EXPLANATORY NOTES AND INSTRUCTIONS ON THE COMPLETION OF APPLICATIONS

Preliminary remarks

Regulation (EEC) No 1679/81 is designed to specify as precisely as possible the information which the Commission needs in order to decide on the applications for aid according to the conditions and criteria laid down in Regulation (EEC) No 458/80.

In view of the multitude of situations arising, it is obviously impossible to provide for all the details of each individual case.

There will, therefore, be cases where certain information is not available or does not fully explain a particular situation. In these cases, the reasons why it is impossible to give a reply to certain questions should be given on a separate sheet. The applicant may also attach supplementary explanations if he considers it necessary in order to explain fully the details of his situation or application.

ANNEX B

1. **Brief description of the collective project for the restructuring of vineyards** (maximum one page).

Indicate in particular the location and the total area under vines concerned by the measures (henceforth referred to as the restructuring perimeters) for example a cooperative vineyard, or the vineyard situated on the territory of one or several communes, etc., and the exact area of the zones and perimeters which will be restructured, that is to say, replanted or possibly affected by new planting.

It is emphasized that a project may include new planting if it is technically necessary, but such new planting may not exceed 10 % of the total replanted and newly planted area of the project.

It is also emphasized that a collective project for restructuring vineyards producing table wines must involve at least 100 hectares of vineyards in accordance with a restructuring scheme covering the whole area of vineyards restructured and must be comprised of blocks of land under a single tenant having an area of at least two hectares.

In cases where natural conditions do not readily allow the establishment of blocks of the minimum size of two hectares, the area of replanting or new planting which does not fulfil this requirement must not exceed 10 % of the total area replanted or newly planted.

The method of calculation of these 10 % limits shall be as follows:

— If a block of two hectares pre-dating the project includes 1·5 hectares already planted in accordance with the controlling scheme and if the project comprises the replanting of 0·5 hectares according to the specifications in the scheme; these 0·5 hectares will not be taken into account in the 10 % limit, because their use will lead to the achievement of the aim of the scheme, that is to say, the creation of a block of restructured vineyards of at least two hectares.

— If a block of two hectares or under is not already planted in accordance with the controlling scheme and the project comprises the replanting of one hectare in accordance with the scheme, then this hectare will be included in the calculation of the 10 % limit because the principle of the creation of a restructured block of at least two hectares will not have been respected.

2.2. Relationship between the applicant and the collective restructuring project.
