COMMISSION REGULATION (EC) No 226/2007

of 1 March 2007

concerning the authorisation of *Saccharomyces cerevisiae* CNCM I-1077 (Levucell SC20 and Levucell SC10 ME) as a feed additive

(Text with EEA relevance)

Article 1

The preparation specified in the Annex, belonging to the additive category ‘zootechnical additives’ and to the functional group ‘gut flora stabilisers’, is authorised as an additive in animal nutrition subject to the conditions laid down in that Annex.

Article 2

This Regulation shall enter into force on the twentieth day following its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

ANNEX

Identification number of the additive	Name of the holder of authorisation	Additive (trade name)	Composition, chemical formula, description, analytical method	Species or category of animal	Maximum age	Minimum content	Maximum content	Other provisions	End of period of authorisation
						CFU/kg of complete feedingstuff with a moisture content of 12 %			
Category of zootechnical additives. Functional group: gut flora stabilisers

In the directions for use of the additive and premixtures, indicate the storage temperature, storage life, and stability to pelleting. 2. In complementary feedingstuffs, do not exceed 50 °C with Levucell SC20 and 80 °C with Levucell SC10ME. 3. Coated form, only for inclusion through a pelleted feed. 4. Recommended dose for dairy goats and dairy sheep: 4×10^9 CFU/head/day. 5. If the product is handled or mixed in a confined atmosphere, it is recommended to use safety glasses and masks for mixing if the mixers are not equipped with exhaust systems.	22 March 2017
