Whereas Article 3 of Regulation (EEC) No 922/72 states that Member States are to introduce a control ensuring that the product for which aid is requested meets the requirements for the granting thereof; whereas, consequently, applications for aid submitted by rearers must include the minimum of information necessary for this control;

Whereas uniform conditions for the payment of the amount of the aid should be laid down;

Whereas Member States are authorized to grant aid solely to rearers who have obtained their boxes of eggs from an approved body and who have delivered to an approved body the cocoons produced; whereas for the purposes of the proper application of the system of aid, the conditions for the approval of such bodies should be defined;

Whereas, in this particular case, in order to ensure the effectiveness of the control system referred to above, applications for aid should be accompanied by accompanied issued by those bodies and should be checked by Member States;
