COUNCIL REGULATION (EEC) No 1102/84

of 31 March 1984

fixing for the 1984/85 marketing year the target prices and intervention prices for colza and rape seed and sunflower seed

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 43 thereof,

Having regard to Council Regulation No 136/66/EEC of 22 September 1966 on the establishment of a common organization of the market in oils and fats (1), as last amended by Regulation (EEC) No 1101/84 (2), and in particular the third subparagraph of Article 22 (4) thereof,

Having regard to the proposal from the Commission (3),

Having regard to the opinion of the European Parliament (4),

Having regard to the opinion of the Economic and Social Committee (5),

Whereas, when the target prices and intervention prices for colza and rape seed and sunflower seed are fixed, account should be taken of the objectives of the common agricultural policy and of the contribution which the Community desires to make to the harmonious development of world trade; whereas the objectives of the common agricultural policy are, in particular, to ensure a fair standard of living for the agricultural community, to ensure that supplies are available and that they reach consumers at reasonable prices;

Whereas the intervention price must be fixed in accordance with the criteria laid down in Article 24 (1) of Regulation No 136/66/EEC;

Whereas, pursuant to Article 1 (2) of Regulation (EEC) No 1593/83 (6), if Community production of colza and rape seed recorded in accordance with Article 24a of Regulation No 136/66/EEC exceeds a guarantee threshold, there is to be a 1 % reduction in the 1984/85 target and intervention prices for every 50 000 tonnes in excess of the guarantee threshold, up to a maximum of 5 %; whereas Article 1 (1) of Regulation (EEC) No 1593/83 fixes the guarantee threshold for the 1983/84 marketing year at 2 290 000 tonnes; whereas the actual average production recorded over the past three marketing years is 2 411 870 tonnes; whereas the target and intervention prices for the products in question should therefore be reduced by 2 % for the 1984/85 marketing year;

Whereas the prices of colza and rape seed and sunflower seed must be fixed for specific standard qualities; whereas these qualities should be laid down in relation to the average qualities of the seeds harvested in the Community; whereas, for colza and rape seed, the quality laid down for the 1983/84 marketing year meets these requirements and can accordingly be used for the following marketing year; whereas, however, experience has for some time shown the oil content of sunflower seed to be well below 40 %; whereas an adjustment as regards the oil content of sunflower seed of the standard quality is therefore required;

Whereas, in accordance with these criteria, the target and intervention prices should be fixed at a lower level in the case of colza and rape seed and, in the case of sunflower seed, at a higher level than that adopted for the preceding marketing year,

HAS ADOPTED THIS REGULATION:
