# REGULATION (EEC) No 1721/73 OF THE COMMISSION

## of 28 June 1973

## amending Regulation No 470/67/EEC as regards the varieties of paddy rice to be taken over by intervention agencies

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community ;

Having regard to Council Regulation No 359/67/EEC (1) of 25 July 1967 on the common organization of the market in rice, as last amended by the Act (2) annexed to the Treaty concerning the Accession of new Member States to the European Economic Community and to the European Atomic Energy Community, signed at Brussels on 22 January 1972, and in particular Article 5 (5) thereof ;

Whereas it has become apparent that certain varieties of rice which are listed in the Annexes to Commission Regulation No 470/67/EEC (3) of 21 August 1967 on the taking over of paddy rice by intervention agencies, and fixing the corrective amounts, price increases and reductions applied by them, as last amended by Regulation (EEC) No 1610/71 (4), now represent only a negligible proportion of the Community harvest ; whereas there does not seem to be any purpose in continuing to refer to such varieties ;

Whereas experience in recent marketing years has shown that the quality and yield of the variety Ringo have improved ; whereas a falling-off in the characteristics and quality of the variety Rizzotto has been noted ; whereas those varieties should, therefore, be reclassified according to the qualities which they actually possess ;

Whereas new varieties of rice which do not appear in the lists of Community varieties given in Regulation No 470/67/EEC are now being produced in the Community ; whereas those varieties should, therefore, be added thereto, taking into consideration the basic yields currently being obtained and any real difference in quality as compared with the varieties at present listed in that Regulation ;

Whereas the 58 % basic yield in whole grains after processing which is set for the variety Delta (or INRA 68/2 in the second table of Annex III to Regulation No 470/67/EEC) has proved higher than the average yield in whole grains actually obtained from that variety ; whereas the yield requirement for intervention should therefore be lowered from 58 to 55 % ;

Whereas the measures provided for in this Regulation are in accordance with the Opinion of the Management Committee for Cereals ;

HAS ADOPTED THIS REGULATION :
