ANNEX II

TECHNICAL SPECIFICATIONS FOR THE TRANSFER OF COMPUTER FILES TO THE EAGGF FROM 16 OCTOBER 2005

INTRODUCTION

These technical specifications apply in respect of the financial year 2005, which commenced on 16 October 2004.

1. **Transfer medium**

The coordinating body of the Member State must transfer the computer files and the relating documentation to the Commission through STATEL/STADIUM. The Commission will only support one installation of STATEL/STADIUM per Member State. The latest STADIUM client and more information on the use of STATEL/STADIUM shall be downloaded from the CIRCA web-site of the EAGGF.

2. **Computer file structure**

2.1. The Member State must create a computer record for each individual component of the EAGGF (Guarantee Section) payments and receipts. These components are the individual items of which the payment (receipt) to (from) the beneficiary consists.

2.2. The records must have a flat file structure. If fields have more than one value, separate records containing all data fields are required. Make sure that no double counting occurs ([1]).

2.3. All information for the same category of payments or receipts must be contained in the same computer file. Separate files relating to the same payments (e.g. for traders or inspections, or for basic and measure data) are not allowed.

2.4. The computer files must have the following characteristics:

1. The first record in the file (header row) contains the file description. The field names comprise an 'F' followed by the field number used in Annex I (the 'X-table'). Only field names existing in this Annex are allowed.

2. The following records in the file are data (data rows), in the order indicated by the first record describing the file structure.

3. The fields are separated by a semicolon (';'). The header row and data rows shall all contain the same number of semicolons. In the data rows, empty fields appear as a double semicolon (';;') within the record, or as a single semicolon (';') at the end of the record.

4. Records vary in length. Each record ends with a code 'CR LF' or 'Carriage Return — Line Feed' (in hexadecimal: '0D 0A'). The header row never ends on a ';'. Data rows only end on a ';' if the last field is empty.

5. The file is in ASCII coding according to following table. Other codes (such as EBCDIC, TAR, ZIP, etc.) are not accepted:

code	Member State
ISO 8859-1	BE, DK, DE, ES, FR, IE, IT, LU, NL, AT, PT, FI, SE and GB
ISO 8859-2	CZ, HU, PL, SI and SK
ISO 8859-3	MT
ISO 8859-7	GR and CY
ISO 8859-13	EE, LV and LT

([1]) Note: You should first read the preliminary remark concerning quantities in chapter 5 of Annex III.

▼M7

6. Numeric fields:

   (a) Decimal separator: '.'

   (b) The symbol ('+' or '-') appears on the far left, followed immediately by the figures. For positive numbers, the '+' sign is optional.

   (c) Fixed number of decimals (the details are set out in the Annex III hereto).

   d) No spaces between digits. No spaces or other signs between thousands.

7. Date field: 'YYYYMMDD' (year in four digits, month in two digits, day in two digits).

8. EAGGF budget code (field F109) ABB-format without spaces: '999999999999999' (where '9' stands for any figure between 0 and 9).

9. Quotation marks ('') are not allowed at the beginning or at the end of the records. The semicolon field separator ';' must not be used in data in text format.

10. All fields: no spaces at the beginning or end of a field.

11. Files satisfying these rules will look like the following (example for financial year 2004):

    F100;F101;F106;F107;F108;F109

    BE01;154678;+152.50;EUR;20030715;050201011000001

    BE01;024578;-1000.00;EUR;20030905;050208031502002

    BE01;154985;9999.20;EUR;20030101;050205011100001

    BE01;100078;+152.75;EUR;20030331;050208091515002

    BE01;215452;+0.50;EUR;20030615;050201011000002 (Please note +0.50 and not +.50)

    BE01;123456;21550.15;EUR;20030101;050805013810001

    etc.

    (other data rows with the fields in the same order).

2.5. Data files with the characteristics as described under 2.4 shall be sent with consignment type 'X-TABLE-DATA' (see 'STADIUM client').

2.6. The computer program for checking the format of computer files before sending them to the Commission ('WinCheckCsv') is included in the data transfer program ('STADIUM client'). The paying agencies are invited to download the check program from CIRCA separately for offline validation purposes.

3. **Documentation**

In the following cases only, the coordinating body of the Member State must transfer an explanatory note for each paying agency through STATEL/STADIUM:

1. In the case where there are differences between the annual declaration ([1]), as part of the annual financial clearance procedure (not table 104), and the sum of the records in the computer files (Σ F106), in order to explain them by budget sub item. The STADIUM client includes a specific consignment type for this transfer i.e. 'EXPLANATORY-NOTE'.

2. In the case where there are codes used for fields, for which Annex III does not enforce standard codes, in order to explain all these used codes. The STADIUM client includes a specific consignment type for this kind of tabular transfer i.e. 'CODE-LIST'.

The explanatory note shall have the look and feel of an ordinary letter. In particular the identity of the sender or the identity of the paying agency and the name or administrative unit of the addressee shall be clearly marked.

4. **Data transfer**

The coordinating body must send the computer files completely and only once.

([1]) Annual declaration: data sent through STATEL/STADIUM using consignment type 'ANNUAL_DECLARATION'.

▼M7

If the coordinating body notices that false data were transmitted or a problem occurred with the data transfer, the Commission has to be informed immediately. All files, which contain incorrect information, are to be indicated. Therefore, the Commission is to be asked to delete these files. Thereafter, in order to avoid an overlapping of computer records or data files, the coordinating body must send the corrected computer files to replace entirely the previous incorrect information.

If the EAGGF funding is expressed as a percentage as against the total investment, the amount of the private sector contribution shall be given here. Total investment being defined as the total costs eligible under EAGGF. If on the contrary F510A is expressed as a percentage as against the total eligible public expenditure, i.e. national and European, then this field can be ignored.

There is no specific budget post on which to declare payments made using the amounts retained on the basis of Articles 3 and 4 of Council Regulation (EC) No 1259/1999. These payments shall therefore be indicated in field F105A of the corresponding budget posts (050401054030, 050401064040, 050401084050 and 050401114070). In view of harmonisation, the Member States shall also use the miscellaneous category (codes Q*) of the nomenclature of countries and territories for the external trade statistics. It is known that that nomenclature does not cover all special export refund cases but the Commission does not require that kind of detail. Member States shall therefore convert their special national codes to the broader categories of the nomenclature of countries and territories for the external trade statistics before sending their data to the Commission.
