COUNCIL REGULATION (EEC) No 1214/89

of 3 May 1989

fixing the prices applicable to cereals for the 1989/90 marketing year

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 43 thereof,

Having regard to the Act of Accession of Spain and Portugal, and in particular Article 89 thereof.

Having regard to Council Regulation (EEC) No 2727/75 of 29 October 1975 on the common organization of the market in cereals [1], as last amended by Regulation (EEC) No 1213/89 [2], and in particular Article 3 (5) thereof,

Having regard to the proposal from the Commission [3],

Having regard to the opinion of the European Parliament [4],

Having regard to the opinion of the Economic and Social Committee [5],

Whereas the markets and prices policy, based on modern farms, is the main instrument of the common agricultural policy; whereas full advantage cannot be drawn from such a policy unless it is integrated into an overall policy which includes a dynamic social and structural policy and the application of the rules on competition contained in the Treaty;

Whereas, in many cases, surpluses can no longer be disposed of on normal terms either inside or outside the Community; whereas, in order to reduce the cost to the budget of disposing of surpluses on markets of third countries and to encourage greater consumption within the Community, the restrictive price policy should continue to be applied; whereas, given the new intervention arrangement and further application of the stabilizing mechanism indicated in Article 4b (3) of Regulation (EEC) No 2727/75, this aim may be achieved by maintaining for 1989/90 the intervention prices for common wheat, barley, rye, maize and sorghum applied during the previous marketing year;

Whereas, as part of a quality policy, production of common wheat of higher breadmaking quality and production of rye of breadmaking quality should be supported; whereas, accordingly, the special premiums for common wheat of breadmaking quality and for rye of breadmaking quality should be continued; whereas, however, the level of these premiums should be ajusted in line with the further reduction in the intervention price provided for in Article 4b (3) of Regulation (EEC) No 2727/75;

Whereas in 1986/87 of Council began a process of aligning the intervention price of durum wheat on that of common wheat; whereas, in view of, on the one hand, the present ratio between the prices of those cereals and, on the other, the imbalance recorded on the durum wheat market, it is advisable to pursue that process; whereas, accordingly, the intervention price of durum wheat should be further reduced;

Whereas application of Article 68 of the Act of Accession of Spain and Portugal has meant that prices in Spain differ from the common prices; whereas, pursuant to Article 70 (1) of the Act of Accession, Spanish prices should be aligned with common prices each year at the start of the marketing year; whereas the rules for this alignment give the Spanish intervention price for durum wheat indicated below; whereas, as a result of the changed made since accession in the intervention mechanisms and of application of the stabilizing mechanisms, the Spanish intervention prices for barley, rye and sorghum should from the 1989/90 marketing year be the same as those applicable in the rest of the Community.
