COMMISSION REGULATION (EEC) No 2142/79

of 28 September 1979

fixing the components used to calculate the differential amounts for colza and rape seed

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation No 136/66/EEC of 22 September 1966 on the establishment of a common organization of the market in oils and fats (1), as last amended by Regulation (EEC) No 590/79 (2),

Having regard to Council Regulation (EEC) No 878/77 of 26 April 1977 on the exchange rates to be applied in agriculture (3), as last amended by Regulation (EEC) No 2139/79 (4),

Having regard to Council Regulation (EEC) No 1569/72 of 20 July 1972 laying down special measures for colza and rape seed (5), as last amended by Regulation (EEC) No 852/78 (6), and in particular Article 2 (2) thereof,

Whereas Article 2 (1) (a) of Regulation (EEC) No 1569/72 provides that the differential amounts for those Member States which keep their exchange rates at any given moment within a band of 2·25 % must be determined by taking into account the incidence on prices of the percentage difference between:

— the conversion rate used for the purposes of the common agricultural policy, and

— the conversion rate resulting from the central rate;

Whereas this leads to the fixing of differential amounts which remain constant as long as the information used to calculate them remains unchanged;

Whereas, following the adjustments to the central rates made under the European Monetary System and the alterations to the representative rates, the rules provided for in Regulation (EEC) No 1569/72 mean that the components used to calculate the differential amounts for Germany, the Benelux countries and France are altered;

Whereas, applying the method of calculating differential amounts to Denmark, no such amounts should be fixed for seeds harvested therein and processed therein or exported therefrom;

Whereas under Article 2 (1) (b) of the aforementioned Regulation the differential amounts for Italy and the United Kingdom are to be determined by taking into account the incidence on the price of the average percentage difference between:

— the ratio between the conversion rate used for purposes of the common agricultural policy for the currency of the relevant Member State and the actual parity of each of the currencies of the Member States which keep their exchange rates at any given moment within a band of 2·25 %, and

— the spot market rate recorded over a given period for the currency of the relevant Member State against each of the currencies of the Member States specified above;

Whereas Regulation (EEC) No 2300/73 (7), as last amended by Commission Regulation (EEC) No 1234/77 (8), lays down detailed rules for the application of Regulation (EEC) No 1569/72;

Whereas, for the Italian lira and the pound sterling, the differential components should be calculated from the spot market rates recorded during the reference period 22 to 28 August 1979 in the case of the Italian lira and 19 to 25 September 1979 in the case of the

pound sterling in order to avoid any variations in treatment between the different sectors;

Whereas it follows from applying the detailed rules set out above that the components used to calculate the differential amounts should be as set out in the Annex hereto;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Oils and Fats,

HAS ADOPTED THIS REGULATION:

Article 1

The components used to calculate the differential amounts provided for in Article 1 of Regulation (EEC) No 1569/72 shall be as set out in the Annex hereto.

Article 2

This Regulation shall enter into force on 1 October 1979.

This Regulation shall be binding in its entirety and directly applicable in all Member States.
