests of the Community so require, importation of that product may be made subject to surveillance by the Community.

2. Where the decision to impose surveillance is taken simultaneously with the inclusion of the product in the list in Annex I, that decision shall be taken by the Council, acting by a qualified majority on a proposal from the Commission. In all other cases, it shall be taken by the Commission and Article 10 (5) shall apply.

Article 8

1. Products under surveillance may be put into free circulation only on production of an import document. Such document shall be issued or endorsed by Member States within a maximum of five working days following submission of a declaration or an application by the importer, which, subject to any provision to the contrary made when surveillance was imposed and under the procedure there followed, must give:

(a) the name and address of the importer;

(b) a description of the product with the following particulars:
- commercial description;
- tariff heading, or reference number, of the product in the goods nomenclature used for foreign trade purposes by the country concerned;
- country of origin;
- exporting country;

(c) the c.i.f. price free-at-frontier and the quantity of the product in units customarily used in the trade in question;

(d) the proposed date or dates of importation.

Member States may require further particulars.

2. Import documents may be used only for such time as arrangements for the liberalisation of imports remain in force in respect of the transactions concerned and in any event not beyond the expiry of a period laid down, with regard for the nature of the products and other special features of the transactions, at the same time, and by means of the same procedure, as the imposition of surveillance.

3. The provisions of paragraph 1 shall not preclude the putting into free circulation of the product in question if the unit price at which the transaction is effected exceeds that indicated in the import document, or if the total value or quantity of the products to be imported exceeds the value or quantity given in the import document by less than 5%. The Commission, having heard the opinions expressed in the Committee and taking account of the nature of the products and other special features of the transactions concerned, may fix a different percentage, which, however, should not normally exceed 10%.

Article 9

1. Within the first ten days of each month, Member States shall communicate to the Commission:

(a) details of the sums of money (calculated on the basis of c.i.f. prices) and quantities of goods in respect of which import documents within the meaning of Article 8 were issued or endorsed during the preceding month;

(b) details of imports during the month preceding the month referred to in subparagraph (a) of this paragraph.

The information supplied by Member States shall be broken down by product and by exporting country.

2. Where the interests of the Community call for a special check to be kept on imports under surveillance, the Commission may, at the request of a Member State or on its own initiative, alter the intervals at which information is to be supplied.

3. The Commission shall inform the Member States.

TITLE IV

Protective measures

Article 10

1. Where a product is imported into the Community in such greatly increased quantities and/or on such terms or conditions as to cause, or threaten to cause, substantial injury to Community producers of like or directly competing products, and where a critical situation, in which any delay would cause injury which it would be difficult to remedy, calls for immediate intervention in order to safeguard the interests of the Community, the Commission may, acting at the request of a Member State or on its own initiative:

(a) limit the period of validity of import documents within the meaning of Article 8 subsequently issued or endorsed;

(b) alter the import rules for that product by providing that it may be put into free circulation only on production of an import authorisation, the granting of which shall be governed by such provisions and subject to such limits as the Commission shall lay down pending action by the Council under Article 11.

2. Such measures shall take effect immediately.

3. The measures may be limited to imports intended for certain regions of the Community. They shall not affect products already on their way to the Community, provided that the destination of such products cannot be changed and that those products which under Articles 7 and 8 may be put into free circulation only on production of an import document are accompanied by such document.

4. Where intervention by the Commission has been requested by a Member State, the Commission shall take a decision within a maximum of five working days of receipt of such request.

5. Any decision taken by the Commission under this Article shall be communicated to the Council and to the Member States. Any Member State may, within ten working days following the day of communication, refer such decision to the Council. The Council may, acting by a qualified majority, decide differently.

6. Within ten working days of the entry into force of any measure taken under paragraph 1 (b), the Commission shall make a proposal to the Council on appropriate measures as provided for in Article 11. If, after the expiry of six weeks following the entry into force of any measure taken by the Commission, the Council has not taken a decision on that proposal, the measure in question shall be deemed revoked.

Article 11

1. Where the interests of the Community so require, the Council may, acting by a qualified majority on a proposal from the Commission, adopt appropriate measures:

(a) to prevent a product being imported into the Community in such greatly increased quantities and/or on such terms or conditions as to cause, or threaten to cause, substantial injury to Community producers of like or directly competing products;

(b) to allow international undertakings entered into by the Community or by all the Member States to be fulfilled, in particular those relating to trade in primary products.

2. Such measures may be limited to imports intended for certain regions of the Community. They shall not affect products already on their way to the Community, provided that the destination of such products cannot be changed and that those products which under Articles 7 and 8 may be put into free circulation only on production of an import document are accompanied by such document.

3. Where the establishment of a quota constitutes a retreat from liberalisation, regard shall be had in particular to:

— the desirability of maintaining, as far as possible, traditional trade flows;

— the volume of goods exported under contracts concluded on normal terms and conditions before the entry into force of a protective measure within the meaning of this Title, where such contracts have been notified to the Commission by the Member State concerned;

— the need to avoid jeopardising achievement of the aim pursued in establishing the quota.

Article 12

1. In the following cases a Member State may, as an interim protective measure, alter the import rules for a particular product by providing that it may be put into free circulation only on production of an import authorisation, the granting of which shall be governed by such provisions and subject to such limits as that Member State shall lay down:

(a) where there exists in its territory a situation such as that defined as regards the Community in Article 10 (1);

(b) where such measure is justified by a protective clause contained in a bilateral agreement between the Member State and a third country.

2. The Member State shall take the measure after hearing the opinions expressed in the Committee or, where urgency precludes such a procedure, after notifying the Commission. The latter shall advise the other Member States.

3. The Commission shall be notified by telex of the measure immediately following its adoption.

4. Where the measure has been taken for the reason set out in paragraph 1 (a), notification of that measure shall be equivalent to a request within the meaning of Article 10 (4). The measure shall operate only until the coming into operation of the decision taken by the Commission. But where the Commission decides not to introduce any measure under Article 10, its decision shall apply as from the sixth day following its entry into force, unless the Member State which has taken the measure refers the decision to the Council; in that case, the national measure shall continue to operate until the entry into force of the decision taken by the Council, but in no case beyond the expiry of a period of one month following referral of the matter to the latter. The Council shall take a decision before the expiry of that period.

5. Where the measure has been taken for the reason referred to in paragraph 1 (b), the Commission may propose to the Council the measures which should be taken. The national measure shall continue to operate until the entry into force of the decision taken by the Council, but in no case beyond the expiry of a period of two months following referral of the matter to the latter, unless the Council, acting on a proposal from the Commission, resolves otherwise in order, in particular, to take account of interests at stake in Community negotiations. The Council shall take a decision within two months following referral of the matter to it.

6. The provisions of paragraphs 1 to 4 shall apply until 31 December 1972. Before that date, the Council shall, acting by a qualified majority on a proposal from the Commission, decide on the adjustments to be made thereto.

Article 13

1. While any measure referred to in Article 7 or in Articles 10 to 12 is in operation, consultations within the Committee shall be held, either at the request of a Member State or on the initiative of the Commission. The purpose of such consultations shall be:

(a) to examine the effects of the measure;

(b) to ascertain whether the conditions for its application are still satisfied.

2. Where the Commission considers that any measure referred to in Articles 7, 10 or 11 should be revoked or amended it shall proceed as follows:

(a) where the Council has taken no decision on a measure taken by the Commission, the latter shall amend or revoke such measure forthwith and shall immediately deliver a report to the Council;

(b) in all other cases, the Commission shall propose to the Council that the measures adopted by the Council be revoked or amended. The Council shall act by a qualified majority.

TITLE V

Transitional and final provisions

Article 14

1. By 31 December 1971 at the latest, the Council shall, acting by a qualified majority on a proposal from the Commission, decide on the adjustments to be made to this Regulation for the purpose in particular of introducing a Community import document valid throughout the Community.

2. Until such time:

— any Member State may refuse to issue or endorse import documents within the meaning of Article 8 in respect of persons not established in its territory. This provision shall be without prejudice to obligations arising under Directives concerning freedom of establishment and freedom to provide services;

— import documents within the meaning of Article 8 shall be valid only in the Member State which issued or endorsed them.

Article 15

This Regulation shall not, pending introduction of a common commercial policy covering such matters, preclude the continuance of measures taken by Italy pursuant to the *Decreto ministeriale* of 31 October 1962, including the list annexed thereto *(Tabella A import.)*, and its subsequent amendments, making subject to special authorisation the importation of articles, machinery, equipment and vehicles, whether used or new but in poorly maintained condition, falling within heading No 73.24, Chapters 84 to 87 and 93 or sub-heading No 97.04 B of the Common Customs Tariff.

Article 16

Without prejudice to other Community provisions, this Regulation shall not preclude the adoption or application by a Member State of prohibitions or quantitative restrictions on imports on grounds of public morality, public policy or public security; the protection of health and life of humans, animals or plants; the protection of national treasures possessing artistic, historic or archaeological value; or the protection of industrial and commercial property.

Article 17

1. This Regulation shall be without prejudice to the operation of the instruments establishing common organisation of agricultural markets, or of the special instruments adopted under Article 235 of the Treaty for processed agricultural products; it shall operate by way of complement to those instruments.

2. However, in the case of products covered by such instruments, the provisions of Articles 7 to 9 shall not apply to those in respect of which the Community rules on trade with third countries require the production of a licence or other import document; and the provisions of Articles 10 and 12 shall not apply to those in respect of which such rules make provision for the application of quantitative import restrictions.

Article 18

Regulations (EEC) Nos 2041/68 and 2045/68 are hereby repealed.

Article 19

This Regulation shall enter into force on the third day following its publication in the *Official Journal of the European Communities*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 25 May 1970.
