7. Every person concerned in any proceedings to which these Rules relate, and every patentee, shall furnish to the Comptroller an address for service in the United Kingdom and that address may be treated for all purposes connected with such proceedings or patent as the address of the person concerned in the proceedings or the patentee.

Agency

8.—(1) With the exception of documents mentioned in sub-rule (2) and unless the Comptroller otherwise directs in any particular case, all notices, applications or other documents filed under the Act may be signed by, and all attendances upon the Comptroller may be made by or through, an agent duly authorised to the satisfaction of the Comptroller.

(*b*) any person who has been convicted of an offence under Section 88 ;

(*c*) any person who is found by the Board of Trade (after being given an opportunity to be heard) to have been convicted of any such offence, or to have been guilty of any such misconduct, as, in the case of an individual registered in the register of patent agents, would render him liable to have his name erased therefrom;

(*d*) any person, not being registered as a patent agent, who in the opinion of the Comptroller is engaged wholly or mainly in acting as agent in applying for patents in the United Kingdom or elsewhere in the name or for the benefit of a person by whom he is employed;

Applications for the grant of patents

9.—(1) An application, other than a Convention application, shall be made on Patents Form No. 1.

(2) In the case of an application by the assignee of the person claiming to be the true and first inventor there shall be furnished at the time of filing such application or within a period of three months thereafter the declaration required by Section 2 (2).

(3) A Convention application shall be made on Patents Form No. 1 Con.

(4) An application for the grant of a Patent of Addition in lieu of an independent patent shall be made on Patents Form No. 1 Add.

10. In the case of an application, other than a Convention application, by the personal representative of a deceased person who, immediately before his death, was entitled to make such an application, the probate of the will of the deceased, or the letters of administration of his estate, or an official copy of the probate or letters of administration, shall be produced at the Office in proof of the applicant's title to act as personal representative.

11.—(1) Except in the case of an application (other than a Convention application) which is accompanied by a complete specification, Patents Form No. 4, including a declaration as to the inventorship of the invention disclosed in the complete specification, shall be filed with the complete specification, or subsequently at any time before the expiration of the period allowed by or under Section 12 for putting the application in order.

(2) When so requested by the applicant the Comptroller may, if he sees fit, dispense with the said declaration.

12. Where, in pursuance of Section 3 (3), the Comptroller allows a single complete specification to be proceeded with in respect of two or more applications in respect of which two or more complete specifications have been filed, the single complete specification may include any matter disclosed in any of the said specifications and shall be deemed to have been filed on such date, not earlier than the earliest date on which all the matter disclosed in the said single complete specification has been disclosed to the Office in or in connection with the applications, as the Comptroller may direct.

13.—(1) Where an applicant has made an application for a patent and, before the acceptance of the complete specification, makes a fresh application for a patent for matter included in the first mentioned application or in any specification filed in pursuance thereof, the Comptroller may direct that the fresh application or any specification filed in pursuance thereof shall

be ante-dated to a date not earlier than the date of filing of the first mentioned application or specification if the applicant includes in the fresh application a request to that effect.

(2) The Comptroller may require such amendment of the complete specification filed in pursuance of either of the said applications as may be necessary to ensure that neither of the said complete specifications includes a claim for matter claimed in the other.

14. Where a complete specification has been filed pursuant to two or more applications accompanied by provisional specifications for inventions which the applicant believes to be cognate or modifications one of another and the Comptroller is of opinion that such inventions are not cognate or modifications one of another, the Comptroller may allow the complete specification to be divided into such number of complete specifications as may be necessary to enable the applications to be proceeded with as two or more separate applications for patents.

15.—(1) In addition to the specification filed with every Convention application, there shall be filed with the application, or within three months thereafter, a copy of the specification and drawings or documents filed in respect of the relevant application for protection in a Convention country or of each such application, duly certified by the official chief or head of the Patent Office of the Convention country, or otherwise verified to the satisfaction of the Comptroller.

(2) If any specification or other document relating to the application is in a foreign language, it shall be accompanied by a translation thereof verified by statutory declaration or otherwise to the satisfaction of the Comptroller.

16. Where a single Convention application has been made in respect of all or part of the inventions in respect of which two or more applications for protection have been made in one or more Convention countries, and the Examiner reports that the claims of the specification filed with the said Convention application relate to more than one invention, the Comptroller may allow one or more further applications to be filed and the specification to be divided into such number of specifications as may be necessary to enable two or more separate Convention applications to be proceeded with, and may direct that the said applications be deemed to have been filed on the date of filing of the original application.

Drawings

17. Drawings, when supplied, shall accompany the provisional or complete specification to which they refer, except in the case provided for by Rule 25.

18.—(1) Drawings shall be made on white, hot-pressed, rolled or calendered strong drawing paper of smooth surface, good quality, and medium thickness, without washes or colours, in such a way as to admit of being clearly reproduced on a reduced scale by photography.

(2) Mounted drawings may not be used.

19.—(1) Drawings shall be on sheets which measure 13 inches from top to bottom and are either from 8 inches to 8¼ inches or from 16 inches to 16½ inches wide, and a clear margin of half an inch shall be left at the edges of the sheet.

(2) If there are more figures than can be shown on one of the smaller sized sheets, two or more of these sheets shall be used unless the larger size is required by the size of any one figure.

(3) An exceptionally large figure may be continued on subsequent sheets.

(4) No more sheets shall be employed than are necessary.

(5) The figures shall be numbered consecutively without regard to the number of sheets, and shall as far as possible be arranged in numerical order, separated by a sufficient space to keep them distinct.

(6) Where figures on a number of sheets form in effect a single complete figure, they shall be so arranged that the complete figure can be assembled without concealing any part of another figure.

20. Drawings shall be prepared in accordance with the following requirements:—

(*a*) they shall be executed with absolutely black ink;

(*b*) each line shall be firmly and evenly drawn, sharply defined, and of the same strength throughout;

(*c*) section lines, lines for effect, and shading lines shall be as few as possible, and shall not be closely drawn;

(*d*) shading lines shall not contrast excessively in thickness with the general lines of the drawing;

(*e*) sections and shading shall not be represented by solid black or washes;

(*f*) they shall be on a scale sufficiently large to show the invention clearly, and only so much of the apparatus, machine, or article may appear as effects this purpose;

(*g*) if the scale is given, it shall be drawn, and not denoted by words, and no dimensions may be marked on the drawings;

(*h*) the figures shall be drawn in an upright position in regard to the top and bottom of the sheet;

(*i*) reference letters and numerals, and index letters and numerals used in conjunction therewith, shall be bold, distinct and not less than one-eighth of an inch in height; the same letters or numerals shall be used in different views of the same parts, and where the reference letters or numerals are shown outside the parts referred to they shall be connected with the said parts by fine lines.

21.—(1) A true copy of the original drawings shall be filed at the same time as the original drawings, prepared in accordance with these Rules, except that the reference letters or numerals and leading lines thereto shall be in soft black-lead pencil.

(2) The reference letters or numerals and leading lines may be omitted from the true copy drawings provided that an additional copy of the original drawings (which may be a print) with all the references thereon is filed.

(3) A hand-made true copy drawing may be on tracing cloth.

22.—(1) Drawings shall bear:—

(*a*) in the left-hand top corner the name of the applicant and, in the case of drawings filed with a complete specification after one or more provisional specifications, the numbers and years of the applications;

(*b*) in the right-hand top corner the number of sheets of drawings sent and the consecutive number of each sheet, and the words "original" or "true copy" as the case may require;

(*c*) in the right-hand bottom corner the signature of the applicant or his agent.

(2) The title of the invention shall not appear on the drawings.

23.—(1) No descriptive matter shall appear on constructional drawings, but drawings in the nature of flow sheets may bear descriptive matter to show the materials used and the chemical or other reactions or treatments effected in carrying out the invention.

(2) Drawings showing a number of instruments or units of apparatus and their interconnections, either mechanical or electrical, where each such instrument or unit is shown only symbolically, may bear such descriptive matter as is necessary to identify the instruments or units or their interconnections.

(3) Such descriptive matter shall be in absolutely black ink on both the original and the true copy drawings and on the latter the letters shall be not less than one quarter of an inch in height.

(4) No drawing or sketch, other than a graphic chemical formula or a mathematical formula, symbol or equation, shall appear in the verbal part of the specification and if such a formula, symbol or equation is used therein a copy thereof, prepared in the same manner as original drawings, except that it may be a hand-made drawing on tracing-cloth, shall be furnished if the Comptroller so directs.

24. Drawings shall be delivered at the Office free from folds, breaks or creases which would render them unsuitable for reproduction by photography.

25. If an applicant desires to adopt the drawings filed with his provisional specification as the drawings or part of the drawings for his complete specification, he shall refer to them in the complete specification as those filed with the provisional specification.

Extension of the period for filing complete specification

26. A request for an extension of the period for filing a complete specification up to a period not exceeding fifteen months from the date of filing of the application shall be made on Patents Form No. 5.

Request for post-dating an Application

27. Where an applicant for a patent desires that his application shall be post-dated in pursuance of the provisions of Section 6 (3), he shall make a request on Patents Form No. 6.

Procedure under Sections 7, 8 *and* 9

28.—(1) When the Examiner, in making the investigation under Section 7, reports that the invention so far as claimed in any claim of the complete specification has been published in any specification or other document falling within Section 7 (1) or 7 (2), the applicant shall be so informed and shall be afforded an opportunity of amending his specification.

(2) If the Examiner finds that substantially the whole of the invention claimed has been published in one or more such specifications or documents he may, without continuing the investigation, make a provisional report to that effect.

(3) If the applicant re-files his specification and the Examiner is not satisfied either that the invention so far as claimed in any claim has not been published in any specification or other document cited by the Examiner or that the priority date of the claim is not later than the date on which the relevant document was published, the applicant shall be given an opportunity to be heard in the matter if he so requests.

(4) Whether or not the applicant has re-filed his specification, the Comptroller may appoint a hearing if he considers it desirable to do so, having

regard to the time remaining for putting the application in order or other circumstances of the case.

(5) When a hearing is appointed, the applicant shall be given at least ten days' notice of the appointment or such shorter notice as appears to the Comptroller to be reasonable in the circumstances and shall as soon as possible notify the Comptroller whether he will attend the hearing.

(6) After hearing the applicant, or without a hearing if the applicant has not attended or has notified that he does not desire to be heard, the Comptroller may prescribe or permit such amendment of the specification as will be to his satisfaction and may refuse to accept the specification unless the amendment is made within such period as he may fix.

29.—(1) When the Examiner reports that the invention so far as claimed in any claim of the complete specification is claimed in any claim of any other complete specification falling within Section 8 (1) or 8 (3), the applicant shall be so informed and shall be afforded an opportunity of amending, or submitting amendments of, his specification.

(2) If, when the applicant's specification is otherwise in order for acceptance, an objection under Section 8 is outstanding, the Comptroller may accept the specification and allow a period of two months from the date of its publication for removing the objection.

(3) If an objection under Section 8 is communicated to the applicant after acceptance of the specification, a period of two months from the date of the communication shall be allowed for removing the objection.

30.—(1) If the applicant so requests at any time, or if the Examiner is not satisfied that the objection has been met within the period prescribed by Rule 29, including any extension thereof which the Comptroller may allow, a time for hearing the applicant shall be appointed and the applicant shall be given at least ten days' notice of the appointment and shall as soon as possible notify the Comptroller whether he will attend the hearing.

(2) After hearing the applicant, or without a hearing if the applicant has not attended or has notified that he does not desire to be heard, the Comptroller may prescribe or permit such amendment of the specification as will be to his satisfaction and may direct that a reference to such other specification as he shall mention shall be inserted in the applicant's specification unless the amendment is made or agreed to within such period as he may fix.

31. The periods mentioned in Rules 29 and 30 may be extended if a request for such extension is made on Patents Form No. 7 at any time within the extended period specified in the request, provided that the total extension of either period allowed under this provision shall not exceed six months.

32. When, in pursuance of Rule 30, the Comptroller directs that reference to another specification shall be inserted in the applicant's complete specification, the reference shall be inserted after the claims and shall be in the following form:—

"Reference has been directed, in pursuance of Section 8 of the Patents Act, 1949, to specification No. ".

33. An application under the proviso to Section 79 (2), for disclosure of the result of a search made under Sections 7 and 8, shall be made on Patents Form No. 8.

34. When in making the investigations under Sections 7 and 8 it appears to the Examiner that the applicant's invention cannot be performed without substantial risk of infringement of a claim of another patent, the applicant shall be so informed and the procedure provided in Rules 29 to 31 shall apply.

35. When, pursuant to such procedure, the Comptroller directs that reference to a patent shall be inserted in the applicant's complete specification, the reference shall be inserted after the claims and shall be in the following form:—

Reference has been directed in pursuance of Section 9, subsection (1) of the Patents Act, 1949 to patent No.

36. An application under Section 9 (2) for the deletion of a reference inserted pursuant to a direction under Section 9 (1) shall be made on Patents Form No. 9, and shall state fully the facts relied upon in support of the application.

37. In the application of Rules 29 to 32, 34 and 35 to proceedings subsequent to the grant of the patent, references to the patentee shall be substituted for references to the applicant.

Putting Applications in order and acceptance of Complete Specifications (Sections 12 and 13)

38.—(1) A notice under Section 12 (2) requesting an extension of the period allowable under Section 12 (1) for putting an application in order shall be given on Patents Form No. 10.

(2) A notice under the proviso to Section 13 (1) requesting postponement of the acceptance of a complete specification to a date later than twelve months from its date of filing shall be given on Patents Form No. 11.

39.—(1) After the date of the publication of a complete specification the application and specification as accepted together with the drawings and documents (if any) filed in pursuance of Rule 15 may be inspected at the Office upon payment of a fee prescribed by these Rules.

(2) The documents (if any) filed in pursuance of Rule 15 or photographic copies thereof may be made available for inspection without fee.

Opposition to grant of Patent (Section 14)

40.—(1) A notice of opposition to the grant of a patent

(*a*) shall be given on Patents Form No. 12,

(*b*) shall state the ground or grounds on which the opponent intends to oppose the grant, and

(*c*) shall be accompanied by an unstamped copy thereof and a statement (in duplicate) setting out fully the nature of the opponent's interest, the facts upon which he relies and the relief which he seeks.

(2) A copy of the notice and of the statement shall be sent by the Comptroller to the applicant.

41. If the applicant desires to proceed with his application, he shall, within six weeks of the receipt of such copies, file a counterstatement setting out fully the grounds upon which the opposition is contested and deliver to the opponent a copy thereof.

42. The opponent may within six weeks from the receipt of the copy of the counterstatement file evidence in support of his case and shall deliver to the applicant a copy of the evidence.

43. Within six weeks from the receipt of the copy of the opponents evidence or, if the opponent does not file any evidence, within six weeks from the expiration of the time within which the opponent's evidence might have been filed, the applicant may file evidence in support of his case and shall deliver to the opponent a copy of the evidence; and within six weeks from the receipt of the copy of the applicant's evidence the opponent may file evidence confined to matters strictly in reply and shall deliver to the applicant a copy of the evidence.

44. No further evidence shall be filed by either party except by leave or direction of the Comptroller.

45.—(1) Copies of all documents, other than United Kingdom specifications, referred to in the notice of opposition or in any statement or evidence filed in connection with the opposition, authenticated to the satisfaction of the Comptroller, shall be furnished (in duplicate) for the Comptroller's use unless he otherwise directs.

(2) Where a specification or other document in a foreign language is referred to, a translation thereof, verified by statutory declaration or otherwise to the satisfaction of the Comptroller, and two copies of the translation, shall also be furnished.

46.—(1) On completion of the evidence (if any), or at such other time as he may see fit, the Comptroller shall appoint a time for the hearing of the case, and shall give the parties at least fourteen days' notice of the appointment.

(2) If either party desires to be heard he shall notify the Comptroller on Patents Form No. 13 and the Comptroller may refuse to hear either party who has not filed the said form prior to the date of hearing.

(3) If either party intends to refer at the hearing to any publication not already mentioned in the proceedings, he shall give to the other party and to the Comptroller at least ten days' notice of his intention, together with details of each publication to which he intends to refer.

(4) After hearing the party or parties desiring to be heard or, if neither party desires to be heard, then without a hearing, the Comptroller shall decide the case and notify his decision to the parties.

47. If in consequence of the proceedings the Comptroller directs that a reference to another patent shall be inserted in the applicant's specification under Section 9 (1), the reference shall be as prescribed by Rule 35.

48. If the applicant notifies the Comptroller that he does not desire to proceed with the application, the Comptroller in deciding whether costs should be awarded to the opponent shall consider whether proceedings might have been avoided if the opponent had given reasonable notice to the applicant before the opposition was filed.

Procedure under Section 15

49. If at any time after the acceptance of a complete specification and before the grant of the patent it comes to the notice of the Comptroller, otherwise than in consequence of proceedings in opposition to the grant, that the invention so far as claimed in any claim of the complete specification has been published in any specification or other document falling within Section 15 (1), the applicant shall be so informed and shall be allowed a period of two months within which to submit such amendment of his specification as will be to the Comptroller's satisfaction.

50.—(1) If the specification has not been amended to the Comptroller's satisfaction within the period allowed under Rule 49 including any extension thereof which the Comptroller may allow, a time for hearing the applicant shall be appointed, and the applicant shall be given at least ten days' notice of the appointment, and shall as soon as possible notify the Comptroller whether he will attend the hearing.

(2) After hearing the applicant, or without a hearing if the applicant has not attended or has notified that he does not desire to be heard, the Comptroller may prescribe or permit such amendment of the specification as will be to his satisfaction and may refuse to grant a patent unless the amendment is made or agreed to within such period as he may fix.

51. The periods mentioned in Rules 49 and 50 may be extended if a request for such extension is made on Patents Form No. 7 at any time within the extended period specified in the request, provided that the total extension of either period allowed under this provision shall not exceed six months.

Mention of Inventor as such (*Section* 16)

56. Any mention of an actual deviser as inventor under Section 16 (1) may be made in the patent after the name of the Comptroller, and on the complete specification at the head of Patents Form No. 3, and may be in the form "The inventor of this invention in the sense of being the actual deviser thereof within the meaning of Section 16 of the Patents Acts, 1949, is of ", or "The inventor of a substantial part of this invention in the sense of being the actual deviser thereof within the meaning of Section 16 of the Patents Act, 1949, is of ", as the case may require.
