ANNEX II

TECHNICAL SPECIFICATIONS FOR THE TRANSFER OF COMPUTER FILES TO THE EAGGF

(Applicable from 16 October 2002 onwards)

1. TRANSFER MEDIUM

The computer files must be transferred to the Commission through STATEL/STADIUM. The zipped STADIUM client (version 2.7.5.0) and more information on the use of STATEL/STADIUM can be downloaded from the CIRCA website of the EAGGF.

2. COMPUTER FILE STRUCTURE

2.1. The Member State must create a computer record for each individual component of the EAGGF (Guarantee Section) payments and receipts. These components are the individual items of which the payment (receipt) to (from) the beneficiary consists.

2.2. The records must have a flat file structure. If fields have more than one value, separate records containing all data fields are required. Make sure that no double counting occurs.

2.3. All information for the same category of payments or receipts must be contained in the same computer file. Separate files relating to the same payments (e.g. for traders or inspections, or for basic and measure data) are not allowed.

2.4. The computer files must have the following characteristics:

(1) the first record in the file (header row) contains the file description. The field names comprise an 'F' followed by the field number used in Annex I (the 'X table'). Only field names existing in this annex are allowed;

(2) the following records in the file are data (data rows), in the order indicated by the first record describing the file structure;

(3) the fields are separated by a semicolon (';'). The header row and data rows shall all contain the same number of semicolons. In the data rows, empty fields appear as a double semicolon (';;') within the record, or as a single semicolon (';') at the end of the record;

(4) records vary in length. Each record ends with a code 'CR LF' or 'Carriage Return — Line Feed' (in hexadecimal: '0D 0A'). The header row never ends on a ';'. Data rows only end on a ';' if the last field is empty;

(5) the file is in ASCII code ISO 8859-1, except in the case of files from Greece, where either ELOT-928 or ISO 8859-7 coding shall be applied. Other codes (such as EBCDIC, TAR, ZIP, etc.) are not accepted;

(6) numeric fields:

(a) decimal separator: '.'

(b) the symbol ('+' or '-') appears on the far left, followed immediately by the figures. For positive numbers, the '+' sign is optional

(c) fixed number of decimals (the details are set out in the Annex III hereto)

(d) no spaces between digits. No spaces or other signs between thousands;

(7) date field: 'YYYYMMDD' (year in four digits, month in two digits, day in two digits);

(8) EAGGF budget code (field F109) format: 'B99-9999-999' (where '9' stands for any figure between 0 and 9);

(9) quotation marks (' ') are not allowed at the beginning or at the end of the records. The semicolon field separator ';' must not be used in data in text format;

(10) all fields: no spaces at the beginning or end of a field;

(11) files satisfying these rules will look like the following (example):

F100;F101;F106;F107;F108;F109

BE01;154678;+152.50;BEF;20010715;B01-1000-123

BE01;123456;21550.15;BEF;20010101;B01-4000-010

etc…

(other data rows with the fields in the same order).

2.5. Data files with the characteristics as described under 2.4 shall be sent with consignment type 'X-TABLE-DATA' (see 'STADIUM client').

2.6. The computer program for checking the format of computer files before sending them to the Commission ('WinCheckCsv') is included in the data transfer program ('STADIUM client'). For offline validation purposes the check program can be downloaded from CIRCA separately. The syntax and semantic checks applied by the program are detailed in the STATEL/STADIUM manual.

3. DOCUMENTATION

Each paying agency must send two explanatory notes, transferred through STATEL/STADIUM:

(1) the first to explain all differences, by budget heading and subheading, between the annual declaration ([1]), as part of the annual financial clearance procedure (not table 104), and the sum of the records in the computer files (Σ F106). The STADIUM client includes a specific consignment type for this transfer i.e. 'EXPLANATORY-NOTE';

(2) secondly, any codes used for fields, for which Annex III does not enforce standard codes. The new STADIUM client introduces a specific consignment type for this kind of tabular transfer i.e. 'CODE-LIST'.

The explanatory note shall have the look and feel of an ordinary letter. In particular the identity of the sender or paying agency and the name or administrative unit of the addressee shall be clearly marked.

([1]) Annual declaration: data sent through STATEL/STADIUM using consignment type 'ANNUAL_DECLARATION'.

For the wine sector, the products obtained after distillation shall be expressed by alcoholic strength.

For all other sectors, the quantity paid shall be expressed in the unit, which is laid down in the Regulation as the basis for the premium payment.

The Member States must use the Transit Customs Office List (COL ([1])). This is the list of authorised customs offices for Community/common transit operations. It may be that due to its objective of 'transit operations' some of the customs offices might be missing although this will be the exception. In that case the Member State shall provide the name of the customs office in full.

([1]) http://europa.eu.int/comm/taxation_customs/dds/en/csrdhome.htm.

In view of harmonisation, the Member States shall also use the miscellaneous category (codes Q*) of the nomenclature of countries and territories for the external trade statistics. It is known that that nomenclature does not cover all special export refund cases but the Commission does not require that kind of detail. Member States shall therefore convert their special national codes to the broader categories of the nomenclature of countries and territories for the external trade statistics before sending their data to the Commission.

9. ADDITIONAL INFORMATION ON BUYING-IN AND SALES FROM PUBLIC STORAGE

These transactions (buying-in and sales) fall under the budget heading covering other costs. In the case of buying-in, provide details of total quantities and values in line 4 of Table 1 (or 51). In the case of sales, give details of total quantities and values in line 1 of Table 53.

The Commission needs details of movements of quantities bought in, sales and losses even where no financial transactions are involved, as is the case with free sales of foodstuffs and losses within the tolerances allowed. For intervention products, the emphasis is on detailed stock movements rather than on the financial implications. The difference with the FAUDIT-ED system is that the Commission is not interested in the cumulative totals. The Commission also wants the information in the 'X Table' to reflect the actual transactions. Table 8 (Public storage — Public Stock Position and Movements) supplements the above data.
