COMMISSION REGULATION (EC) No 1259/2004

of 8 July 2004

concerning the permanent authorisation of certain additives already authorised in feedingstuffs

(Text with EEA relevance)

▼M3

_____

▼M2

Article 2

The preparations belonging to the group ‘enzymes’, as set out in Annexes III, V and VI are authorised for use without a time limit as additive in animal nutrition under the conditions laid down in those Annexes.

▼B

Article 3

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union.*

This Regulation shall be binding in its entirety and directly applicable in all Member States

ANNEX III

EC No	Additive	Chemical formula, description	Species or category of animal	Maximum age	Minimum content	Maximum content	Other provisions	End of period of authorisation
					Units of activity/kg of complete feedingstuff			
Enzymes								
E 1603	Endo-1,3(4)-beta-glucanase EC 3.2.1.6	Preparation of endo-1,3(4)-beta-glucanase produced by *Aspergillus aculeatus* (CBS 589.94) having a minimum activity of: coated form: 50 FBG ([1])/g liquid form: 120 FBG/ml	Chickens for fattening	—	10 FBG	—	1. In the directions for use of the additive and premixture, indicate the storage temperature, storage life, and stability to pelleting 2. Recommended dose per kg of complete feedingstuff: 15-20 FBG 3. For use in compound feed rich in non-starch polysaccharides (mainly beta-glucans), e.g. containing more than 60 % vegetable ingredients (maize, lupin, wheat, barley, soya, rice, oilseed rape or peas)	Without a time limit

([1]) 1 FBG is the amount of enzyme which liberates 1 micromole of reducing sugars (glucose equivalents) from barley beta-glucan per minute at pH 5,0 and 30 °C.

ANNEX V

EC No	Additive	Chemical formula, description	Species or category of animal	Maximum age	Minimum content	Maximum content	Other provisions	End of period of authorisation
					Units of activity/kg of complete feedingstuff			
Enzymes								
E 1605	Endo-1,4-beta-xylanase EC 3.2.1.8	Preparation of endo-1,4-beta-xylanase produced by *Aspergillus niger* (CBS 520.94) having a minimum activity of: solid form: Endo-1,4-beta-xylanase: 600 U ([1])/g liquid form: Endo-1,4-beta-xylanase: 300 U/ml	Chickens for fattening	—	300 U	—	1. In the directions for use of the additive and premixture, indicate the storage temperature, storage life, and stability to pelleting 2. Recommended dose per kg of complete feedingstuff: endo-1,4-beta-xylanase: 300-600 U 3. For use in compound feed rich in non-starch polysaccharides (mainly arabinoxylans), e.g. containing more than 50 % wheat	Without a time limit

([1]) 1 U is the amount of enzyme which liberates 1 micromole of xylose from birchwood xylan per minute at pH 5,3 and 50 °C.
