(2) All filling materials shall be of first-grade quality and suitable for each individual cavity. Except in special circumstances (which must be stated to the Board) cements, gutta percha and copper amalgam are not to be regarded as permanent filling materials, though they may be used without reference to the Board for the conservation of deciduous teeth. Silicate and silico-phosphate cements or self-polymerising acrylic resin filling materials may be used in anterior teeth but are not to be used for fillings in teeth posterior to the canines other than first and second premolars where the occlusal surfaces are not involved except where the prior approval of the Board has been obtained. For the purposes of this paragraph cements are to be taken to include all filling materials which consist of powders in combination with liquids other than mercury.

(3) All materials used in dentures shall be of first-grade quality. A plastic base material other than vulcanite shall be used only if it is of a brand approved for the time being by the Secretary of State for use in the making of dentures.

(4) Where pin teeth are used for vulcanite or other plastic base dentures, all pins shall be of platinum, or nickel cased with gold or other precious metal or nickel alloy cased with gold or other precious metal. Pins sheathed with gold anchored within the porcelain are within this specification. The teeth, whether porcelain or acrylic shall be of first-grade quality.

(5) Porcelain diatoric anterior teeth may only be used in vulcanite or plastic base dentures when artificial gum is necessary.

(6) Strengtheners shall be compatible with the denture base materials used and not liable to change in the mouth.

(*c*) such other material as may be approved for the time being by the Secretary of State, may be used.

† Reference in this scale of fees to dental treatment by the same practitioner shall include also dental treatment by his principal or the partner of either, or by the assistant of any of them.

* See Second Schedule for treatment requiring prior approval.

(9) Metal used for denture bases, backings, posts and tags, spiral springs, bolts and swivels, shall be—

(*a*) alloys containing not less than 33⅓rd per cent. of gold, platinum or palladium and not more than 20 per cent. of base metal, or

(*b*) stainless steel, or

(*c*) such other materials as may be approved for the time being by the Secretary of State, and

(*d*) shall be of adequate strength.

(10) Casing of gold cased lingual or palatal bars shall be of not less than 18 carat gold.
