11.6.70 Official Journal of the European Communities No L 127/25

REGULATION (EEC) No 1092/70 OF THE COMMISSION

of 10 June 1970

supplementing Regulation (EEC) No 1403/69 as regards the denaturing of common wheat and rye of bread-making quality with fish oil

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community;

Having regard to Council Regulation No 120/67/EEC[1] of 13 June 1967 on the common organisation of the market in cereals, as last amended by Regulation (EEC) No 2463/69,[2] and in particular Article 7 (5) thereof;

Whereas the third paragraph of Article 1 of Commission Regulation (EEC) No 1403/69[3] of 18 July 1969 laying down detailed rules for the application of the provisions concerning denaturing of common wheat and rye of bread-making quality, as last amended by Regulation (EEC) No 849/70,[4] provided that in the case of denaturing otherwise than by colouring the method used must be at least as reliable as the standard method;

Whereas denaturing with fish oil or fish liver is the method used for a substantial proportion of denatured products; whereas certain fish oils or fish livers may not be effective, so that denaturing by that method should be authorised only with oils which are effective for the purpose and whereas the characteristics of that method should be determined;

Whereas the measures provided for in this Regulation are in accordance with the Opinion of the Management Committee for Cereals;

HAS ADOPTED THIS REGULATION:

Article 1

The following shall be added to the third paragraph of Article 1 of Regulation No 1403/69:

'In particular, denaturing with fish oil or fish liver must satisfy the requirements laid down in Annex II.'

Article 2

The following Annex II shall be added to Regulation (EEC) No 1403/69:

'*ANNEX II*

(a) Fish oil or fish liver, filtered, not deodorised, not decolourised, with no additives

(b) Characteristics:

Minimum iodine content 120

Colour content 7—14 Gartner
or 5—19 (FAC)

Acidity between 3% and 4%

Maximum point of solidification 10° C

(c) Minimum quantity to be used per metric ton of cereal to be denatured: 4 kg.'

Article 3

This Regulation shall apply from 1 August 1970.
