APPENDIX

How to Calculate the Maximum Price per Cwt.

Section A

If you bought the feeding stuff in non-returnable sacks

1. First ascertain the basic price plus all permitted additions (per ton) charged by your supplier (this figure you should be able to calculate from your supplier's invoice).
2. Next—
   (*a*) deduct any charge (per ton) made by your supplier for credit;
   (*b*) deduct any charge (per ton) for handling made by your supplier;
   (*c*) deduct any charges (per ton) made by your supplier for sales in small lots and for packing in quantities of less than 1 cwt.;
   (*d*) add any transport charges (per ton) to your shop or store incurred by you over and above those made by your supplier;
