(2) form FUR/8 (relating to returns) has been substituted for form FUR/7; and

(*b*) the manufacturer's other costs incurred during that period in respect of the relevant goods so supplied by him during that period, and

(*c*) an amount equal to the appropriate percentage of the sums calculated under the above heads or (in cases where by reason of the circumstances of the manufacture of the goods more than one percentage is appropriate) the aggregate of the appropriate percentages of the sums calculated under the above heads in relation to the respective cases:

(*a*) the manufacturer's costs of production incurred during that period of all relevant goods manufactured during that period, adjusted by adding his costs of production incurred before the beginning of that period of his opening stocks of relevant goods and subtracting his costs of production incurred before the end of that period of his closing stocks of relevant goods, and

(*b*) the manufacturer's other costs incurred during that period in respect of the relevant goods so supplied by him during that period, and

PART II

1. A specification number included in the third column of Part I of this Schedule refers to utility goods being knitted goods described in relation to that specification number in any Hosiery Schedule as defined in the Knitted Goods (Manufacture and Supply) Order, 1949(a), as amended from time to time.

2. For the purposes of any description specified in Part I of this Schedule in relation to specification number 362, 362A, 363, 364, 365, 366, 367 or 368, a glove shall be deemed not to be a fur glove unless, in addition to other fur or wooled lambskin (if any) used in the manufacture of the glove, the glove is backed on the outside with fur or wooled lambskin.

3. When in the second column of Part I of this Schedule in relation to any gloves the word "lined" is specified, the lining used in the manufacture of those gloves shall be either knitted fleece fabric (not being utility goods) made from cotton yarn and of a minimum finished weight of 5¼ ozs. per square yard, or utility goods being cloth of which the specification number is H.495, or (in the case of gloves of any of the specification numbers referred to in paragraph 2 of this Part) wholly of fur or partly of fur and partly of such cloth.

4. For the purposes of Part I of this Schedule, the expressions "value" and "value per square foot", in relation to any material used for the manufacture of gloves, mean a sum equal to the price and the price per square foot respectively (excluding any sum payable in respect of purchase tax) which that material would have fetched on a sale in the open market on the date when it was acquired by the manufacturer of the gloves, being a sale when the material was delivered at the premises of the seller for payment in cash, the price was the sole consideration for the sale, and the buyer and the seller were not associated in business.
