COMMISSION REGULATION (EEC) No 2290/82

of 19 August 1982

laying down detailed rules for the application of the additional measures applicable to holders of long-term storage contracts for table wine for the 1981/82 wine-growing year

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 337/79 of 5 February 1979 on the common organization of the market in wine (1), as last amended by Regulation (EEC) No 2144/82 (2), and in particular Articles 12a (5) and 65 thereof,

Having regard to Council Regulation (EEC) No 878/77 of 26 April 1977 on the exchange rates to be applied in agriculture (3), as last amended by Regulation (EEC) No 1668/82 (4), and in particular Article 5 thereof,

Whereas the measures employed to support the wine market have not altogether yielded the desired results; whereas, in particular, the representative prices for table wines of types A I, R I and R II have remained lower than the respective activating prices since the beginning of the wine-growing year; whereas therefore the first condition required under Article 12a (1) of Regulation (EEC) No 337/79 for the adoption of additional measures applicable to holders of long-term storage contracts is satisfied; whereas the second condition, namely that the representative price should remain lower than the activating price for three consecutive weeks, is likely to be fulfilled for table wines of types A I, R I and R II during the reference period;

Whereas these measures should provide for the possibility of removing from the market by distillation a certain quantity of wine and for the possibility of delaying for several months the marketing of the remaining quantity held by holders of long-term storage contracts, in anticipation of a recovery of the market; whereas, however, this latter measure might not achieve the desired objective; whereas provision for any further measures which may be necessary should therefore be made;

Whereas the distillation provided for by this Regulation should take place in accordance with the provisions of Council Regulation (EEC) No 2852/81 (5), as amended by Regulation (EEC) No 2009/82 (6), whereas, pursuant to Articles 2, 3 and 10 of that Regulation, time limits should be fixed for the submission of applications for approval of supply contracts and declarations, for approval by the intervention agencies and for the distillation operations; whereas Article 4 of that Regulation specifies that the amount of the aid to be paid is to be fixed so as to enable the products obtained to be disposed of;

Whereas additional information which should appear in the supply contract and in the declaration should also be specified;

Whereas in the wine sector all intervention measures are applied in Greece at the same price levels as in the other Member States; whereas, in this case, any deflection of trade seems unlikely because of Greece's limited distillation capacity and the lack of trade flows towards that country of wine for distillation; whereas, in order to ensure uniform application of the intervention measures throughout the Community, prices and amounts should therefore be fixed in respect of distillation operations carried out in Greece on the basis of the guide prices applicable to the Community of Nine;

Whereas Article 5 of Regulation (EEC) No 2852/81 provides that the aid is to be paid within a time limit so as to enable recipients to receive the full amount of the aid quickly; whereas it should therefore be provided that such payment is to be made not later than 90 days after distillation;

Whereas Article 5 (4) of Regulation (EEC) No 2852/81 introduced a system of securities with a view to bringing forward the payment of aid while guaranteeing intervention agencies against the risk of undue payment; whereas, therefore, the time limits for advance payment should be specified as well as the time limits and procedures for releasing the security;

Whereas technical conditions for the approval of distillers should be laid down;

Whereas the intervention agencies referred to in Article 16 of Regulation (EEC) No 2852/81 and the Commission should be informed of the progress of

(1) OJ No L 54, 5. 3. 1979, p. 1.
(2) OJ No L 227, 3. 8. 1982, p. 1.

(4) OJ No L 184, 29. 6. 1982, p. 19.

distillation operations and should in particular be aware of the quantities of wine distilled and the quantities of alcohol obtained;

Whereas in order to achieve the objective envisaged, storage contracts should be concluded in accordance with Commission Regulation (EEC) No 2600/79 of 23 November 1979 on storage contracts for table wine, grape must and concentrated grape must [1], as last amended by Regulation (EEC) No 3632/81 [2];

Whereas during the storage period there is a natural alteration in the volatile acidity of the wine which might exceed the limit provided for in Commission Regulation (EEC) No 3633/81 [3], which was laid down with a storage period of nine months in view; whereas it seems appropriate to permit that, when a storage contract is concluded for four months, and provided the wine covered by the new contract is the same as the wine covered by the previous contract, the wine should be considered to have fulfilled the required conditions even if the volatile acidity content is higher than that laid down by the said Regulation, provided that the limit laid down for table wine of the type in question has not been exceeded, and that all other administrative and technical conditions are complied; to allow for market developments, it should be possible to terminate contracts;

Whereas the application of the measures provided for in this Regulation extends beyond 15 December 1982; whereas it is necessary, in order to avoid any discrimination between those concerned, to provide for the application of a single representative rate for all payments relating to the distillation operations referred to in this Regulation; whereas, since the storage contracts referred to in the latter were concluded during the 1981/82 wine-growing year, the last representative rate applicable during the said wine-growing year should be used;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Wine,

HAS ADOPTED THIS REGULATION:

Article 1

This Regulation lays down detailed rules for the application of additional measures, as provided for in Article 12a of Regulation (EEC) No 337/79, in respect of holders of long-term storage contracts for table wine for the 1981/82 wine-growing year.

4. Other additional measures applicable to holders of the storage contracts referred to in paragraph 2 (b) in respect of a given type of wine or a wine in close economic relationship therewith may be taken if the representative price for that type of table wine has remained lower than the activating price during the period between the date of adoption of the decision referred to in Article 12a (5) of Regulation (EEC) No 337/79 and 15 January 1983.
