EXPLANATORY NOTE

(This Note is not part of the Regulations, but is intended to indicate their general purport.)

These Regulations prescribe the size, colour and type of the generality of traffic signs which a highway authority is authorised to place on or near any road within its area, subject to any general or other directions of the Minister of Transport. Apart from the omissions of obsolete signs, the main difference between these Regulations and those now revoked is that the new Regulations include the majority of the traffic signs which have been the subject of authorisations given by the Minister under Section 48 (2) of the Road Traffic Act, 1930, as amended by the Road Traffic Act, 1934.
