— *obtained from grape must or wine, which must come from vine varieties approved in the third country of origin for the production of liqueur wine and have a minimum natural alcoholic strength if 12°:*

— *by freezing, or*

— *by the addition during or after fermentation*

(i) of a product derived from the distillation of wine, or

CHAPTER 73

Notes

1.

(n) Sheets and plates (heading No 73.13):

Rolled products (other than coils for re-rolling as defined in paragraph (k) above) of any thickness and, if in rectangles, of a width exceeding 500 mm.

(ECSC) Such products include the special category of 'electrical sheets and plates' which under a current of 50 cps and a magnetic flux of 1 testa have a watt-loss per kg, calculated by the Epstein method of:

— 2·1 watts or less, when their thickness does not exceed 0·20 mm;

— 3·6 watts or less, when their thickness is not less than 0·20 mm but less than 0·60 mm;

— 6 watts or less, when their thickness is not less than 0·60 mm but not greater than 1·50 mm.

Heading No 73.13 is to be taken to apply, *inter alia*, to sheets or plates which have been cut to non-rectangular shape, perforated, corrugated, channelled, ribbed, polished or coated, provided that they do not thereby assume the character of articles or of products falling within other headings.

(ECSC) For the purposes of applying subheadings, sheets and plates corrugated by any process shall be treated as flat sheets and plates.
