REGULATION (EEC) No 3042/74 OF THE COUNCIL

of 18 November 1974

on the tariff treatment of certain products intended for use in the construction, maintenance and repair of aircraft

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 28 thereof;

Having regard to the draft Regulation submitted by the Commission;

Whereas Council Regulation (EEC) No 3584/73 [1] of 28 December 1973 on the tariff treatment of certain products intended for use in the construction, maintenance and repair of aircraft, provides for the total or partial suspension, as the case may be, of the duties laid down in the Common Customs Tariff for a certain number of products which are intended either to be incorporated in the construction of aeroplanes of an unladen weight exceeding 15 000 kg or used for the maintenance or repair of aeroplanes of an unladen weight exceeding 15 000 kg or for aeroplanes or helicopters of an unladen weight exceeding 2 000 kg but not exceeding 15 000 kg; whereas these provisions have been supplemented by Council Regulation (EEC) No 1522/74 of 17 June 1974 [2] on the tariff treatment of certain products intended for use in the maintenance and repair of aeroplanes of the types 'Mercure' and 'Airbus' during 1974;

Whereas the whole of these suspension measures will expire on 31 December 1974;

Whereas, having regard to the technical requirements associated with the design of aeroplanes currently constructed in the Community, the suspension measures to be laid down from 1 January 1975 in respect of products intended for the construction of aeroplanes of an unladen weight exceeding 15 000 kg should be differentiated according to the type to which the aeroplanes under consideration belong, in order to take account, in each case, of the capabilities of the Community industry;

Whereas, in order to give full effect to the principles laid down for suspension of Common Customs Tariff duties in respect of certain products intended for the construction of aeroplanes of an unladen weight exceeding 15 000 kg, it is equally necessary likewise to establish a list of products admissible to suspension of customs duties for the maintenance or the repair of aeroplanes of that kind constructed in the Community; whereas, provided account is taken of the current capacities of the Community industry, the arrangements should be continued whereby users of aircraft of an unladen weight exceeding 15 000 kg constructed in third countries or of which the previous construction in the Community has required a considerable quantity of products imported from third countries, may obtain supplies of products necessary for the maintenance or repair of such aircraft under suspension of Common Customs Tariff duties;

Whereas it seems equally acceptable to keep in force the suspension measures currently laid down in respect of products intended for the maintenance or repair of aeroplanes and helicopters of an unladen weight exceeding 2 000 kg but not exceeding 15 000 kg;

Whereas provision should be made for the adaptation, in the light of advances in the technical capabilities of the Community aircraft industry and Community aircraft equipment industries, of the arrangements to be made concerning the application of the Common Customs Tariff to products imported from third countries for use in the construction, maintenance or repair of aircraft; whereas such adaptation could involve a review of arrangements in force at relatively short intervals; whereas it is therefore necessary to limit the period of application of this Regulation to one year,

[1] OJ No L 365, 31. 12. 1973, p. 3.
[2] OJ No L 164, 20. 6. 1974, p. 1.

HAS ADOPTED THIS REGULATION:

Article 1

1. The Common Customs Tariff duties on the products listed in Annex I shall be suspended to the levels indicated in column 3 thereof provided the said products are intended to be incorporated, under customs control, in the construction of aeroplanes of an unladen weight exceeding 15 000 kg as individually listed in column 4 of the said Annex.

2. This Article shall also apply to the same products intended for the manufacture, under customs control, of parts necessary for the construction of the aircraft concerned.

Article 2

1. The Common Customs Tariff duties on the products listed in Annex II shall be suspended to the level indicated in column 3 or 4 thereof, as the case may be, provided such products are intended to be used, under customs control, for the maintenance or repair of aeroplanes of an unladen weight exceeding 15 000 kg comprised in one or other of the categories specified in that Annex and, in respect of those in category B, in so far as the maintenance or repair relates to aeroplanes listed in column 5 of that Annex.

2. However, in the case of products falling within heading Nos 85.15, 85.22, 90.14, 90.28 and 90.29 of the Common Customs Tariff and indicated by a (1), paragraph 1 shall apply only where such products are intended for the maintenance or repair of aeroplanes of a type certified for the first time in a Member State of the Community before 1 January 1973 and either constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.

Article 3

1. The Common Customs Tariff duties on the products listed in Annex III shall, provided such products are intended to be used under customs control for the maintenance or repair of aeroplanes or helicopters of an unladen weight exceeding 2 000 kg but not exceeding 15 000 kg, be suspended to the levels indicated in column 3 of the said Annex.

2. However, in the case of products falling within heading Nos 85.15 and 90.14 of the Common Customs Tariff and indicated by a (1), paragraph 1 shall apply only where such products are intended for the maintenance or repair of aeroplanes or helicopters of a type certified for the first time in a Member State of the Community before 1 January 1973 and either constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.

Article 4

For the purposes of Article 2 (2) and Article 3 (2), type of aeroplane or helicopter shall be taken to mean the prototype of that aeroplane or helicopter and versions derived directly from that prototype, except versions which differ fundamentally from the prototype.

Article 5

This Regulation shall enter into force on 1 January 1975.

It shall apply until 31 December 1975.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 18 November 1974.

For the Council

The President

Ch. BONNET
