COMMISSION REGULATION (EEC) No 1532/78

of 30 June 1978

fixing, for the 1978/79 marketing year, the reference prices for apples

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 1035/72 of 18 May 1972 on the common organization of the market in fruit and vegetables (1), as last amended by Regulation (EEC) No 1154/78 (2), and in particular Article 27 (1) thereof,

Whereas, pursuant to Article 23 (1) of Regulation (EEC) No 1035/72, reference prices valid for the whole Community are to be fixed before the beginning of each marketing year;

Whereas apples are produced in such quantities in the Community that reference prices should be fixed for them;

Whereas apples harvested during a given crop year are marketed from July of one year to June of the following year; whereas reference prices should therefore be fixed for the period from 1 July up to and including 30 June of the following year;

Whereas, pursuant to Article 23 (2) of Regulation (EEC) No 1035/72, the reference prices are fixed on the basis of the arithmetic mean of producer prices in each Member State plus an amount representing the cost of transporting Community products from the production areas to Community marketing centres; whereas the trend of production costs in the fruit and vegetables sector must also be taken into account;

Whereas since the varieties of apples are not all comparable as regards estimation of their commercial value, these varieties should be classified in three groups;

Whereas to take seasonal variations into account, the year should be divided into several periods and a reference price fixed for each of these periods;

Whereas producer prices are to correspond to the average of the prices recorded on the representative market or markets situated in the production areas where prices are lowest, during the three years prior to the date on which the reference price is fixed, for a home-grown product with defined commercial characteristics being a product or variety representing a substantial proportion of the production marketed over the year or over part thereof and satisfying specified requirements as regards market preparation; whereas, when the average of prices recorded on each representative market is being calculated, prices which could be considered excessively high or excessively low in relation to normal price fluctuations on that market are to be disregarded;

Whereas, for the purpose of calculating the entry prices, the varieties imported from third countries of which the entry prices are to be compared with the prices fixed for Groups I, II and III respectively should be specified;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Fruit and Vegetables,

HAS ADOPTED THIS REGULATION:

Article 1
