‘X’ = Data element already included in the previous version of this Regulation.

‘A’ = Data element to be added compared to the previous version of this Regulation.

‘D’ = Data element to be deleted compared to the previous version of this Regulation.

In the case a data request is not applicable ‘N/A’ could be used in text fields. ‘0’ (zero) could be used in numeric fields (the required format of the date field should be respected though). It is also allowed to leave the field blank.

ANNEX II

TECHNICAL SPECIFICATIONS FOR THE TRANSFER OF COMPUTER FILES TO THE EAGGF

(applicable from 16 October 2001 onwards)

1. TRANSFER MEDIUM

The computer files must be transferred to the Commission through STATEL/STADIUM. More information on the use of STATEL/STADIUM can be found at the CIRCA website of the EAGGF.

2. COMPUTER FILE STRUCTURE

2.1. The Member State must create a computer record for each individual component of the EAGGF (Guarantee Section) payments and receipts. These components are the individual items of which the payment (receipt) to (from) the beneficiary consists.

2.2. The records must have a flat file structure. If fields have more than one value, separate records containing all data fields are required. Make sure that no double counting occurs.

2.3. All information for the same category of payments or receipts must be contained in the same computer file. Separate files relating to the same payments (e.g. for traders or inspections, or for basic and measure data) are not allowed.

2.4. The computer files must have the following characteristics:

(1) The first record in the file (header row) contains the file description. The field names comprise an 'F' followed by the field number used in Annex I (the 'X table'). Only field names existing in this Annex are allowed.

(2) The following records in the file are data (data rows), in the order indicated by the first record describing the file structure.

(3) The fields are separated by a semicolon (';'). The header row and data rows should all contain the same number of semicolons. In the data rows, empty fields appear as a double semicolon (';;') within the record, or as a single semicolon (';') at the end of the record.

(4) Records vary in length. Each record ends with a code 'CR LF' or 'Carriage Return — Line Feed' (in hexadecimal: '0D 0A'). The header row never ends on a ';'. Data rows only end on a ';' if the last field is empty.

(5) The file is in ASCII code ISO 8859-1, except in the case of files from Greece, where either ELOT-928 or ISO 8859-7 coding shall be applied. Other codes (such as EBCDIC, TAR, ZIP, etc.) are not accepted.

(6) Numeric fields:

(a) Decimal separator: '.'.

(b) The symbol ('×' or '-') appears on the far left, followed immediately by the figures. For positive numbers, the '+' sign is optional.

(c) Fixed number of decimals (the details are set out in the Annex III hereto).

(d) No spaces between digits. No spaces or other signs between thousands.

(7) Date field: 'YYYYMMDD' (year in four digits, month in two digits, day in two digits).

(8) EAGGF budget code (field F109) format: 'B99-9999-999' (where '9' stands for any figure between 0 and 9).

(9) Quotation marks (' ') are not allowed at the beginning or at the end of the records. The semicolon field separator ';' must not be used in data in text format.

(10) All fields: no spaces at the beginning or end of a field.

(11) Files satisfying these rules will look like the following (example):

```
F100;F101;F106;F107;F108;F109
BE01;154678;+152.50;BEF;20010715;B01-1000-123

etc…
(other data rows with the fields in the same order).

2.5. A computer program for checking the format of the computer files, before sending them to the Commission, can be found at the CIRCA web-site of the EAGGF.

3. DOCUMENTATION

A separate document must be sent to the Commission through STATEL/STADIUM, explaining:

— any discrepancies between the sum of the records in the computer files, by budget heading and subheading, and the annual declaration,

— any codes used for fields, for which Annex III does not enforce standard codes.

Such document may relate to one or more computer data files.

All the information marked 'X' or 'A' is obligatory.

X = Data element already included in the previous version of this Regulation.

A = Data element to be added compared to the previous version of this Regulation.

D = Data element to be deleted compared to the previous version of this Regulation.

In the case a data request is not applicable 'N/A' could be used in text fields. '0' (zero) could be used in numeric fields (the required format of the date field should be respected though). It is also allowed to leave the field blank.

4	Receipt of amounts (not preceded by an advance or final payment)
5	Pre-financing payment export refund

F105: payment with penalty

Required format: yes = 'Y'; no = 'N'.

F105A: reduction under Articles 3 and 4 of Regulation (EC) No 1259/1999

The field 105A of the Xs table must be used to indicate the amounts retained (negative amounts) on the basis of Articles 3 and 4 of Regulation (EC) No 1259/1999. Field 105A must be used for each Budget Post where a retention has been made.

For the moment there is no specific Budget Post on which to declare payments made using the amounts retained on the basis of Articles 3 and 4 of Regulation (EC) No 1259/1999. These payments should therefore be indicated in field 105A of the corresponding Budget Posts (4030, 4040, 4050 and 4070)

Required format: +99 … 99.99 or -99 … 99.99, where 9 stands for any number from 0 to 9 inclusive.

F106: amount

Amount of each individual item of payment in currency defined in field F107.

▼M2

The sum of these amounts (F106) by budget code (F109) should in principle correspond with the amounts declared in Table 104. The amounts in field F106 relate to the EAGGF expenditure only. National expenditure should not appear under this heading.

Required format: +99… 99.99 or -99… 99.99, where 9 stands for a digit from 0 to 9.

F107: currency unit

Required format: 'B99-9999-999', where 9 stands for a digit from 0 to 9. Missing positions should be filled with zeroes (e.g. B01-160 becomes B01-1600-000).

F110: marketing year or period

For intervention products the Commission needs to know the marketing year to which the product corresponds or the quota period it is to be set off against. For example, in the case of cereals this may well be a previous marketing year rather than the current one.

▼M2

F301: number of contract (where applicable)

F304: authorising office

This is the office responsible for administrative control and authorisation, e.g. the region. The more decentralised the management of the scheme is, the more important this information becomes.

F306: date of issue of the certificate/licence

Required format: 'YYYYMMDD' (year in four digits, month in two digits, day in two digits).

F307: office holding supporting documents

Required format: 'YYYYMMDD' (year in four digits, month in two digits, day in two digits).

5. DATA RELATING TO PRODUCTS

Preliminary remark concerning quantities: as a basic rule, quantities, areas and numbers of animals must only be shown once. In the case of an advance payment followed by a balance payment, the quantity must be shown in the record of the advance payment. Adjustments to quantities, areas and numbers of animals must be shown in the records covering the balance or subsequent payments. In the case of sums recovered, if the amount applied for is reduced because of incorrect quantities, areas or numbers of animals, the adjustments to the quantities must be indicated by a minus sign.

F500: product code/rural development sub-measure code

In the case of rural development measures, indicate where applicable a code per sub-measure implemented (e.g. type of agri-environmental measure). Member States must draw up their own lists of codes, to be explained in the accompanying letter.

F501: type of animal

Regarding Council Regulation (EC) No 1254/99 (OJ L 160, 26.6.1999, p. 21), i.e. the 'Single Slaughter Premium' please refer to Article 11(1) (a) and (b) as to the type of animal. This is important given the differentiation in premium.

▼M2

Required format: to be expressed by a code; the codes must be explained in the accompanying letter.

F502: quantity paid (number of animals, hectares, etc.)

See preliminary remarks in heading 5 (Data relating to products).

For rural development the quantity paid should be expressed in the unit appropriate to the agri-environmental sub-measure mentioned in F500. A table of correspondence between the sub-measure code (e.g. input reduction) used in F500 and the unit for calculating the premium (e.g. ha) used in F502 should be attached to the payment file.

For the wine sector, the products obtained after distillation should be expressed by number of alcoholic strength.

For all other sectors, the quantity paid should be expressed in the unit which is laid down in the regulation as the basis for the premium payment.

Required format: +99…99.99 or -99…99.99, where 9 stands for a digit from 0 to 9.

F503: quantity covered by payment application lodged (quantity claimed)

Required format: +99…99.99 or -99…99.99, where 9 stands for a digit from 0 to 9.

F507: yield

Representative yield used to calculate the compensatory payment (under the regionalisation plan in accordance with Article 3 of Council Regulation (EEC) No 1765/92 (OJ L 181, 1.7.1992, p. 12).

Required format: 9…9.999, where 9 stands for a digit from 0 to 9.

F508A: area covered by payment application lodged

The area covered by the application.

See preliminary remark in heading 5 (Data relating to products).

Required format: +99…99.99 or -99…99.99, where 9 stands for a digit from 0 to 9.

F508B: area covered by payment made

The area on which the payment is made.

Required format: +99…99.99 or -99…99.99, where 9 stands for a digit from 0 to 9.

F508C: forage areas declared

This information is directly related to the budget heading for animal premiums. The forage areas declared are used to calculate the stocking density. This information must always be provided if the beneficiary is entitled to use the forage area. The sectors concerned are meat and certain rural-development measures.

Required format: +99…99.99 or -99…99.99, where 9 stands for a digit from 0 to 9.

F508D: subject to ceiling on livestock units

Where a livestock premium is reduced on account of the size of the forage area.

Required format: yes = ‘Y’; no = ‘N’.

F508E: extensification premium paid

See Regulation (EEC) No 805/68 (OJ L 148, 28.6.1968, p. 24), as amended by Regulation (EC) No 2222/96 (OJ L 296, 21.11.1996, p. 50).

Required format: yes = ‘Y’; no = ‘N’.

▼M2

F508F: animals slaughtered, exported or consigned

— 'E': exported

— 'C': consigned

F510: Community Regulation and Article number

In the case of intervention goods, the ad hoc publication in the Official Journal is intended.

F510A: Community rate of financing (%)

The percentage for rural development is the percentage of the overall aid which is EAGGF-funded, i.e. a set percentage defined in the regulation (75 % or 50 %).

Required format: +99.99, where 9 stands for a digit from 0 to 9.

F511: EAGGF rate of aid (in EUR) per unit of measurement

Except where there is no change in fields F511 or F512 throughout the marketing year.

Required format: 9…9.999999, where 9 stands for a digit from 0 to 9.

The use of six decimal places may seem odd but some regulations such as Council Regulation (EC) No 660/1999 (OJ L 83, 27.3.1999, p. 10), fix the premium up to five decimals even when using EUR. To cover all possibilities the number of decimals was raised to six.

F511A: additional national aid (in EUR) per unit

Amounts paid out from the national envelope.

Required format: +99… 99.99 or -99… 99.99, where 9 stands for a digit from 0 to 9.

F512: conversion rate

9. ADDITIONAL INFORMATION ON BUYING-IN AND SALES FROM PUBLIC STORAGE

These transactions (buying-in and sales) fall under the budget heading covering other costs. In the case of buying-in, provide details of total quantities and values in line 4 of Table 1 (or 51). In the case of sales, give details of total quantities and values in line 4 of Table 7 (or 53). As to the other items (technical and financial costs plus depreciation), the computer file need contain only one line corresponding to the data in Table 52.

The Commission needs details of movements of quantities bought in, sales and losses even where no financial transactions are involved, as is the case with free sales of foodstuffs and losses within the tolerances allowed. For intervention products, the emphasis is on detailed stock movements rather than on the financial implications. The difference with the FAUDIT-ED system is that the Commission is not interested in the cumulative totals. The Commission also wants the information in the 'X Table' to reflect the actual transactions. Table 8 (Public storage — Public stock position and movements) supplements the above data.
