EXPLANATORY NOTE

(This Note is not part of the Scheme.)

This Scheme, which applies to Scotland only, further varies the Farm Capital Grant (Scotland) Scheme 1970, as varied.

It makes provision for the rate of grant towards expenditure on drainage works and on works for the prevention or mitigation of flooding or erosion of agricultural land to remain at 60 per cent. (or 70 per cent. if the work is in the opinion of the Secretary of State of benefit in the farming of hill land) instead of being reduced to 50 per cent. and 60 per cent. respectively in the case of applications for approval made on or after 19th March 1972, as was previously provided.

The Scheme also provides that grant shall no longer be payable towards expenditure on certain specified works and facilities if application for approval of the expenditure is made after 31st March 1972. However grants for cattle grids, fencing, shelter belts and certain land clearance and reclamation work may still be payable if, in the opinion of the Secretary of State, the work is of benefit in the farming of hill land.
