(3) Ordnance Survey Numbers are not required if the agricultural holding is wholly and exclusively composed of charged land. Where this is not the case, the numbers on the latest available edition of the Ordnance Survey Map on the $\frac{1}{2500}$ scale should be given; or, alternatively, the Surveyor of Taxes should be supplied with a map and such other information as he may require to identify both the charged land and the remainder of the holding.

Each tithe area, or part of a tithe area, must be entered separately and the corresponding annuity entered in Column V.

(5) If there is more than one tithe area, give also the total acreage of all of them.

(6) The amount to be entered is the whole of the annuity or annuities charged in respect of each tithe area; annuities charged in respect of land out of which extraordinary tithe rentcharge issued should be included.

EXPLANATORY NOTE

(This Note is not part of the Rules, but is intended to indicate their general purport.)

Under s. 14 of and the Fourth Schedule to the Tithe Act, 1936, the owner of land wholly comprised in an agricultural holding is entitled in certain circumstances to a remission of an amount equal to the excess of the annuities charged in respect of that land over one-third of the annual value of the land. The annual value is that specified in a certificate issued by the Surveyor of Taxes to whom an application has to be made by the landowner.

These Rules, which under s. 10 (10) of the Tithe Act, 1951, are a statutory instrument, prescribe the form in which the application has to be made, and replace the Redemption Annuities Rules, 1936, which are revoked.
