REGULATION (EEC) No 1927/73 OF THE COUNCIL

of 16 July 1973

determining for the 1973/74 marketing year the principal marketing centres for cereals and the derived intervention prices applicable at those centres and the single intervention price for maize, for durum wheat and for rye respectively

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community;

Having regard to the Treaty [1] concerning the Accession of new Member States to the European Economic Community and the European Atomic Energy Community, and in particular the first subparagraph of Article 52 (3) of the Act annexed thereto;

Having regard to Council Regulation No 120/67/EEC [2] of 13 June 1967 on the common organization of the market in cereals, as last amended by Regulation (EEC) No 1346/73 [3], and in particular Article 4 (4) thereof;

Having regard to the proposal from the Commission;

Having regard to the Opinion of the European Parliament;

Whereas, pursuant to Council Regulation No 131/67/EEC [4] of 13 June 1967 laying down rules for deriving intervention prices and for determining certain marketing centres for cereals, as last amended by Regulation (EEC) No 1205/69 [5], derived intervention prices for marketing centres of appreciable importance on the regional level must be fixed in line with the basic intervention price, taking into account natural price formation on the market and transport costs;

Whereas the prices for cereals for the marketing year 1973/74, determined on the basis of and at the same time as the common prices, under Article 52 (2) (a) of the Act of Accession, be aligned in each new Member State with the common prices, whereas, since the alterations in prices which this would entail for the United Kingdom would hinder the process of integration into the Community, the derogation provided for in paragraph 3 of that Article should be applied;

Whereas, experience in the last marketing year has shown that there is no need to change the procedure for deriving intervention prices; whereas, consequently, it is not necessary to alter the principal marketing centres for the 1972/73 marketing year in Annex A and B to Regulation (EEC) No 1406/72 [6]; whereas, however, the intervention prices applicable at those centres should be altered, in particular in view of the increase in basic intervention prices fixed for the 1973/74 marketing year by Regulation (EEC) No 1347/73 [7];

Whereas, pursuant to Article 4 (2) of Regulation No 120/67/EEC, a single intervention price only should be fixed for durum wheat, maize and rye respectively; whereas these prices will be valid for all the marketing centres which are subsequently determined for each of these cereals;

HAS ADOPTED THIS REGULATION:

Article 1

For the 1973/74 marketing year for cereals:

— the marketing centre having the lowest derived intervention price for each Member State and the price in question, are determined in Annex A;

— the principal marketing centres and derived intervention prices for these centres are determined in Annex B;

— the single intervention price for durum wheat shall be 118·10 units of account per 1 000 kilogrammes;

— the single intervention price for maize shall be 84·08 units of account per 1 000 kilogrammes;

— the single intervention price for rye shall be 97·92 units of account per 1 000 kilogrammes.

Article 2

This Regulation shall enter into force on the third day following its publication in the *Official Journal of the European Communities.*

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 16 July 1973.

For the Council
The President
Ib FREDERIKSEN
