CUSTOMS AND EXCISE

The Import Duties (General) (No. 10) Order 1964

Made - - - -	15*th December* 1964
Laid before the House of Commons - -	21*st December* 1964
Coming into Operation	31*st December* 1964

The Lords Commissioners of Her Majesty's Treasury, by virtue of the powers conferred on them by sections 1, 2 and 13 of the Import Duties Act 1958(**a**), and of all other powers enabling them in that behalf, on the recommendation of the Board of Trade hereby make the following Order:—

1.—(1) The form of customs tariff set out in column 1 of Schedule 1 to this Order (being the form prescribed by the Import Duties (General) (No. 3) Order 1961(**b**) as amended by subsequent Orders under the Import Duties Act 1958(**c**), but incorporating certain minor modifications required to give effect to changes in nomenclature recommended by the Customs Co-operation Council) may continue to be referred to as the Customs Tariff 1959 and to be used in classifying goods for customs purposes in cases where some other method is not required under any enactment.

(2) The form so set out shall be interpreted and applied in accordance with the interpretative rules preceding it in the said Schedule 1, but the Index of General Definitions etc. appended to those rules shall not be taken as part of that form or affect its interpretation.

(3) Where goods are to be classified in accordance with that form and the classification depends on the rate of duty, then, unless the contrary intention appears, account shall be taken of all customs duties for the time being chargeable, other than duty under the Customs Duties (Dumping and Subsidies) Act 1957(**d**) or section 3 of the Finance (No. 2) Act 1964(**e**), and the classification shall be made by a comparison of the amounts chargeable on goods not qualifying for any preferential rate of duty.

2.—(1) Where in any heading or subheading of Schedule 1 to this Order a rate of duty is shown in column 2, then on the importation into the United Kingdom of goods classified in that heading or subheading there shall, subject to the following provisions of this Article, be charged an import duty at the rate so shown:

Provided that—

(*a*) in the case of goods qualifying for Commonwealth preference no import duty shall be charged unless a rate is shown in column 3, and if a rate is shown in column 3 import duty shall be charged at that rate;

(*b*) in the case of goods of Convention area origin within the meaning of the European Free Trade Association Act 1960(**f**), no import duty shall be charged unless a rate is shown in column 4, and if a rate is shown in column 4 import duty shall be charged at that rate; and

(a) 6 & 7 Eliz. 2. c. 6. (b) S.I. 1961/403 (1961 I, p. 585).
(c) See the Orders revoked by Art. 3(3) of this Order. (d) 5 & 6 Eliz. c. 18.
(e) 1964 c. 92. (f) 8 & 9 Eliz. 2. c. 19.

(*c*) where a heading or subheading limits a rate of duty to a specified period, or shows different rates for different periods, the duty shall be charged accordingly.

(2) Where—

(*a*) any import duty is by this Order expressed to be chargeable on goods of any description; and

(*b*) any goods of that description are chargeable with a revenue duty (not being a duty in addition to which the import duty is expressed to be chargeable) but those goods are not exempt from import duties,

then import duty shall be charged on those goods at a rate less by the amount of any such revenue duty chargeable on them than the rate at which the import duty is expressed to be chargeable, or, if that amount is equal to or greater than the duty at the last-mentioned rate, shall not be charged on those goods.

(3) Any reference in Schedule 1 to this Order to a percentage, in relation to a rate of duty, is a reference to a percentage of the value of the goods.

(4) In this Article and in Schedule 1 to this Order, "revenue duty" means a duty of customs chargeable under any enactment other than the Import Duties Act 1958, the Customs Duties (Dumping and Subsidies) Act 1957(**a**) and section 3 of the Finance (No. 2) Act 1964(**b**).

3.—(1) This Order may be cited as the Import Duties (General) (No. 10) Order 1964.

(2) The Interpretation Act 1889(**c**) applies for the interpretation of this Order as it applies for the interpretation of an Act of Parliament.

(3) The Import Duties (General) Orders specified in Schedule 2 to this Order are hereby revoked.

(4) Nothing in this Order shall be construed as affecting the operation of any instrument made under the Import Duties Act 1958 and not revoked by the foregoing paragraph or as affecting any relief to which any person is or may become entitled under any provision of that Act.

(5) This Order shall come into operation on 31st December 1964.

G. H. R. Rogers,
Ifor Davies,
Two of the Lords Commissioners of Her Majesty's Treasury.

15th December 1964.

(**a**) 5 & 6 Eliz. 2. c. 18. (**b**) 1964 c. 92. (**c**) 52 & 53 Vict. c. 63.

SCHEDULE 1

FORM OF CUSTOMS TARIFF, AND RATES OF IMPORT DUTY

[For list of section and chapter titles, see end of Schedule.]

INTERPRETATIVE RULES

1. The titles of Sections, Chapters and Sub-chapters are provided for ease of reference only; for legal purposes, classification (as between headings) shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to Rules 2 to 5 below.

2. Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3.

3. When for any reason, goods are, *prima facie*, classifiable under two or more headings, classification shall be effected as follows:

(*a*) The heading which provides the most specific description shall be preferred to headings providing a more general description (subheadings being disregarded).

(*b*) Mixtures and composite goods which consist of different materials or are made up of different components and which cannot be classified by reference to (*a*) shall be classified as if they consisted of the material or component which gives the goods their essential character, in so far as this criterion is applicable.

(*c*) When goods cannot be classified by reference to (*a*) or (*b*), they shall be classified under the heading which involves the highest rate of duty.

4. Where in a note to a Section or Chapter it is provided that certain goods are not covered by that Section or Chapter, a reference being made parenthetically to another Section or Chapter or to a particular heading, the note shall, except in so far as the context requires otherwise, be taken to refer to all the goods falling within that other Section or Chapter or heading notwithstanding that only certain of those goods are referred to by description in the note.

5. Goods not falling within any heading of the Schedule shall be classified under the heading appropriate to the goods to which they are most akin.

6. The classification of goods within a heading is to be determined by applying as between subheadings the like rules as are to be applied between headings, and, except in so far as the contrary intention appears, terms used in a subheading are to be interpreted in the same way as in the heading.

1. Except where the context otherwise requires, throughout this Schedule the expression "rubber" means the following products, whether or not vulcanised or hardened: natural rubber, balata, gutta-percha and similar natural gums, synthetic rubber, and factice derived from oils, and such substances reclaimed.

2. This Chapter does not cover the following products of rubber and textiles, which fall generally within Section XI:

(*e*) Bonded fibre fabrics impregnated or coated with rubber, or in which rubber forms the bonding substance, irrespective of their weight per square metre, and articles thereof;

(*f*) Fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square metre, and articles thereof.

However, plates, sheets and strip, of expanded, foam or sponge rubber, combined with textile fabric, and articles thereof, are to be classified in Chapter 40 provided that the textile fabric is present merely for reinforcing purposes.

3. The following are also not covered by this Chapter:

(*a*) Footwear or parts thereof falling within Chapter 64;

(*b*) Headgear or parts thereof (including bathing caps) falling within Chapter 65;

(*f*) Buttons, combs, smoking pipe stems, pens or other articles falling within Chapter 98.

4. In Note 1 to this Chapter and in headings Nos. 40.02, 40.05 and 40.06, the expression "synthetic rubber" is to be taken to apply to:

(*a*) Unsaturated synthetic substances which can be irreversibly transformed into non-thermoplastic substances by vulcanisation with sulphur, selenium or tellurium, and which, when so vulcanised as well as may be (without the addition of any substances such as plasticisers, fillers or reinforcing agents not necessary for the cross-linking), can produce non-thermoplastic substances which, at a temperature

between fifteen and twenty degrees Centigrade, will not break on being extended to three times their original length and will return after being extended to twice their original length, within a period of two hours, to a length not greater than one and a half times the original length.

Such substances include *cis*-polyisoprene, polybutadiene, polychlorobutadiene (GRM), polybutadiene-styrene (GRS), polychlorobutadiene-acrylonitrile (GRN), polybutadiene-acrylonitrile (GRA) and butyl rubber (GRI);

(*b*) Thioplasts (GRP); and

(*c*) Natural rubber modified by grafting or mixing with artificial plastic material, provided that it complies with the requirements concerning vulcanisation, elasticity and reversibility in (*a*) above.

5. Headings Nos. 40.01 and 40.02 are to be taken not to apply to:

(*a*) Natural or synthetic rubber latex (including pre-vulcanised rubber latex) compounded with vulcanising agents or accelerators, fillers or reinforcing agents, plasticisers, colouring matter (other than colouring matter added solely for the purpose of identification), or with any other substance; however, latex merely stabilised or concentrated, and thermo-sensitive and electro-positive latex are to be classified in heading No. 40.01 or 40.02 as the case may be;

(*b*) Rubber which has been compounded with carbon black (with or without the addition of mineral oil) or with silica (with or without the addition of mineral oil) before coagulation or with any substance after coagulation; or

(*c*) Mixtures of any of the products specified in Note 1 to the present Chapter, whether or not compounded with any other substance.

6. Thread wholly of vulcanised rubber, of any cross-section of which any dimension exceeds five millimetres, is to be classified as strip, rod or profile shape, falling within heading No. 40.08.

7. Heading No. 40.10 is to be taken to include transmission, conveyor or elevator belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated or coated with rubber.

8. For the purpose of heading No. 40.06, pre-vulcanised rubber latex is to be deemed to be unvulcanised rubber latex.

For the purposes of headings Nos. 40.07 to 40.14, balata, gutta-percha and similar natural gums, and factice derived from oils, and such substances reclaimed, are to be deemed to be vulcanised rubber whether or not they have been vulcanised.

9. In headings Nos. 40.05, 40.08 and 40.15, the expressions " plates ", " sheets " and " strip " are to be taken to apply, and to apply only, to plates, sheets and strip, whether or not printed or otherwise surface-worked but not cut to shape or otherwise worked, and rectangular articles cut therefrom not further worked.

In heading No. 40.08 the expressions " rods " and " profile shapes " and in heading No. 40.15 the expressions " rods ", " profile shapes " and " tubes " are to be taken to apply, and to apply only, to such products, whether or not cut to length or surface-worked but not otherwise worked.

(*b*) Where a heading refers to a particular form of a textile material (for example, carded sheep's or lambs' wool), that

form is to be treated as a single textile material. However, where a heading refers to two or more textile materials (or different forms of the same textile material), all those materials are to be treated as a single textile material;

(*c*) Except as provided in (B) (*a*), the weight of constituents other than textile materials is not to be included in the weight of the goods.

(C) The provisions of paragraphs (A) and (B) above are to be applied also to the yarns referred to in Notes 3 and 4 below.

(*c*) Of true hemp or flax:

(i) Polished or glazed, of which the length per kilogram, multiplied by the number of constituent strands, is less than 7,000 metres;

(ii) Not polished or glazed and of a weight exceeding 2 grammes per metre;

(*d*) Of coir, consisting of three or more plies;

(*e*) Of other vegetable fibres, of a weight exceeding 2 grammes per metre; or

(*e*) Chenille yarn and gimped yarn.

4. (A) For the purposes of Chapters 50, 51, 53, 54, 55 and 56, the expression " put up for retail sale " in relation to yarn means, subject to the exceptions in paragraph (B) below, yarn put up:

(*a*) In balls or on cards, reels, tubes or similar supports, of a weight (including support) not exceeding:

(i) 200 grammes in the case of flax and ramie;

(i) 85 grammes in the case of silk, noil or other waste silk, and man-made fibres (continuous); or

(ii) 125 grammes in other cases.

(B) Exceptions:

(*a*) Single yarn of any textile material, except:

(i) Single yarn of sheep's or lambs' wool or of fine animal hair, unbleached; and

(ii) Single yarn of sheep's or lambs' wool or of fine animal hair, bleached, dyed or printed, of a length less than 2,000 metres per kilogram;

(*a*) For the purposes of heading No. 55.07, " gauze " means a fabric with a warp composed wholly or in part of standing or ground threads and crossing or doup threads which cross the standing or ground threads making a half turn, a complete turn or more to form loops through which weft threads pass.

(*b*) For the purposes of heading No. 58.08, " plain " means consisting solely of a single series of regular meshes of the same shape or size without any pattern or filling-in of the meshes. In applying this definition no account is to be taken of any minor open spaces which are inherent in the formation of the meshes.

6. For the purposes of this Section, the expression " made up " means:
(*a*) Cut otherwise than into rectangles;
(*b*) Made ready for use (or merely needing separation by cutting dividing threads) and not requiring sewing or further fabrication (for example, certain dusters, towels, table cloths, scarf squares and blankets);
(*c*) Hemmed or with rolled edges (except fabrics in the piece which have been cut from wider pieces and hemmed or rolled merely to prevent unravelling), or with a knotted fringe at any of the edges;
(*d*) Cut to size and having undergone a process of drawn thread work;
(*e*) Assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more fabrics assembled in layers, whether or not padded).

7. The headings of Chapters 50 to 57 and, except where the context otherwise requires, the headings of Chapters 58 to 60, are to be taken not to apply to goods made up within the meaning of Note 6 above. Chapters 50 to 57 are to be taken not to apply to goods falling within Chapter 58 or 59.

8. Any import duty at a rate fixed by reference to the weight of any silk or man-made fibres is to be calculated on the weight inclusive of any loading or dressing, but exclusive of any water-proofing; and in the case of goods containing both silk and man-made fibres, or other fibres in addition to silk or man-made fibres, the total weight of loading or dressing in the goods is to be apportioned between the different types of fibre in the goods according to their respective weights.

Chapter 51: *Man-made Fibres (Continuous)*

Notes

1. Throughout this Schedule, the term "man-made fibres" means fibres or filaments of organic polymers produced by manufacturing processes, either:

(*a*) By polymerisation or condensation of organic monomers, for example, polyamides, polyesters, polyurethanes and polyvinyl derivatives; or

(*b*) By chemical transformation of natural organic polymers (such as cellulose, casein, proteins and algae), for example, viscose rayon, cuprammonium rayon (cupra), cellulose acetate and alginates.

2. Heading No. 51.01 is to be taken not to apply to continuous filament tow of man-made fibres falling within Chapter 56.

3. The expression "yarn of man-made fibres (continuous)" is to be taken not to apply to yarn (known as "ruptured filament yarn") of which the majority of the filaments have been ruptured by passage through rollers or other devices (Chapter 56).

4. Monofil of man-made fibre materials of which no cross-sectional dimension exceeds 1 millimetre is to be classified in heading No. 51.01 when of a weight less than 6·6 milligrams per metre (60 denier) and in heading No. 51.02 in other cases. Monofil of which any cross-sectional dimension exceeds 1 millimetre is to be classified in Chapter 39.

Strip (artificial straw and the like) of man-made fibre materials is to be classified in heading No. 51.02 when of a width not exceeding 5 millimetres and in Chapter 39 in other cases.

Chapter 71: *Pearls, Precious and Semi-Precious Stones, Precious Metals, Rolled Precious Metals, and Articles thereof; Imitation Jewellery*

Notes

1. Subject to Note 1 (*a*) to Section VI and except as provided below, all articles consisting wholly or partly:

(*a*) Of pearls or of precious or semi-precious stones (natural, synthetic or reconstructed), or

(*b*) Of precious metal or of rolled precious metal,

are to be classified within this Chapter and not within any other Chapter.

2. (*a*) Headings Nos. 71.12, 71.13 and 71.14 do not cover articles in which precious metal or rolled precious metal is present as minor constituents only, such as minor fittings or minor ornamentation (for example, monograms, ferrules and rims), and paragraph (*b*) of the foregoing Note does not apply to such articles.

(*b*) Heading No. 71.15 does not cover articles containing precious metal or rolled precious metal (other than as minor constituents).

3. This Chapter does not cover:

(*a*) Amalgams of precious metal, and colloidal precious metal (heading No. 28.49);

(*b*) Sterile surgical suture materials, dental fillings and other goods falling in Chapter 30;

(*c*) Goods falling in Chapter 32 (for example, lustres);

(*e*) Goods of heading No. 43.03 or 43.04;

(*f*) Goods falling within Section XI (textiles and textile articles);

(*g*) Footwear (Chapter 64) and headgear (Chapter 65);

(*h*) Umbrellas, walking-sticks and other articles falling within Chapter 66;

(*ij*) Fans and hand screens of heading No. 67.05;

(*k*) Coin (Chapter 72 or 99);

(*l*) Abrasive goods falling within headings Nos. 68.04, 68.05, 68.06 or Chapter 82, containing dust or powder of precious or semi-precious stones (natural or synthetic); goods of Chapter 82 with a working part of precious or semi-precious stones (natural, synthetic or reconstructed) on a support of base metal; machinery, mechanical appliances and electrical goods, and parts thereof, falling within Section XVI, not being such articles wholly of precious or semi-precious stones (natural, synthetic or reconstructed);

(*m*) Goods falling within Chapter 90, 91 or 92 (scientific instruments, clocks and watches, or musical instruments);

(*n*) Arms or parts thereof (Chapter 93);

(*o*) Articles covered by Note 2 to Chapter 97;

4. (*a*) The expression "pearls" is to be taken to include cultured pearls.

(*b*) The expression "precious metal" means silver, gold, platinum and other metals of the platinum group.

(*c*) The expression "other metals of the platinum group" means iridium, osmium, palladium, rhodium and ruthenium.

5. For the purposes of this Chapter, any alloy (including a sintered mixture) containing precious metal is to be treated as an alloy of precious metal if, and only if, any one precious metal constitutes as much as 2 per cent., by weight, of the alloy.

Alloys of precious metal are to be classified according to the following rules:

(*a*) An alloy containing 2 per cent. or more, by weight, of platinum is to be treated only as an alloy of platinum.

(*b*) An alloy containing 2 per cent. or more, by weight, of gold but no platinum, or less than 2 per cent., by weight, of platinum, is to be treated only as an alloy of gold.

(*c*) Other alloys containing 2 per cent. or more, by weight, of silver are to be treated as alloys of silver.

For the purposes of this Note, metals of the platinum group are to be regarded as one metal and are to be treated as though they were platinum.

6. Except where the context otherwise requires, any reference in these Notes or elsewhere in this Schedule to precious metal or to any particular precious metal is to be taken to include a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in Note 5 above, but not to rolled precious metal or to base metal or non-metals coated or plated with precious metal.

7. The expression "rolled precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. The expression is also to be taken to cover base metal inlaid with precious metal.

8. In this Chapter the expression "articles of jewellery" means:

(*a*) Any small objects of personal adornment (gem-set or not) (for example, rings, bracelets, necklaces, brooches, ear-rings, watch-chains, fobs, pendants, tie-pins, cuff-links, dress-studs, religious or other medals and insignia); and

(*b*) Articles of personal use of a kind normally carried in the pocket, in the handbag or on the person (such as cigarette cases, powder boxes, chain purses, cachou boxes).

9. For the purposes of heading No. 71.13, the expression "articles of goldsmiths' or silversmiths' wares" includes such

articles as ornaments, tableware, toilet-ware, smokers' requisites and other articles of household, office or religious use.

10. For the purposes of heading No. 71.16, the expression "imitation jewellery" means articles of jewellery within the meaning of paragraph (*a*) of Note 8 above, not incorporating pearls, precious or semi-precious stones (natural, synthetic or reconstructed) nor (except as plating or as minor constituents) precious metal or rolled precious metal, and composed:

(*a*) Wholly or partly of base metal, whether or not plated with precious metal; or

(*b*) Of at least two materials (for example, wood and glass, bone and amber, mother of pearl and artificial plastic material), no account being taken of materials (for example, necklace strings) used only for assembly, or of paint, varnish, pearl essence or similar coating materials.

However, heading No. 71.16 does not cover buttons, studs or cuff-links (heading No. 98.01), dress combs or hair slides (heading No. 98.12) or buckles, buckle clasps or clasps.

In Chapters 73 to 82 (but not in heading No. 73.29 or 74.13) references to parts of goods do not include references to parts of general use as defined above.

Subject to the preceding paragraph and to the Note to Chapter 83, the headings in Chapters 73 to 81 are to be taken not to apply to any goods falling within Chapter 82 or 83.

3. Classification of Alloys:

(*a*) An alloy of base metals containing more than 10 per cent., by weight, of nickel is to be classified as an alloy of nickel, except in the case of an alloy in which iron predominates by weight over each of the other metals or of a ferro-alloy or master alloy (as defined in Chapters 73 and 74).

(*b*) Ferro-alloys and master alloys (as defined in Chapters 73 and 74) are to be classified under headings Nos. 73.02 and 74.02, respectively.

(*c*) Any other alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals.

(*d*) An alloy, not being a ferro-alloy or a master alloy, composed of base metals of this Section and of elements not falling within this Section is to be treated as an alloy of base metals of this Section if the total weight of such metals

equals or exceeds the total weight of the other elements present.

(*e*) In this Section the term " alloy " is to be taken to include sintered mixtures of metal powders and heterogeneous intimate mixtures obtained by melting.

4. Unless the context otherwise requires, any reference in this Schedule to a base metal is to be taken to include a reference to alloys which, by virtue of Note 3 above, are to be classified as alloys of that metal.

5. Classification of Composite Articles:

Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the Interpretative Rules) containing two or more base metals are to be treated as articles of the base metal predominating by weight.

For this purpose:

(*a*) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal, and

(*b*) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 3, it is classified.

6. For the purposes of this Section, the expression " waste and scrap " means waste and scrap metal fit only for the recovery of metal or for use in the manufacture of chemicals.

7. In this Section, any reference to base metal, or to a particular base metal, is to be taken as including base metal plated with precious metal.

Products for rolling, forging or re-melting obtained either:
(i) By shingling balls of puddled iron to remove the slag arising during puddling, or
(ii) By roughly welding together by means of hot-rolling, packets of scrap iron or steel or puddled iron.

(*g*) **Ingots** (heading No. 73.06):

Heading No. 73.13 is to be taken to apply, *inter alia*, to sheets or plates which have been cut to non-rectangular shape, perforated, corrugated, channelled, ribbed, polished or coated, provided that they do not thereby assume the character of articles or of products falling within other headings.

(*o*) **Wire** (heading No. 73.14):

Cold-drawn products of solid section of any cross-sectional shape, of which no cross-sectional dimension exceeds 13 millimetres. In the case of headings Nos. 73.26 and 73.27, however, the term " wire " is deemed to include rolled products of the same dimensions.

The expression also includes concrete reinforcing bars which apart from minor indentations, flanges, grooves or other deformations produced during the rolling process correspond to the above definition.

(*q*) **Hollow mining drill steel** (heading No. 73.10):

Steel hollow bars of any cross-section, suitable for mining drills, of which the greatest external dimension exceeds 15 millimetres but does not exceed 50 millimetres, and of which the greatest internal dimension does not exceed one third of the greatest external dimension. Other steel hollow bars are to be treated as falling within heading No. 73.18.

(*r*) **Angles, shapes and sections** (heading No. 73.11):

Products, other than those falling within heading No. 73.16, which do not conform to the entirety of any of the definitions (*h*), (*ij*), (*k*), (*l*), (*m*), (*n*) and (*o*) above, and which do not have cross-sections in the form of circles, segments of circles, ovals, isosceles triangles, rectangles, hexagons, octagons or quadrilaterals with only two sides parallel and the other two sides equal, and which are not hollow.

2. Headings Nos. 73.06 to 73.14 are to be taken not to apply to goods of alloy or high carbon steel (heading No. 73.15).

3. Iron and steel products of the kind described in any of the headings Nos. 73.06 to 73.15 inclusive, clad with another ferrous metal, are to be classified as products of the ferrous metal predominating by weight.

4. Iron obtained by electrolytic deposition is classified according to its form and dimensions with the corresponding products obtained by other processes.

5. The expression " high-pressure hydro-electric conduits of steel " (heading No. 73.19) means riveted, welded or seamless circular steel tubes or pipes and bends therefor, of an internal diameter exceeding 400 millimetres and of a wall thickness exceeding 10·5 millimetres.

Notes

1. For the purposes of heading No. 74.02, the expression " master alloys " means alloys (except copper phosphide (phosphor copper) containing more than 8 per cent. by weight of phosphorus) of copper with other materials in any proportion, not usefully malleable and commonly used as raw material in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals.

(Copper phosphide (phosphor copper) containing more than 8 per cent. by weight of phosphorus falls within heading No. 28.55 and not within this Chapter).

2. In this Chapter the following expressions have the meanings hereby assigned to them:

Notes

1. Apart from blow lamps, portable forges, grinding wheels mounted on frameworks, manicure and chiropody sets, and goods classified in headings Nos. 82.07 and 82.15, the present Chapter covers only articles with a blade, working edge, working surface or other working part of:

(*a*) Base metal;

(*b*) Metallic carbides;

(*c*) Precious or semi-precious stones (natural, synthetic or reconstructed) on a support of base metal; or

(*d*) Abrasive materials on a support of base metal, provided that the articles have cutting teeth, flutes, grooves, or the like, of base metal, which retain their identity and function after the application of the abrasive.

2. Parts of base metal of the articles falling in the headings of this Chapter are to be classified with the articles of which they are parts, except parts separately specified as such and tool-holders for hand tools (heading No. 84.48). However, parts of general use as defined in Note 2 to Section XV are in all cases excluded from this Chapter.

Recognisable blanks of the articles falling in the headings of this Chapter and blanks of the parts of articles classified in this Chapter by virtue of the first part of this Note are to be classified with the articles or parts of which they are blanks except blanks separately specified as such.

Cutting plates for electric hair clippers are to be classified in heading No. 82.13 and blades and heads for electric shavers are to be classified in heading No. 82.11.

3. Sets (other than manicure or chiropody sets (heading No. 82.13)) comprising an assortment of tools, cutlery, spoons, forks or other articles of a kind falling within the different headings of this Chapter, fitted in cabinets, boxes, cases or the like, are to be classified as that one of the constituent articles which is chargeable with the highest rate of duty. For this purpose a specific rate of duty shall be converted into its *ad valorem* equivalent rate and where an *ad valorem* equivalent rate is the highest rate of duty, the set shall be charged as a whole at that rate.

4. Cases, boxes and similar containers imported with articles of this Chapter are to be classified with such articles if they are of a kind normally sold therewith. Cases, boxes and similar containers imported separately are to be classified under their appropriate headings.

However, goods which are equally suitable for use principally with the goods of headings

Nos. 85.13 and 85.15 are to be classified in heading No. 85.13.

(*c*) All other parts are to be classified in heading No. 84.65 or 85.28.

3. An incomplete machine is to be classified with the corresponding complete machine (and not with parts of such a machine if its parts are separately specified), provided it has the essential character of such a complete machine.

4. A machine (or an incomplete machine classified as if it were complete by virtue of the preceding Note 3) imported unassembled or disassembled is to be classified as a machine of the corresponding kind.

5. Unless the headings otherwise require, composite machines consisting of two or more machines fitted together to form a whole and other machines adapted for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.

6. Motors and transmission, conveyor or elevator belts, for machinery or appliances to which they are fitted, or, if packed separately for convenience of transport, which are clearly intended to be fitted to or mounted on a common base with the machine or appliance with which they are imported, are to be classified under the same heading as such machinery or appliances.

7. For the purposes of these Notes, the expression " machine " means any machine, apparatus or appliance of a kind falling within Section XVI.

EXPLANATORY NOTE

(This Note is not part of the Order, but is intended to indicate its general purport.)

This Order consolidates, as at 31st December 1964, the Import Duties (General) (No. 3) Order 1961, and the various Orders amending it and also incorporates a number of amendments resulting from Recommendations of the Customs Co-operation Council for amendment of the Brussels Nomenclature (on which the United Kingdom Tariff is based).

The Order also reduces the rates of import duty on goods to which the E.F.T.A. Convention applies.

Amendments resulting from Recommendations of the Customs Co-operation Council

These amendments are designed to bring the Nomenclature up to date, clarify the texts of certain legal notes and tariff headings, and resolve problems of classification of certain categories of goods. They are too numerous to be explained in detail in this Note but the following examples are illustrative of their purpose:—

Chapter 32, *Note* 1(*b*)

This amendment to Note 1(*b*) (substitution as regards certain goods not covered by Chapter 32, for " Protein derivatives of tannins falling within headings Nos. 35.01 to 35.04 " of " Tannates and other tannin derivatives of products falling within headings Nos. 29.38 to 29.42 or 35.01 to 35.04 ") merely clarifies the existing legal position and does not change the classification of any tannin derivatives.

Chapter 34, *Note* 3

This amendment (substitution, as regards the goods falling within heading No. 34.03 for the phrase " petroleum and shale oils " of the phrase " petroleum oils and oils obtained from bituminous minerals ") is being made because of recent technical developments which have made the phrase " petroleum and shale oils " hitherto used in this Chapter Note in the Nomenclature too restrictive.

Chapter 40

The very extensive amendments to this Chapter are designed to take account of recent technical developments in the rubber industry, particularly the considerable degree of processing now undertaken at the plantation in the case of natural rubber and in the synthesising plant in the case of synthetic rubber.

Chapter 69, *Note* 2(*b*)

This amendment (insertion of a new note of exclusion from Chapter 69 in respect of " Cermets falling within heading No. 81.04 ") is necessary to keep the Nomenclature abreast of modern developments. Cermets, which are thereby excluded from Chapter 69, are comparatively new products of ceramics and metal which are considered to be more appropriately classified as metals than as ceramics.

Chapter 73, *Note* 1(*n*)

Iron and steel plates are now manufactured in thicknesses exceeding 125 mm. and this amendment (substitution in the definition of iron and steel sheets and plates, for the words " of a thickness not exceeding 125 mm." of the words " of any thickness ") will bring the note into line with modern techniques.

Section XVI, Note 1(*g*)

The reason for this amendment (amplification of this note of exclusion from Section XVI from " Parts of general use as defined in Note 2 to Section XV " to read " Parts of general use, as defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of artificial plastic materials (which are generally classified in heading No. 39·07) "), is to extend to " parts of general use " made of artificial plastic materials comparable treatment (generally classification in heading No. 39.07) to that already given to such parts of base metal.

Some of these amendments involve the reclassification of goods in headings bearing a different rate of duty, but in many instances a new subheading has been raised to preserve the existing rate. Examples are:—

Chapter 39, *Headings* 39.02 *and* 39.03

As a result of an amendment to heading 40.06 (deletion of the words " unvulcanised natural or synthetic rubber adhesives on backings of any material including vulcanised rubber ") certain rubber adhesives on backings of any material which had been classified in that heading because of the nature of the adhesive will now fall to be classified according to the nature of the backing material. New subheadings have been raised in heading 39.02 and 39.03 to preserve the existing full rate of duty of 20 per cent.

Chapter 76 *and heading* 76.04

The notes to this Chapter have been amended to provide, because of changes in use and methods of production, that the maximum thickness for aluminium foil should be increased from 0.15 mm. to 0.20 mm. As a result aluminium foil exceeding 0.15 mm. but not exceeding 0.20 mm. is transferred from heading 76.03 to heading 76.04 and the new subheading in heading 76.04 preserves the existing full rate of duty of 12½ per cent. on these goods.

Chapter 81 *and heading* 81.04

As a result of the amendments of the Note to Chapter 81 (insertion after " uranium " of the words " depleted in uranium-235 " and addition, at the end, of the words " and cermets ") and of heading 81.04 (addition of the words " cermets unwrought or wrought, and articles thereof "), uranium depleted in uranium-235 is transferred to heading 81.04 from heading 28.50 where it was liable to a full rate of duty of 33⅓ per cent. and cermets are transferred to heading 81.04 mainly from headings having a 10 per cent. full rate of duty. The subheadings maintain these rates of duty.

Reduction of E.F.T.A. rates of import duty

The reduction is one-fourth of the current Convention rates of duty except in the following cases:—

(*a*) certain fish and marine products, which become free of duty consequent upon an undertaking given to Norway;

(*b*) certain goods containing hydrocarbon oils, for which the rates of 7 per cent., 5½ per cent., 2½ per cent. and 1½ per cent. are reduced to 6½ per cent., 4 per cent., 1¾ per cent. and 1 per cent. respectively.
