COMMISSION REGULATION (EC) No 2560/98

of 27 November 1998

amending Annexes I and II to Council Regulation (EEC) No 2377/90 laying down a Community procedure for the establishment of maximum residue limits of veterinary medicinal products in foodstuffs of animal origin

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EEC) No 2377/90 of 26 June 1990 laying down a Community procedure for the establishment of maximum residue limits of veterinary medicinal products in foodstuffs of animal origin [1], as last amended by Commission Regulation (EC) No 1191/98 [2], and in particular Articles 6, 7 and 8 thereof,

Whereas, in accordance with Regulation (EEC) No 2377/90, maximum residue limits must be established progressively for all pharmacologically active substances which are used within the Community in veterinary medicinal products intended for administration to food-producing animals;

Whereas maximum residue limits should be established only after the examination within the Committee for Veterinary Medicinal Products of all the relevant information concerning the safety of residues of the substance concerned for the consumer of foodstuffs of animal origin and the impact of residues on the industrial processing of foodstuffs;

Whereas, in establishing maximum residue limits for residues of veterinary medicinal products in foodstuffs of animal origin, it is necessary to specify the animal species in which residues may be present, the levels which may be present in each of the relevant meat tissues obtained from the treated animal (target tissue) and the nature of the residue which is relevant for the monitoring of residues (marker residue);

Whereas, for the control of residues, as provided for in appropriate Community legislation, maximum residue limits should usually be established for the target tissues of liver or kidney; whereas, however, the liver and kidney are frequently removed from carcases moving in international trade, and maximum residue limits should therefore also always be established for muscle or fat tissues;

Whereas, in the case of veterinary medicinal products intended for use in laying birds, lactating animals or honey bees, maximum residue limits must also be established for eggs, milk or honey;

Whereas valnemulin should be inserted into Annex I to Regulation (EEC) No 2377/90;

Whereas *cinnamomi cassiae aetheroleum,* copper heptanoate, copper methionate, copper oxide, copper sulphate, alfaprostol, dicopper oxide, rifaximin, *angelicae radix aetheroleum, anisi aetheroleum,* copper gluconate, *caryophylli aetheroleum, cinnamomi ceylanici aetheroleum, citri aetheroleum, citronellae aetheroleum, coriandri aetheroleum, foeniculi aetheroleum, menthae piperitae aetheroleum, myristicae aetheroleum, rosmarini aetheroleum, thymi aetheroleum* and *carvi aetheroleum* should be inserted into Annex II to Regulation (EEC) No 2377/90;

Whereas a period of 60 days should be allowed before the entry into force of this Regulation in order to allow Member States to make any adjustment which may be necessary to the authorisations to place the veterinary medicinal products concerned on the market which have been granted in accordance with Council Directive 81/851/EEC [3], as last amended by Directive 93/40/EEC [4], to take account of the provisions of this Regulation;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Veterinary Medicinal Products,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes I and II to Regulation (EEC) No 2377/90 are hereby amended as set out in the Annex hereto.

Article 2

This Regulation shall enter into force on the 60th day following its publication in the *Official Journal of the European Communities.*

Martin BANGEMANN
Member of the Commission

ANNEX

A. Annex I to Regulation (EEC) No 2377/90 is amended as follows:

1. Anti-infectious agents

1.2. Antibiotics

1.2.8. Pleuromutilines

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
'Valnemulin	Valnemulin	Porcine	50 µg/kg 500 µg/kg 100 µg/kg	Muscle Liver Kidney'	

B. Annex II to Regulation (EEC) No 2377/90 is amended as follows:

1. Inorganic chemicals

Pharmacologically active substance(s)	Animal species	Other provisions
'Copper chloride	All food producing species	
Copper gluconate	All food producing species	
Copper heptanoate	All food producing species	
Copper methionate	All food producing species	
Copper oxide	All food producing species	
Copper sulphate	All food producing species	
Dicopper oxide	All food producing species'	

2. Organic compounds

Pharmacologically active substance(s)	Animal species	Other provisions
'Alfaprostol	Rabbits	
Rifaximin	All mammalian food producing species	For topical use only'

6. Substances of vegetable origin

Pharmacologically active substance(s)	Animal species	Other provisions
'Angelicae radix aetheroleum	All food producing species	
Anisi aetheroleum	All food producing species	
Carvi aetheroleum	All food producing species	
Caryophylli aetheroleum	All food producing species	
Cinnamomi cassiae aetheroleum	All food producing species	
Cinnamomi ceylanici aetheroleum	All food producing species	
Citri aetheroleum	All food producing species	
Citronellae aetheroleum	All food producing species	
Coriandri aetheroleum	All food producing species	
Foeniculi aetheroleum	All food producing species	
Menthae piperitae aetheroleum	All food producing species	
Myristicae aetheroleum	All food producing species	For use in newborn animals only'
Rosmarini aetheroleum	All food producing species	
Thymi aetheroleum	All food producing species
