Page 7, point (12), insert the following third paragraph :

'The Commission has also examined the development of imports originating in other third countries. This showed that, apart from the imports originating in the People's Republic of China (which have since 1 January 1988 been submitted to a system of import authorization in France (1)) these imports, as yet very small in volume, could not be considered as contributing to any significant extent to the serious injury suffered by the French footwear producers, and it was consequently not necessary to apply any protective measures to them.
