Now, therefore, Her Majesty, by virtue and in exercise of the powers in this behalf by the said Act or otherwise vested in Her Majesty, is pleased, by and with the advice of Her Privy Council, to order, and it is hereby ordered, as follows:—

1. This Order may be cited as the Geneva Convention Act, 1937 (Colonies) (Amendment) Order in Council, 1953.

2. This Order shall come into operation in each of the Colonies of North Borneo and Sarawak on dates to be fixed by the Governors thereof.

3. The Schedule to the said Order shall be amended as follows:—

(*a*) by the insertion between the words "Leeward Islands" and the word "Malta" of the word "Malacca";

(*b*) by the insertion between the word "Nigeria" and the words "St. Helena" of the following words:—

"North Borneo
Penang";

(*c*) by the substitution for the words "and Ascension" after the words "St. Helena" of the words "and its Dependencies";

(*d*) by the insertion between the words "St. Vincent" and the word "Seychelles" of the word "Sarawak"; and

(*e*) by the substitution for the words "Straits Settlements" of the word "Singapore".

W. G. Agnew.

EXPLANATORY NOTE

(This Note is not part of the Order, but is intended to indicate its general purport.)

This Order amends the Schedule to the Geneva Convention Act, 1937 (Colonies) Order in Council, 1937, by the insertion of references to the Colonies of North Borneo and Sarawak and by the substitution for the references to St. Helena and Ascension and to the Straits Settlements of references to St. Helena and its Dependencies, Penang, Malacca and Singapore.

GLUCOSE

1953 No. 751

The Manufacture of Glucose Regulations, 1953

Made - - - -	*29th April*, 1953
Laid before Parliament	1*st May*, 1953
Coming into Operation	1*st July*, 1953

The Commissioners of Customs and Excise in pursuance of the powers conferred on them by subsection (1) of section two hundred and twelve and subsection (1) of section two hundred and thirteen of the Customs and Excise Act, 1952(a), hereby make the following Regulations:—

1. No person shall begin to manufacture glucose until—

(*a*) he has made written application to the Commissioners for approval of the processes and of all premises, vessels and utensils which he intends to use in the manufacture of glucose;

(a) 15 & 16 Geo. 6 & 1 Eliz. 2. c. 44.

(*b*) he has delivered with such application a description of such processes and a drawing or plan of the premises, vessels, utensils and connections;

(*c*) the Commissioners have approved such processes, premises, vessels and utensils;

(*d*) he has made entry of all such premises, vessels and utensils.

2. The manufacturer shall provide on the entered premises—

(*a*) a receiver for collecting saccharine solution, and

(*b*) such facilities for the use of the officer (including a proper means of cooling samples) as the Commissioners may require.

3. The manufacturer shall not use vessels or utensils approved for the manufacture of glucose for any other purpose, except as may be allowed by the Commissioners.

4. The manufacturer shall so place the receiver that it shall be easy of access for official examination and account and so that it shall admit of its contents being accurately gauged. He shall not alter the shape, position or capacity thereof unless he has given two days' previous notice in writing to the proper officer.

5. The manufacturer shall obtain from the officer an entry book in the prescribed form and shall—

(*a*) keep the book on his entered premises at all times ready for inspection by the officer, and shall permit any officer at any time to inspect the same, to make entries therein and take extracts therefrom;

(*b*) enter in the book the day and hour when he intends to commence making glucose, and also the quantities of materials which he intends to use;

(*c*) make such entry, so far as respects the day and hour, twenty-four hours at least before he shall commence to make glucose, and so far as respects the quantities of materials, two hours at least before the hour entered for commencing to make glucose;

(*d*) two hours at least before commencing to make glucose, enter the time when the saccharine solution will be collected in the receiver;

(*e*) within one hour of the saccharine solution being collected in the receiver, enter particulars of—

(i) the quantity and temperature of the solution, and of the receiver into which the solution has been conveyed; and

(ii) the saccharometer reading and temperature of the solution when cooled to a temperature not less than seventy-five degrees nor more than one hundred degrees Fahrenheit;

(*f*) at the time of making any entry, insert the date when the entry is made.

6. The manufacturer shall not cancel, obliterate or, except with the permission of an officer, alter any entry in the book.

7. The manufacturer shall, if so required by the Commissioners, send notice in writing containing the prescribed particulars to the proper officer forty-eight hours before next commencing to make glucose.

8.—(1) The manufacturer shall not treat or steep any starch or other materials for conversion into glucose elsewhere than in the steeping or other vessels entered for the purpose, and shall pass the solution obtained by the

steeping or treatment of the materials in the ordinary course of manufacture from the steeping or other vessels successively through the following vessels, namely the converter, the neutraliser and the press into the receiver, or such of them as may be in use, or such other vessels as may be approved.

(2) The manufacturer shall at all times keep separate any solution of which particulars have not been entered under paragraph (*e*) of Regulation 5 from all solution of which particulars have been so entered.

(3) The manufacturer shall retain all solution undisturbed in the receiver until the expiration of one hour from the time of entry of the particulars under paragraph (*e*) of Regulation 5, unless the particulars have been previously checked by the officer.

(4) A manufacturer who makes upon the same premises glucose and invert sugar shall keep the manufacture of glucose at all times separate and distinct from the manufacture of invert sugar until the solution has been removed from the receiver.

9.—(1) The duty on glucose shall be computed in accordance with this Regulation by reference to—

(*a*) the bulk gallonage,

(*b*) the temperature, and

(*c*) the saccharometer reading ascertained by the approved saccharometer of the saccharine solution collected in the receiver.

(2) In respect of each collection of saccharine solution in the receiver, the particulars as entered by the manufacturer under paragraph (*e*) of Regulation 5, or as ascertained by the officer (whichever give the higher result), shall be included in the monthly aggregate referred to in the next succeeding paragraph.

(3) An account shall be made up each month by taking the aggregate of the separate quantities of solution collected, within the appropriate ranges of temperature and saccharometer reading laid down in the approved tables, and the quantity of glucose resulting shall be calculated by reference to those tables.

(4) The quantity so ascertained shall, after deduction therefrom for waste in the subsequent stages of manufacture of ten per cent., or such percentage as may be proved to the satisfaction of the Commissioners to be reasonable, be deemed to be the quantity capable of being produced from the solution, and shall be the quantity chargeable with duty in the relative monthly period.

10.—(1) The manufacturer shall in addition to the entry book keep such accounts as will enable the officer to satisfy himself as to the correctness of any entry in the entry book.

(2) The manufacturer shall at all reasonable times permit an officer to examine all accounts required to be kept under this Regulation which the officer may require to inspect for the purpose of satisfying himself as aforesaid.

(3) The manufacturer shall preserve and keep on his entered premises for not less than two years the accounts required to be kept under this Regulation.

11.—(1) In these Regulations—

"manufacturer" means a person required to be licensed as a manufacturer of glucose under section two hundred and eleven of the Customs and Excise Act, 1952;

"prescribed" and "approved" mean respectively prescribed and approved by the Commissioners.

(2) The Interpretation Act, 1889(**a**), applies for the interpretation of these Regulations as it applies for the interpretation of an Act of Parliament.

12. The Regulations dated 27th July, 1901(**b**), as to licences for the manufacture of glucose, saccharin and invert sugar and also as to the manufacture of glucose, made by the Commissioners of Inland Revenue under section nine of the Finance Act, 1901(**c**), are hereby revoked.

13. These Regulations may be cited as the Manufacture of Glucose Regulations, 1953, and shall come into operation on the first day of July, 1953.

Dated this 29th day of April, 1953.

A. W. Taylor,
Commissioner of Customs and Excise.

King's Beam House,
London, E.C.3.

EXPLANATORY NOTE

(*This Note does not form part of the Regulations, but is intended to indicate their general purport.*)

These Regulations, made under sections two hundred and twelve and two hundred and thirteen of the Customs and Excise Act, 1952, require all manufacturers of glucose to obtain the prior approval of the Commissioners of Customs and Excise of the processes, premises and plant they intend to use, to make entry (i.e. furnish a list) of such premises and plant, and to keep and make available records of their manufacturing operations. They also lay down the method by which the amount of duty due on glucose is to be calculated.

The Regulations revoke and substantially reproduce in modern form the existing Regulations (S.R. & O. 1901/604) made under section nine of the Finance Act, 1901, which was repealed by the Customs and Excise Act, 1952.

(**a**) 52 & 53 Vict. c. 63.
(**b**) S.R. & O. 1901/604; Rev. XXI, p. 533; 1901, p. 88.
(**c**) 1 Edw. 7. c. 7.
